

Chapter 8 conspicuity guidelines

For more information, help or advice please contact us at:
www.chapter8shop.co.uk

Any works vehicle stopping on the highways should be of a conspicuous colour (yellow or white) and have:

- 1 High Visibility markings on the rear
- 2 Either “Highway Maintenance” or “Motorway Maintenance” (if working on motorways only) clearly visible
- 3 A strip of Hi Visibility fluorescent yellow retro-reflective material along the side of the vehicle that is at least 50mm wide
- 4 The High Visibility markings need to cover as much of the rear-facing portion of the vehicle as possible without obscuring windows
- 5 Red retro reflective tape should be applied to all rear facing edges of open doors, guardrails and equipment lockers

The High Visibility Markings should be:

Alternate strips of fluorescent orange-red retro-reflective material and non reflective fluorescent yellow material, each pointing upwards at 45-60°
