

ROCKTOP CT

Characteristics:

- **RockTop CT** is the latest advancement in Nano technology high performance sealers. Stain and etch protection system designed specifically for Specialty concrete, engineered cements and natural stone used countertops/ furniture/ bathtubs & Shower stalls
- **RockTop CT** Levels out very well when applied by roller, HVLP spray or even brushed on. The use of 519 Primer before application will help eliminate pinholes and surface imperfections. The use of 519 Rock Enhancer as a primer will give it extra protection for outdoor or use in sinks.
- **RockTop CT** is environmentally Friendly/ Food safe and VOC compliant, Under 100g/L.
- **RockTop CT** It is both deeply penetrating and film forming to protect substrates from acid etching and virtually all types of stains on porous materials, indoors or outdoors.
- **RockTop CT** is available in gloss, matte and non-slip.
- **RockTop CT** Can be reapplied easily in damaged and high-wear areas as needed.

Unique Features:

- Single component no mixing or measuring. Ready to use
- Easy application excellent self leveling properties.
- Scratch Resistant 35% harder than granite in 30 days.
- Acts as a densifier and hardens concrete and softer surfaces such as marble and travertine, making it tough and suitable for commercial and residential installations.
- It is impervious to most all food and food related items as well as most household chemicals routinely experienced in kitchens and baths.
- The Non-slip version of **RockTop CT** is ideal for shower floors and exterior stairways.
- It can be slowly rubbed with clean pad applicators and applied to granite and marble polished surfaces by trained installers.
- It has the ability to seal in color pigments and give excellent etch and stain protection of concrete countertop surfaces and vessels.

Application:

See Application instructions or contact Surface519 for application info.

Post Application / Maintenance Instructions:

Be careful of the fresh sealer for minimum of one- two weeks after application, this includes but is not limited to:

- No standing liquids including water
- Do not leave soap dishes, dispensers or appliances on the surface
- Clean up spills as they occur
- Clean with soap and water/ no abrasive cleaners or acidic cleaners
- Be careful with scratching do not slide objects across the surface

After the initial cure, the sealer will continue to get more scratch and stain resistant for up to 30 days, however "normal" use can commence after the initial cure.

- Clean with Non-abrasive/ non-acidic cleaners (519 Sterile Rock anti-microbial) or any off-the-shelf cleaner
- Clean up vinegar spills as they occur
- Do not slide rough, heavy or sharp objects across the surface. Although very scratch resistant, the finish is not scratch proof.
- Although not required, wax or 519 Polished Stone Sealer or 519 wipe-on protectant can be applied.
