Dear Customer:

Congratulations on the purchase of your new Speedster® Extractor. As you are already aware, the scene of the equipment world is becoming more high tech, and we at Mytee Products Inc. strive to keep you on the cutting edge with superior quality and technology.

Keep in mind that the Speedster® Extractor is a machine, so neglect or abuse will cause unnecessary damage and void the warranty. However with simple maintenance the Speedster® will give quality performance for many years to come.

If warranty questions arise, please consult user manual or get in touch with your distributor. If you have questions about maintenance, replacing parts or ordering parts, please call an authorized Mytee Products Inc. Service Center. To see an updated list, visit our website at www.mytee.com

Before you begin using, please read your manual thoroughly.

Sincerely,
Mytee Customer Care Dept.

Grounding Instructions

This machine must be grounded. If it should malfunction or breakdown, grounding provides a path of least resistance for electrical shock. This machine is equipped with a cord having an equipment-grounding conductor and grounding plug. The plug must be plugged into an appropriate outlet that is properly installed in accordance with all local code and ordinances. Do not remove ground pin; if missing, replace plug before use.

Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service person if you are in doubt as to whether the outlet is properly grounded. Do not modify the plug provided with the machine. If it will not fit the outlet, have a proper outlet installed by a qualified electrician.

This appliance is for use on a nominal 120-volt circuit, and has a grounding plug that looks like the plug illustrated in Figure 1 below. A temporary adapter illustrated in Figures 2 and 3 may be used-to connect this plug to a 2-pole receptacle as shown in Figure 2 if a properly grounded outlet is not available. The temporary adapter should be used only until a properly grounded outlet (Figure 1) can be installed by a qualified electrician. The green colored rigid ear, tab or the like extending from the adapter must be connected to a permanent ground such as a properly grounded outlet box cover. Whenever the adapter is used, it must be held in place by a metal screw. Grounding adapters are not approved for use in Canada.

Replace the plug if the grounding pin is damaged or broken.

The Green (or GreenYellow) wire in the cord is the grounding wire. When replacing a plug, this wire must be attached to the grounding pin only.

DO NOT use extension cords.

Please Note for America use only

Parts and Service

Repairs, when required, should be performed by Mytee service personnel or Mytee authorized Service Center using Mytee original replacement parts and accessories. Call Mytee for repair parts or service. Please

specify the Model and Serial Number when discussing your machine.

Name Plate

The Model and Serial Number of your machine are shown on the name plate located on the inside of the machine. This information is needed when ordering repair parts for the machine. Use the space provided on the front cover to note the Model and Serial Number of your machine for future reference.

Unpacking the Machine

When the machine is delivered, carefully inspect the shipping carton and the machine for damage. If damage is evident, save the shipping carton so that it can be inspected by the carrier that delivered it. Contact the carrier immediately to file a freight damage claim.

Caution and Warnings

Symbols

Mytee uses the symbols below to signal potentially dangerous conditions. Always read this information carefully and take the necessary steps to protect personnel and property.

DANGER

Is used to warn of immediate hazards that will cause severe personal injury or death.

WARNING

Is used to call attention to a situation that could cause severe personal injury.

CAUTION

Is used to call attention to a situation that could cause minor personal injury or damage to the machine or other property. When using an electrical appliance, basic precautions should always be followed, including the following: Read all instructions before using this machine. This product is intended for commercial use only.

WARNING

To reduce the risk of fire, electrical shock, or injury:

1. Read all instructions before using equipment.
2. Use only as described in this manual. Use only manufacturer's recommended attachments.
3. Always unplug power cord from electrical outlet before attempting any adjustments or repairs.
4. Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
5. Do not pull or carry by cord. Do not close a door on cord or pull cord around sharp edges or corners.
6. Do not run appliance over cord. Keep cord away from heated surfaces.
7. Do not use with damaged cord or plug. If cord is damaged, repair immediately.
8. Do not use outdoors or on wet surfaces and or standing water.
9. Always unplug or disconnect the appliance from power supply when not in use.
10. Do not allow to be used as a toy. Close attention is necessary when used by or near children.
11. Do not use in areas where flammable or combustible material may be present.
12. Do not leave the unit exposed to harsh weather elements. Temperatures below freezing may damage components and void warranty.
13. Use only the appropriate handles to move and lift unit. Do not use any other parts of this machine for this purpose.
14. Keep hair, loose clothing, fingers, and all parts of the body away from all openings and moving parts.
15. Use extra care when using on stairs.
16. To reduce the risk of fire or electric shock, do not use this machine with a solid-state speed control device.

GENERAL INFORMATION

17. The voltage and frequency indicated on the name plate must correspond to the wall receptacle supply voltage.
18. When cleaning and servicing the machine, local or national regulations may apply to the safe disposal of liquids which may contain: chemicals, grease, oil, acid, alkalines, or other dangerous liquids.
19. Do not leave operating unattended.

Preparation

1. Remove furniture and other items from the area you are going to clean.
2. Vacuum carpet and upholstery, and remove debris.
3. Protect cabinets, walls and painted surfaces with drop cloths or plastic.
4. Inspect power cords for damages.

Operating Instructions

1. Fill the solution tank.
2. Attach one end of a solution hose to a wand or other tool, the other end to the Speedster's® front quick disconnect.
3. Attach one end of a vacuum hose to the tool, the other end to the Speedster's® Cuff-Lynx™ vacuum hose port.
4. Plug in power cords.
 - **1000DX-200 models** – Plug single cord into single, 20A grounded wall outlet.
 - **1001DX-200 models** – Using two separate circuits/breakers, plug the left power cord into 20A grounded wall outlet to turn on Vac 2 and Heater 2. Plug the right power cord into separate 20A grounded wall outlet to turn on Vac 1, Heater 1 and Pump.
 - **1003DX models** – Using two separate circuits/breakers, plug the left power cord into 20A grounded wall outlet to turn on Vac 2 and Heater 2. Plug the right power cord into separate 20A grounded wall outlet to turn on Vac 1, Heater 1 and Pump.
 - **1005DX models** – Using two separate circuits/breakers, plug the left power cord into 20A grounded wall outlet to turn on Vac 2. Plug the right power cord into separate 20A grounded wall outlet to turn on Vac 1 and Pump.
- The amber light indicator on the switch plate will illuminate brightly when cords are plugged into two separate circuits. Do not use extension cords longer than 50 feet.
5. Turn on switches.
 - 1000DX-200, 1005DX models – Turn on Vac 1, Vac 2 and Pump switches.
 - 1001DX-200 and 1003DX – Turn on Vac 1, Vac 2 and Pump switches. Turn on Heater switch if heat is being used. Wait several minutes for water to heat. Heater switch has three positions: Off (middle); 1,000 watts using one heater (left); and 2,000 watts using two heaters (right). Red lights on panel display indicate watts selected: one light = 1,000 watts; two lights = 2,000 watts; no lights = heaters are off.
 - 6. 1003DX and 1005DX models – Prime Valve and Pressure Regulator are located on the lower front of the extractor. To prime the pump, turn the valve to the Prime position for 30 seconds, then turn horizontally to the Run position. Turn the Pressure Regulator to the left to decrease the water pressure. Turn to the right to increase water pressure. Level will be visible on the pressure gauge. Monitor while adjusting, using Pressure Gauge on Switch Panel.
 - 7. Begin cleaning. Make two dry passes to every wet pass. Work away from cords to avoid damage. To clean heavily soiled areas, repeat cleaning from a different direction.
 - 8. Use a foam control solution in the recovery tank to prevent motor damage and check for foam build-up in recovery and solution tanks.
 - 9. Empty the recovery tank as needed when the internal ball float automatically shuts off the vacuum. Attach the 45° drain elbow to the drain spout in back. Lift up the dump valve and empty tank.
 - 10. To relieve water pressure from the solution hose before disconnecting it, squeeze the tool's trigger five seconds after turning the power switches off.
 - 11. Once machine is off, unplug power cords. Remove solution and vacuum hoses. Empty the recovery tank by attaching the 45° drain elbow to the drain spout in back. Lift up the dump valve and empty tank.
 - 12. 1003DX and 1005DX models – Water remaining in the solution tank can be emptied by turning the Prime Valve to the right to move water into the recovery tank. Empty recovery tank.

Please note: Your pump features a pressure switch, to protect vital components. A minimum spray jet size of 02 needed for use with this pump. Using a jet size smaller than this can cause back-pressure to the pump, leading to an over-heat condition. Make sure that your tool has a jet size of 02 or larger prior to use.

After Use

1. Before storing machine, drain, rinse and dry tanks and vacuum hose of water and solution.
2. Store in a dry are in the upright position.
3. Open recover tank cover to promote air circulation.
4. Store indoors in a dry area. If storing in freezing temperatures, make sure the machine and solution system are completely drained and dry.

Maintenance Schedule

Latches are located in back to open tank for internal maintenance. To keep machine in good working condition, follow machine's daily and weekly maintenance procedures. Check valves and relief valves should be replaced annually.

Maintenance item	Daily	Once a week
Clean and inspect tanks.	x	
Clean and inspect hoses.	x	
Check and clean internal filters by twisting off, rinsing with clean water and replacing.	x	
Check power supply cable.	x	
Clean machine with all-purpose cleaner and cloth.	x	
Check spray nozzles.	x	
Flush solution system with Mytee® System Maintainer.		x
Remove and float shut-off screen from tank and clean. Simply pull off.		x
Inspect vacuum hoses for holes and loose cuffs.		x
Inspect spray pattern for clogging. If clogged, remove spray tips and soak them in a recommended liquid neutralizer for up to six hours. To remove spray tip, twist spray tip body counter-clockwise.		x
Lubricate wheels with water resistant oil.		x
Inspect machine for water leaks and loose hardware.		x

Trouble Shooting

There is no power.

1. Plug machine in proper outlet.
2. If using two cords, make sure each is plugged into a separate circuit.
3. Check circuit breaker. Reset circuit breaker, other items should not run on the same circuit as the machine. Outlet must be a 20-amp circuit.

Pump does not work properly

1. Snap quick disconnects firmly together.
2. Check solution tank; may be empty.
3. Jets clogged, remove jet and flush clean.
4. Filters clogged, remove filters and rinse clean with water.
5. Heater is blocked; flush out with Mytee's® System Maintainer.
6. If brass check valve is stuck, replace valve.
7. Check pump wire. May need to reconnect wire.
8. Switch plate may need to be replaced.
9. If pump motor brushes are worn, replace pump.

***A minimum spray jet size of 02 needed for use with this pump.**

1001DX-200 or 1003DX heater does not work properly

1. If sensor mounted on the heater has popped, reset sensor by pushing in button.
2. Heating element may need to be replaced.

Vacuum motor does not work properly

1. Check that hose is tightly connected.
2. Close drain hose valve completely.
3. Secure the vacuum tank tightly.

4. If electronic switch is shut off, empty vacuum tank of all wastewater.
5. If water is coming out of the vacuum motor, use a low foaming detergent.
6. Clean upholstery tool or floor wand jets.

FAQs

Q: How much do the Speedster® Series extractors weigh and what are the dimensions?

A: All Speedsters

Machine Dimensions: 28" x 18 1/4" x 40"

Shipping Dimensions: 29 1/2" x 19 1/4" x 46 1/2"

1000DX-200 – Machine Weight: 83 lbs.

Shipping Weight: 104 lbs.

1001DX-200 – Machine Weight: 94 lbs.

Shipping Weight: 124 lbs.

1003DX – Machine Weight: 122 lbs.

Shipping Weight: 150 lbs.

1005DX – Machine Weight: 113 lbs.

Shipping Weight: 140 lbs.

Q: What are the tank capacities?

A: Capacities for all Speedsters

Solution tank capacity: 10 gal.

Recovery tank capacity: 9 gal.

Vacuums shut off automatically when recovery tank reaches 8 gal.

Q: What comes standard with Speedsters™ extractors?

A: Hose hanger with four screws, two Cuff-Lynx™ Model Numbers: H141

Reducer and H110 Coupler Swivel, and 45° drain elbow.

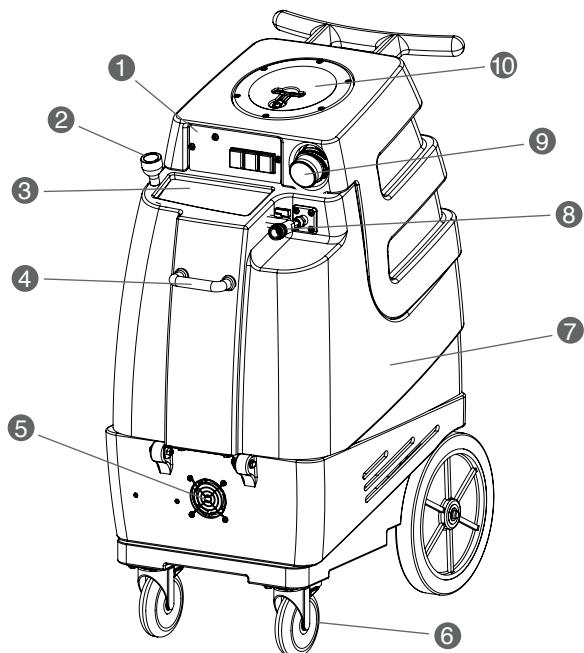

Q: Does Mytee® recommend tools for this machine?

A: All upholstery tools and wands can be used with the Speedster® series.

Q: Is there anything I can do to increase the expected life of my machine?

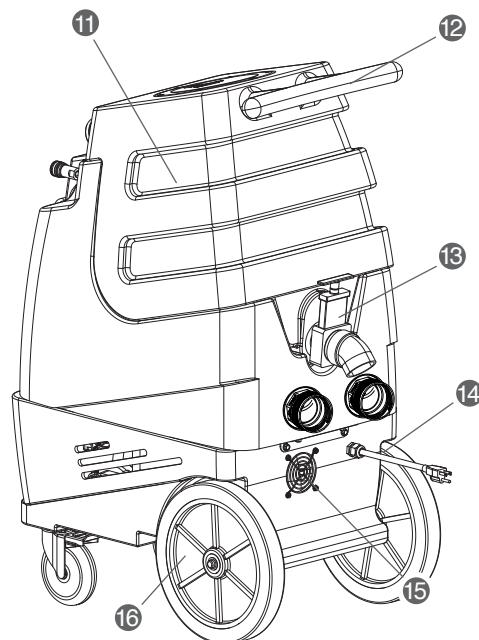

A: Running the vacuum motors with the tank empty and lid off will allow excess moisture in the vacs to dry off. You should also run Mytee's® System Maintainer through the system to keep the hoses, pump, and heater clean and free of debris..

1000DX-200 SPEEDSTER® FRONT

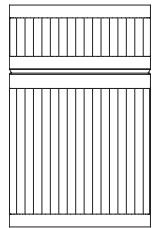

- 1. Switch plate
- 2. Easy faucet fill
- 3. Solution tank lid
- 4. Front handle
- 5. Front vent
- 6. 5" locking casters
- 7. Solution tank
- 8. Female quick disconnect
- 9. 2" Male Cuff-Lynx™
- 10. Recovery lid

1000DX-200 SPEEDSTER® BACK

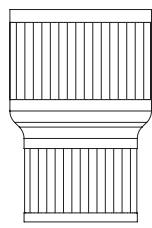

- 11. Recovery tank
- 12. Push handle
- 13. Drain valve
- 14. Power cord
- 15. Back vent
- 16. 12" Rear wheels

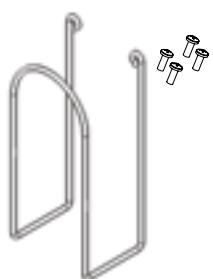

1000DX-200 SPEEDSTER® ITEMS INCLUDED

H110 Cuff-Lynx™
2" Hose Adapter

H141 Cuff-Lynx™
2" Hose Reducer to 1.5"

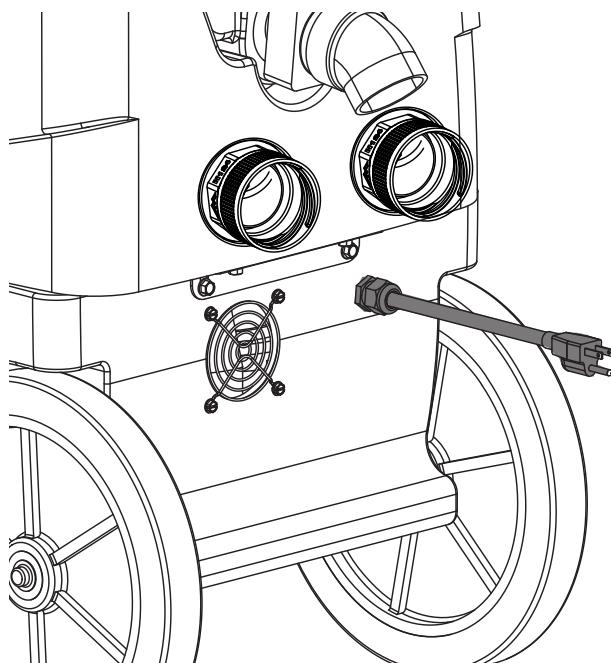

H375 - Hose Hanger
(4) screws

H226 Drain Elbow

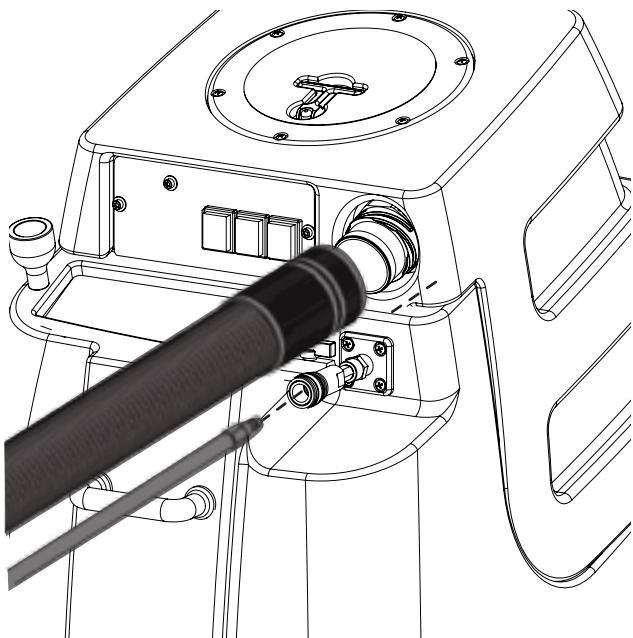

1000DX-200 SPEEDSTER® CORD

Plug the power cord into a single, 20A grounded wall outlet.

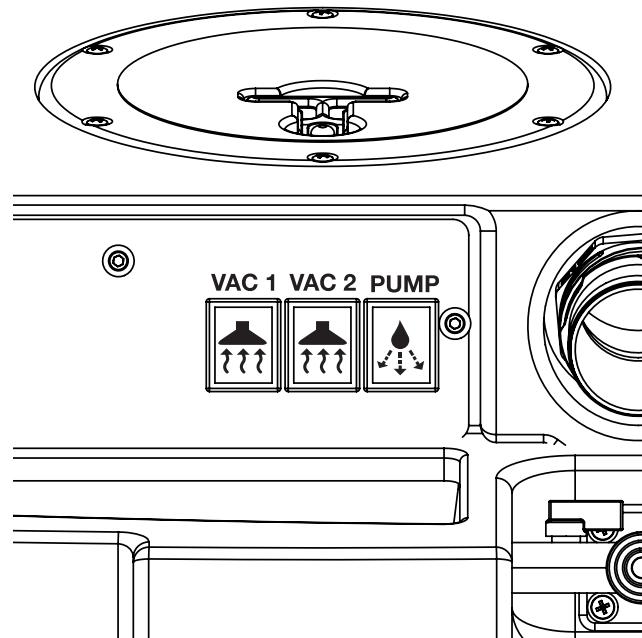

1000DX-200 SPEEDSTER

1000DX-200 SPEEDSTER® VAC/SOL HOSE CONNECTIONS

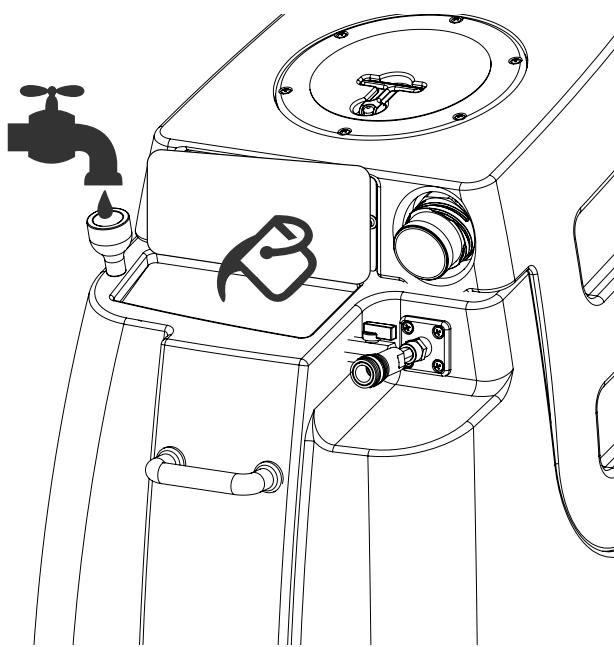

Attach one end of a solution hose to a wand or other tool, the other end to the Speedster's® front quick disconnect. Attach one end of a vacuum hose to the tool, the other end to the Speedster's® Cuff-Lynx™ vacuum hose port.

1000DX-200 SPEEDSTER® SWITCHES

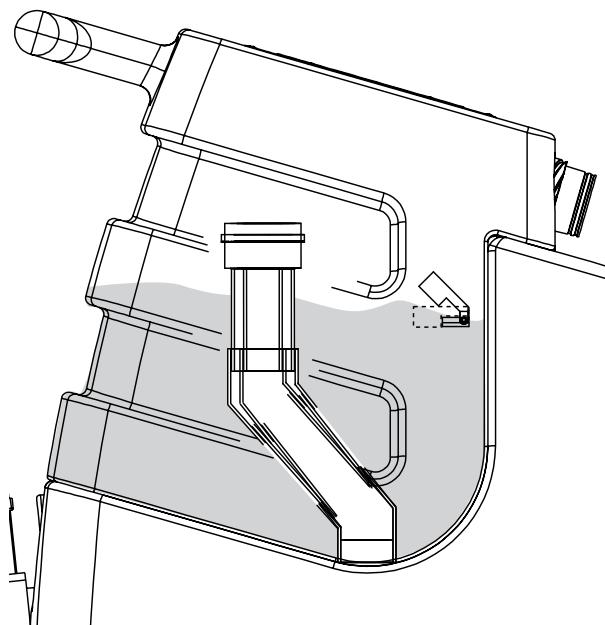

Turn on Vac 1, Vac 2 and Pump switches.

1000DX-200 SPEEDSTER® FILL SOLUTION TANK

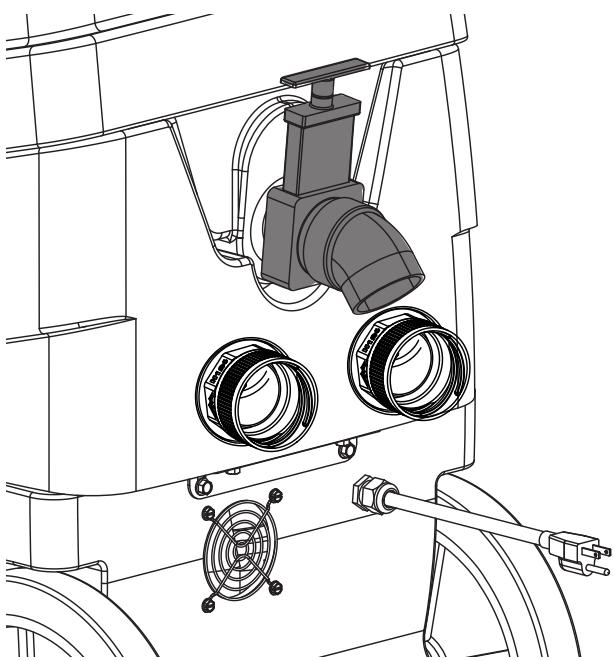

Lift lid and manually fill the solution tank or use the easy faucet fill.

1000DX-200 SPEEDSTER® FLOAT SWITCH

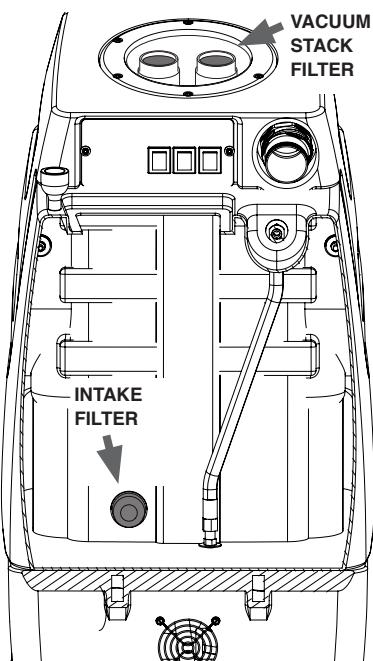

The Speedster® is equipped with an electronic float switch inside the recovery tank. The recovery float switch is activated by rising water to prevent suction into the vacuum stacks damaging the motors.

1000DX-200 SPEEDSTER® DUMP VALVE

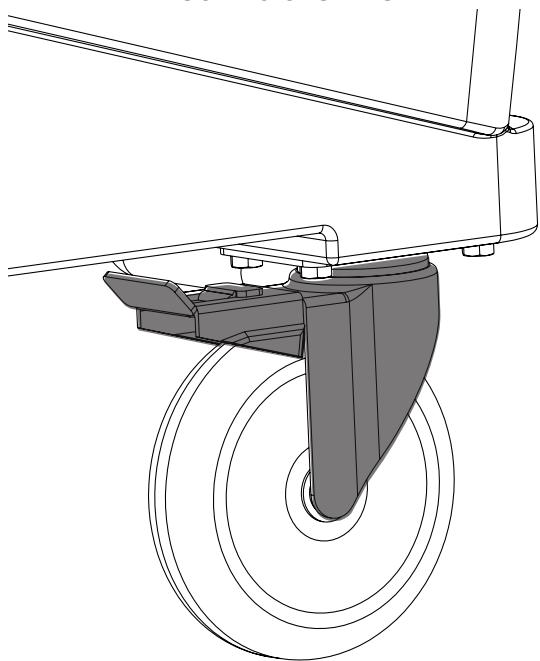

Attach the 45° drain elbow to the drain spout in back. Lift up the dump valve and empty the tank.

1000DX-200 SPEEDSTER® FILTER MAINTENANCE

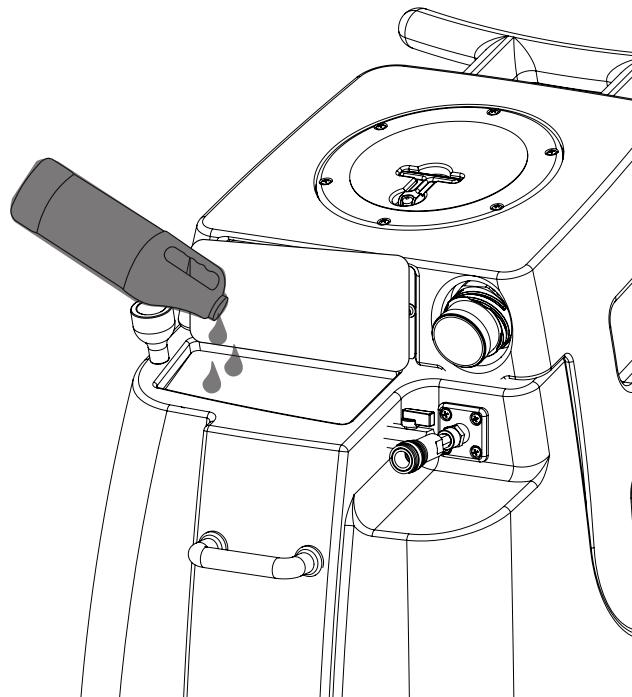

Check and clean the vacuum stack filters and solution tank filter daily by twisting off, rinsing with clean water and replacing.

1000DX-200 SPEEDSTER® LOCKING CASTERS

Locking casters help keep the machine remain stationary during use.

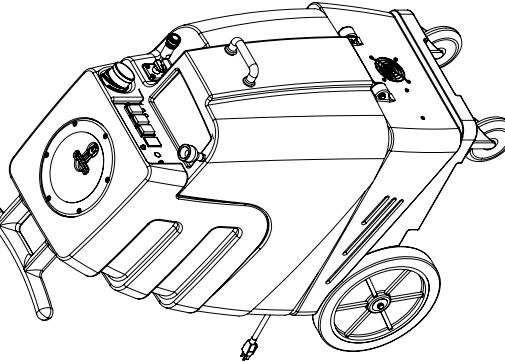

MYTEE® SYSTEM MAINTAINER

Weekly flushing of the solution system with Mytee® System Maintainer helps keep lines clean and prevents chemical build-up, improving pump life, performance and pressure.

1000DX-200 SPEEDSTER WIRING SCHEMATIC

1000DX-200 115 Volt System

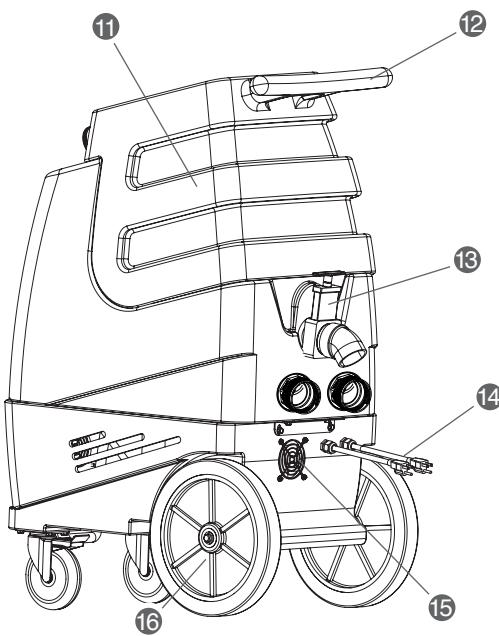

1001DX-200 SPEEDSTER® FRONT

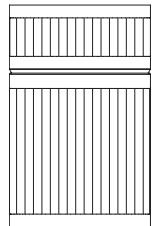

1. Switch plate
2. Easy faucet fill
3. Solution tank lid
4. Front handle
5. Front vent
6. 5" locking casters
7. Solution tank
8. Female quick disconnect
9. 2" Male Cuff-Lynx™
10. Recovery lid

1001DX-200 SPEEDSTER® BACK

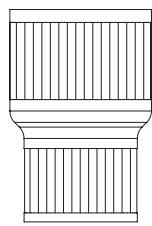

11. Recovery tank
12. Push handle
13. Drain valve
14. Dual power cords
15. Back vent
16. 12" Rear wheels

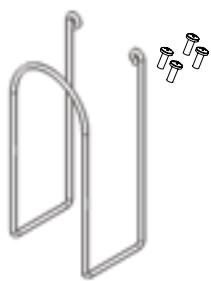

1001DX-200 SPEEDSTER® ITEMS INCLUDED

H110 Cuff-Lynx™
2" Hose Adapter

H141 Cuff-Lynx™
2" Hose Reducer to 1.5"

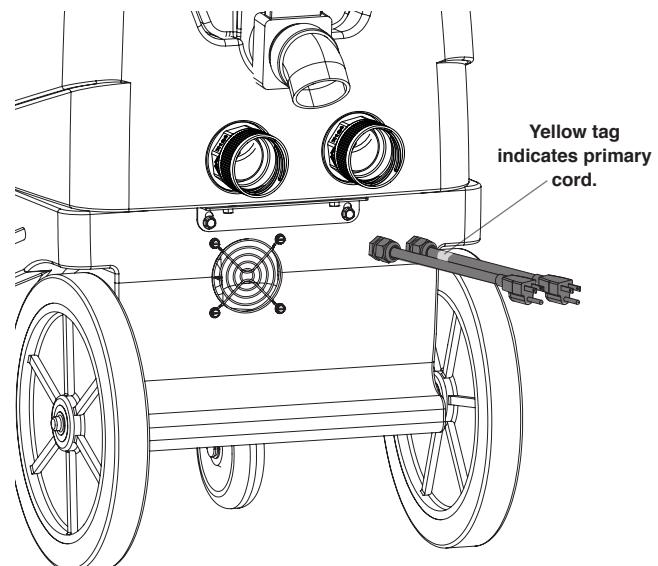

H375 - Hose Hanger
(4) screws

H226 Drain Elbow

1001DX-200 SPEEDSTER® CORDS

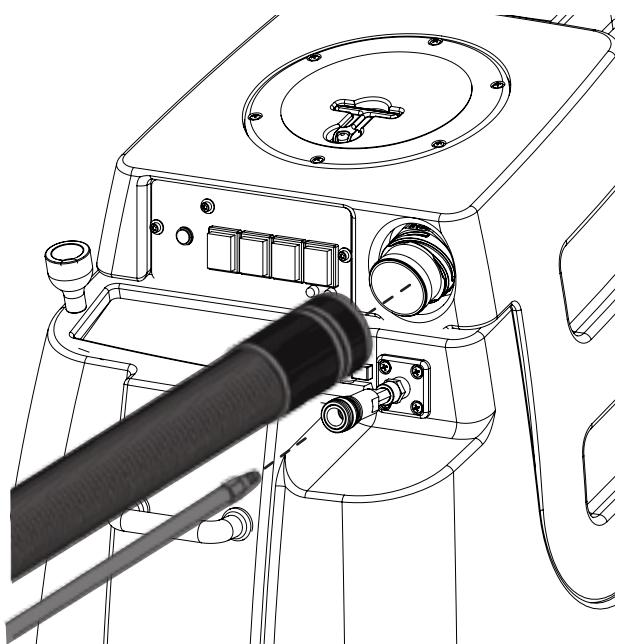

Left cord: Powers Vac 2 & Heater 2.
Right cord: Powers Vac 1, Heater 1 & Pump.

Plug each power cord into a separate, 20A grounded wall outlet. **Outlets must be on two separate breakers.** When the amber light on the switch plate illuminates, the machine is on separate circuits (not necessarily 20A circuits). You can identify the primary cord by the yellow tag.

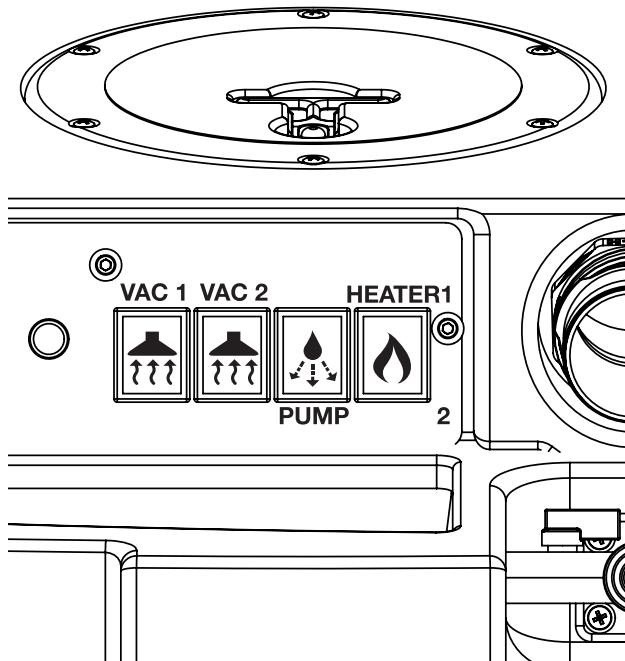

1001DX-200 SPEEDSTER

1001DX-200 SPEEDSTER® VAC/SOL HOSE CONNECTIONS

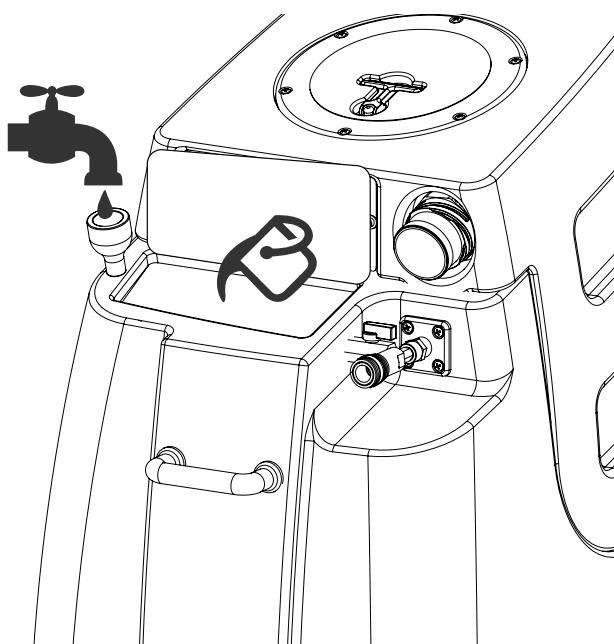

Attach one end of a solution hose to a wand or other tool, the other end to the Speedster's® front quick disconnect. Attach one end of a vacuum hose to the tool, the other end to the Speedster's® Cuff-Lynx™ vacuum hose port.

1001DX-200 SPEEDSTER® SWITCHES

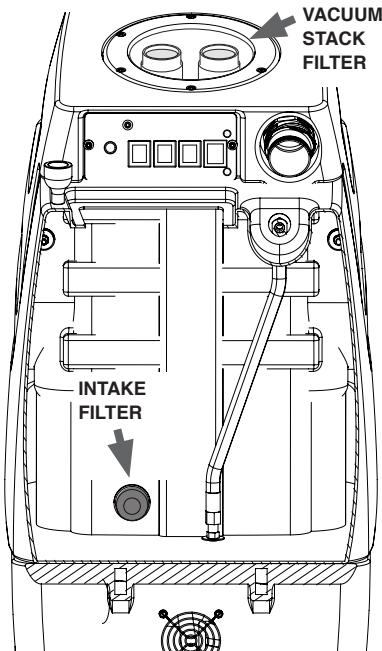

"On" switches are located on the plate in front of the machine. To use vacuums, turn on Vac 1 and Vac 2 switches. To use pump, turn on Pump switch. To activate heat, turn on Heater switch. Heater 1 for 1000 watts of heat. Heater 2 for 2000 watts of heat.

1001DX-200 SPEEDSTER® FILL SOLUTION TANK

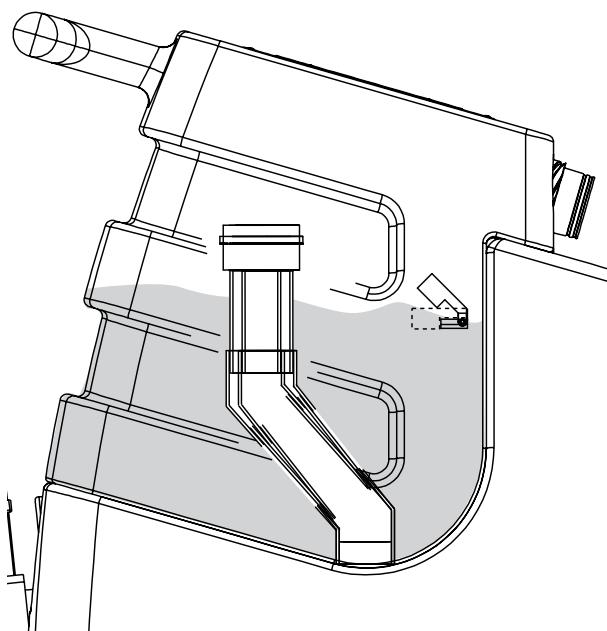

Lift lid and manually fill the solution tank or use the easy faucet fill.

1001DX-200 SPEEDSTER® FILTER MAINTENANCE

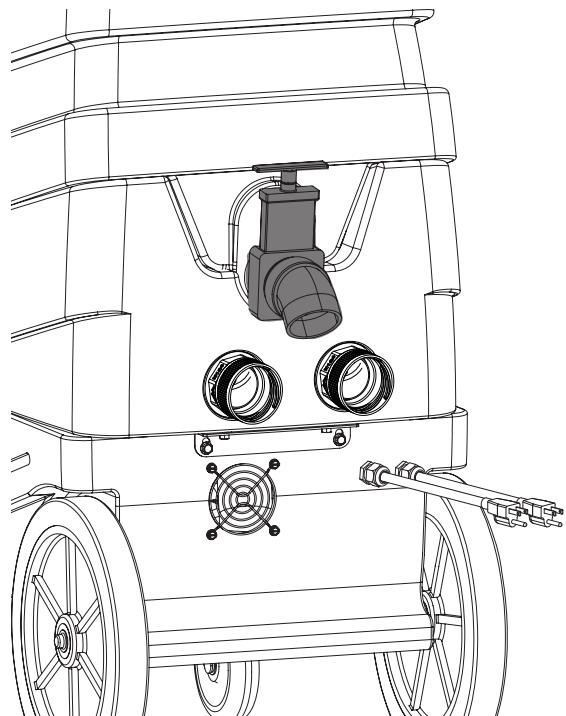

Check and clean the vacuum stack filters and solution tank filter daily by twisting off, rinsing with clean water and replacing.

1001DX-200 SPEEDSTER® FLOAT SWITCH

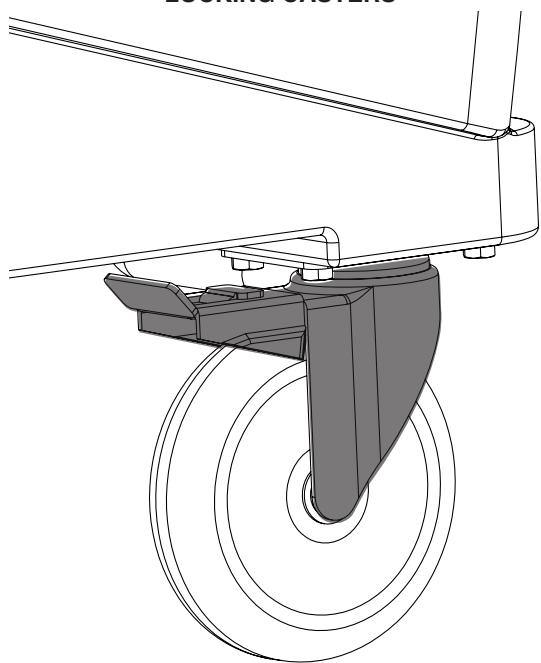

The Speedster® is equipped with an electronic float switch inside the recovery tank. The recovery float switch is activated by rising water to prevent suction into the vacuum stacks damaging the motors.

1001DX-200 SPEEDSTER® DUMP VALVE

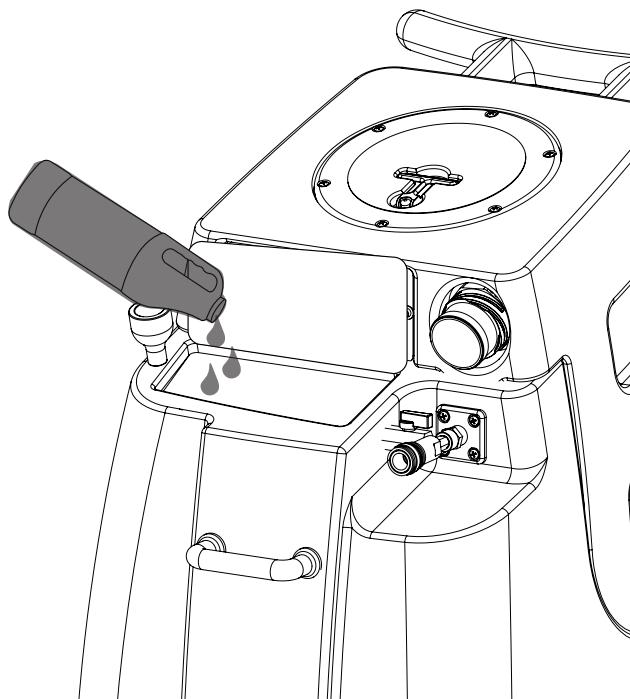

Attach the 45° drain elbow to the drain spout in back. Lift up the dump valve and empty the tank.

1001DX-200 SPEEDSTER® LOCKING CASTERS

Locking casters help keep the machine remain stationary during use.

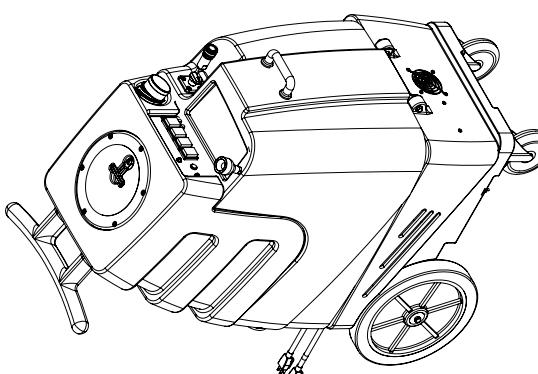

MYTEE® SYSTEM MAINTAINER

Weekly flushing of the solution system with Mytee® System Maintainer helps keep lines clean and prevents chemical build-up, improving pump life, performance and pressure.

1001DX-200 SPEEDSTER WIRING SCHEMATIC

1001DX-200 115 Volt System

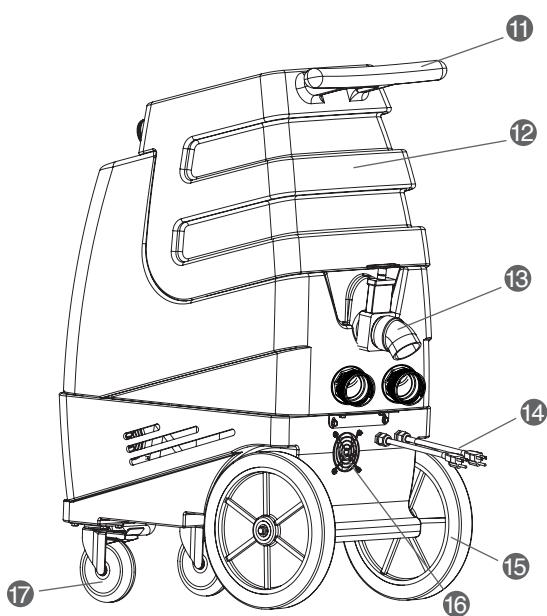

1003DX SPEEDSTER® FRONT

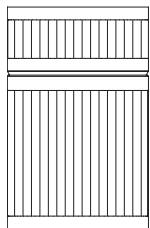

- 1. Switch plate
- 2. Easy Faucet Fill
- 3. Solution lid
- 4. Front handle
- 5. Front cooling fan
- 6. Pressure Regulator
- 7. Solution tank
- 8. Female QD with Prime Valve
- 9. 2" Male Cuff-Lynx™
- 10. Recovery lid

1003DX SPEEDSTER® BACK

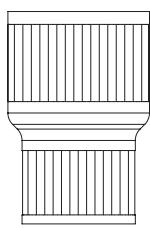

- 11. Push handle
- 12. Recovery tank
- 13. Drain valve
- 14. Dual Power cords
- 15. 12" Rear wheels
- 16. Back vent
- 17. 5" locking casters

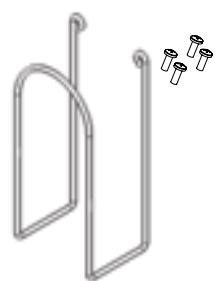

1003DX SPEEDSTER® ITEMS INCLUDED

H110 Cuff-Lynx™
2" Hose Adapter

H141 Cuff-Lynx™
2" Hose Reducer to 1.5"

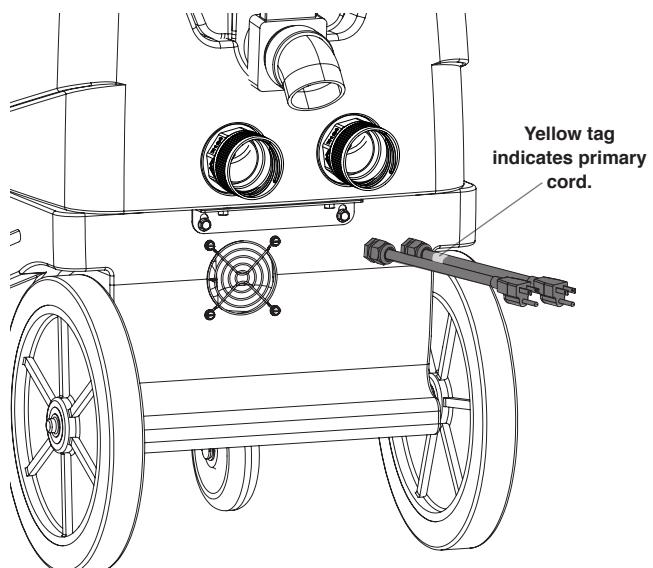

H375 - Hose Hanger
(4) screws

H226 Drain Elbow

1003DX SPEEDSTER® CORD

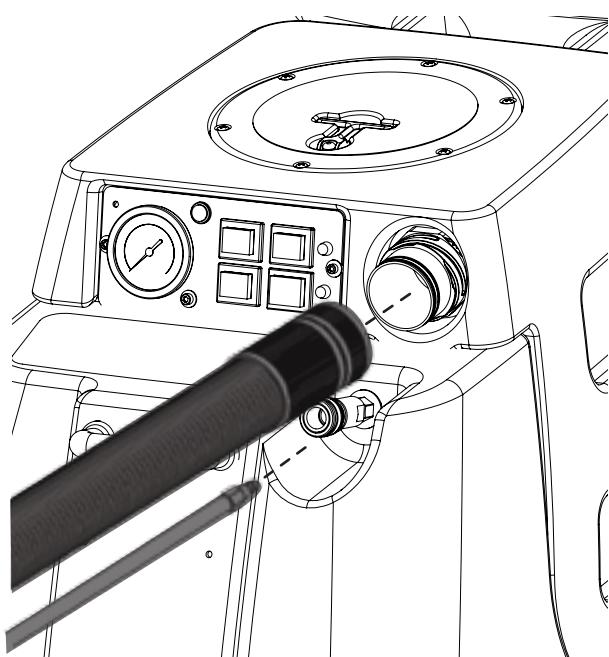

Left cord: Powers Vac 2 & Heater 2.
Right cord: Powers Vac 1, Heater 1 & Pump.

Plug each power cord into a separate, 20A grounded wall outlet. **Outlets must be on two separate breakers.** When the amber light on the switch plate illuminates, the machine is on separate circuits (not necessarily 20A circuits). You can identify the primary cord by the yellow tag.

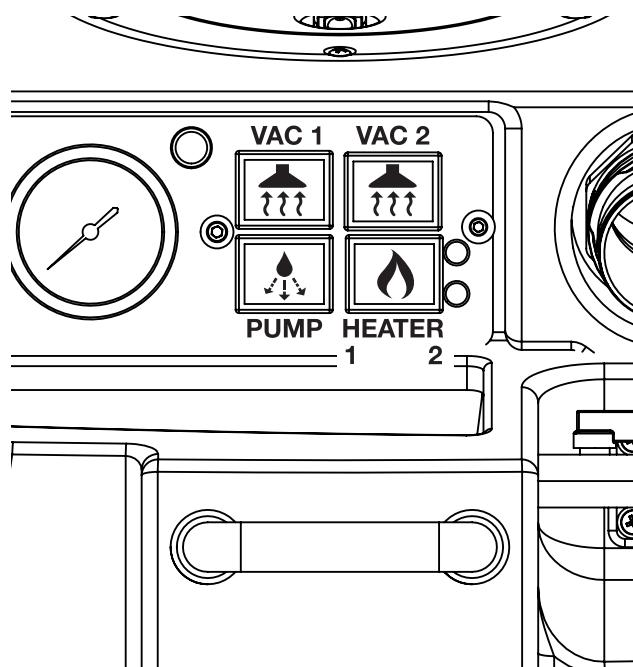

1003DX SPEEDSTER

1003DX SPEEDSTER® VAC/SOL HOSE CONNECTIONS

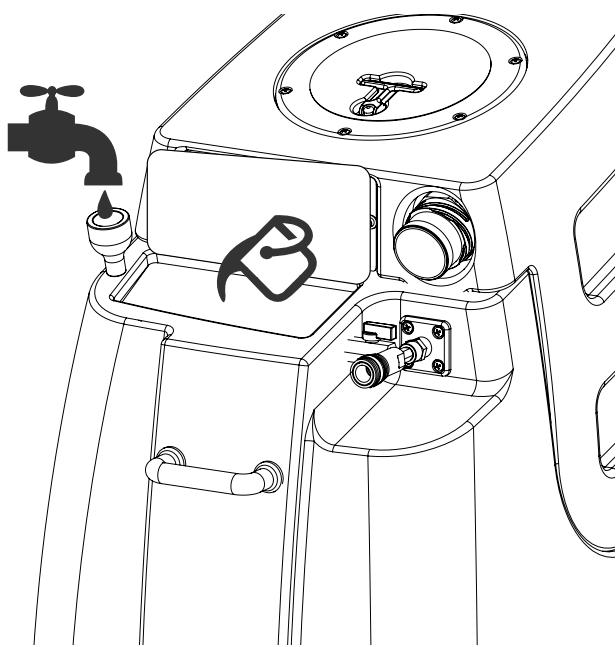

Attach one end of a solution hose to a wand or other tool, the other end to the Speedster's® front quick disconnect. Attach one end of a vacuum hose to the tool, the other end to the Speedster's® Cuff-Lynx™ vacuum hose port.

1003DX SPEEDSTER® SWITCHES

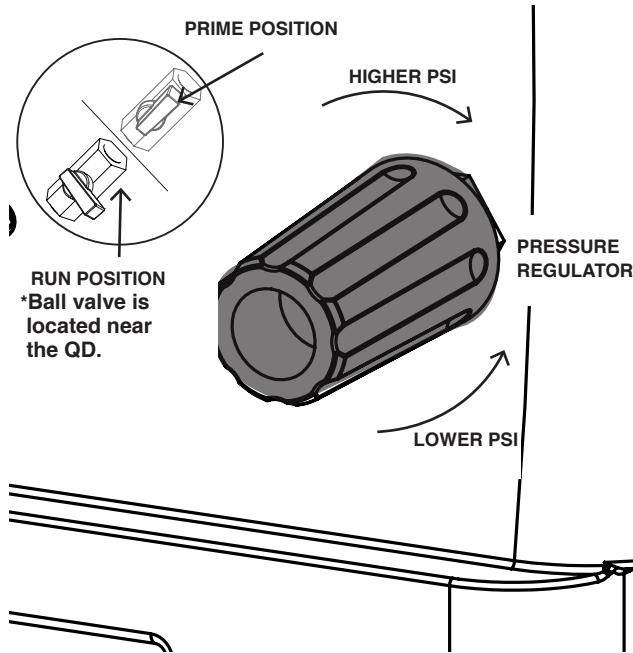

"On" switches are located on the plate in front of the machine. To use vacuums, turn on Vac 1 and Vac 2 switches. To use pump, turn on Pump switch. To activate heat, use lower right switch. Press to the left for 1,000 watts, press to the right for 2,000 watts.

1003DX SPEEDSTER® FILL SOLUTION TANK

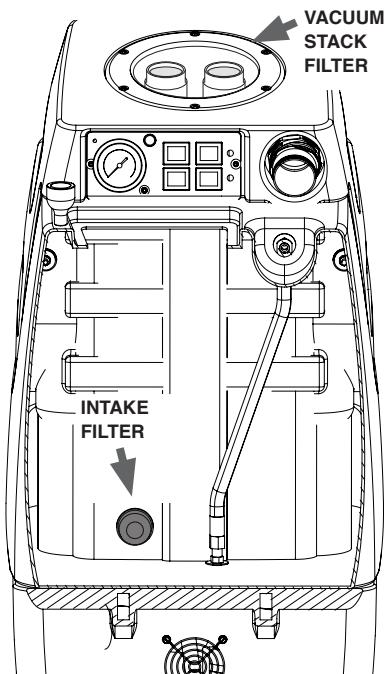

Lift lid and manually fill the solution tank or use the easy faucet fill.

1003DX SPEEDSTER® PRIME VALVE & PRESSURE REGULATOR

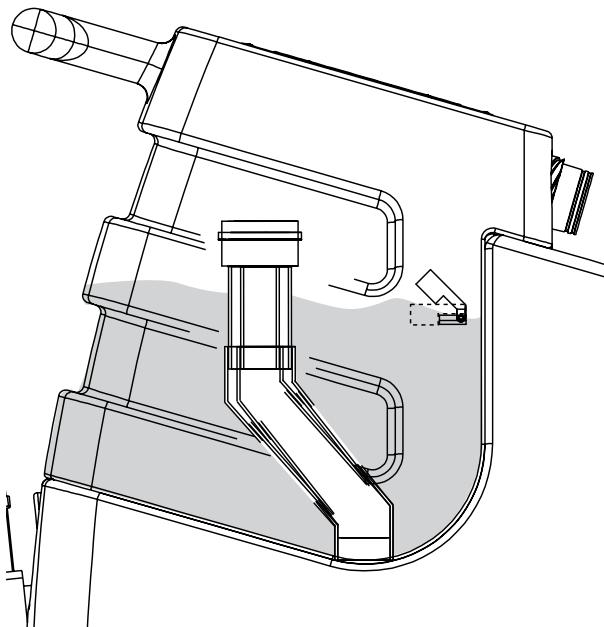

Prime the pump by turning the valve to the Prime position (as shown above) for 30 seconds, then turn right to the Run position. Turn the Pressure Regulator to the left to decrease water pressure. Turn the Pressure Regulator to the right to increase water pressure.

1003DX SPEEDSTER® FILTER MAINTENANCE

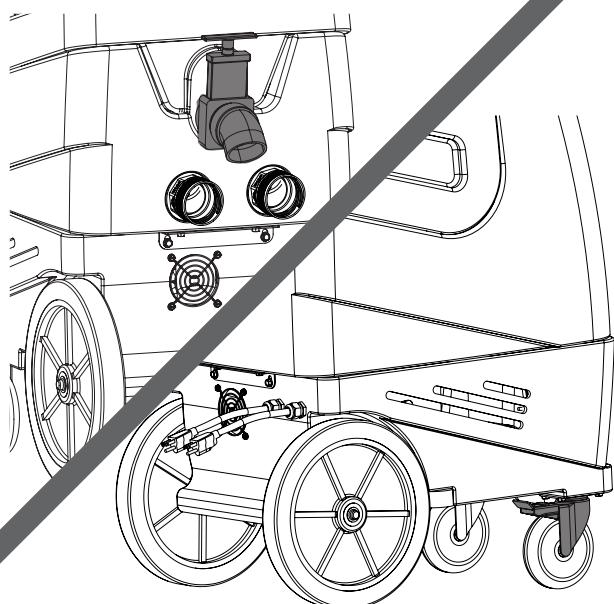

Check and clean the vacuum stack filters and solution tank filter daily by twisting off, rinsing with clean water and replacing.

1003DX SPEEDSTER® FLOAT SWITCH

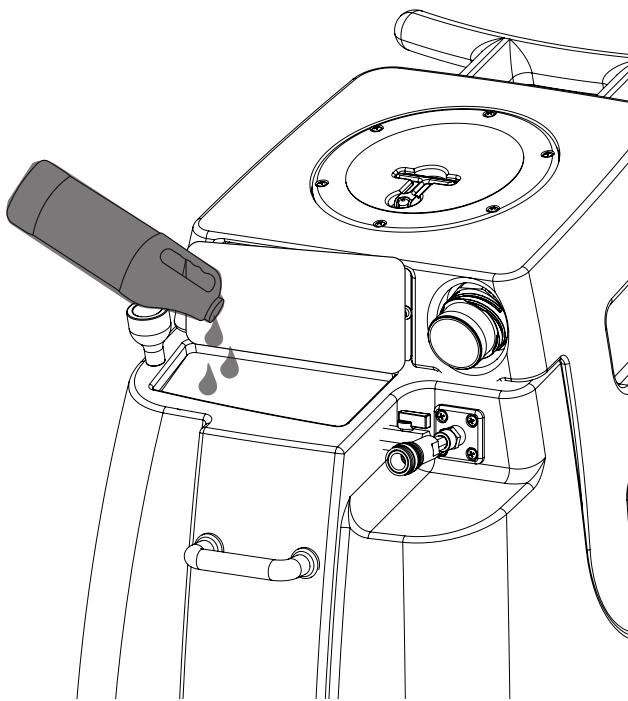

The Speedster® is equipped with an electronic float switch inside the recovery tank. The recovery float switch is activated by rising water to prevent suction into the vacuum stacks damaging the motors.

1003DX SPEEDSTER® DUMP VALVE & LOCKING CASTERS

Above, empty the recovery tank by attaching the 45° drain elbow to the drain spout in back. Lift up the dump valve and empty the tank. Below, locking casters help keep the machine remain stationary during use.

MYTEE® SYSTEM MAINTAINER

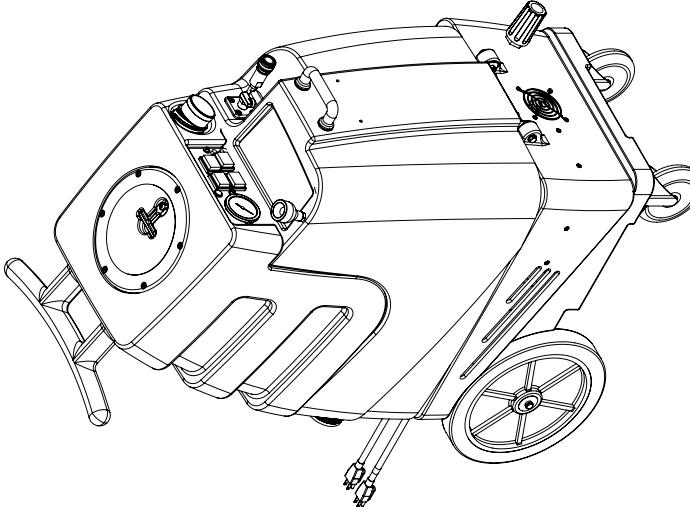

Weekly flushing of the solution system with Mytee® System Maintainer helps keep lines clean and prevents chemical build-up, improving pump life, performance and pressure.

1003DX SPEEDSTER PARTS & PRICING

1003DX SPEEDSTER WIRING SCHEMATIC

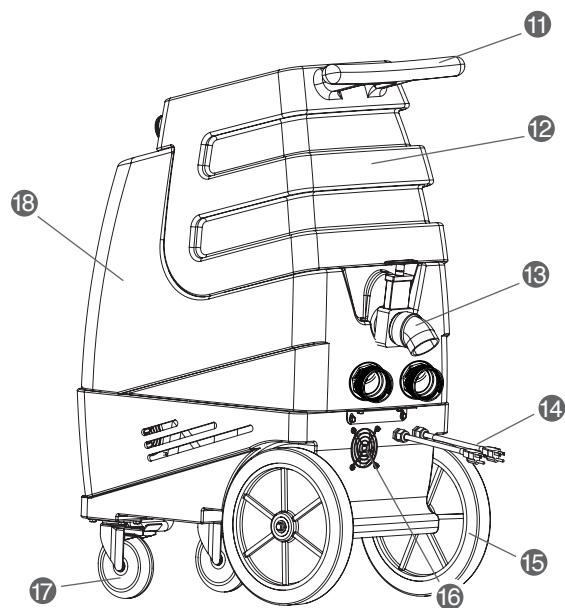

1005DX SPEEDSTER® FRONT

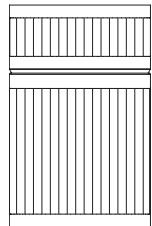

1. Switch plate
2. Easy faucet fill
3. Solution lid
4. Female quick disconnect
5. Front handle
6. Front vent
7. Pressure Regulator
8. Prime Valve
9. 2" Male Cuff-Lynx™
10. Recovery lid

1005DX SPEEDSTER® BACK

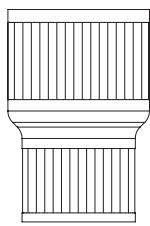

11. Push handle
12. Recovery tank
13. Drain valve
14. Dual Power cords
15. 12" Rear wheels
16. Back vent
17. 5" locking casters
18. Solution tank

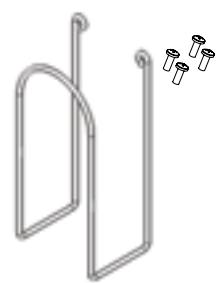

1005DX SPEEDSTER® ITEMS INCLUDED

H110 Cuff-Lynx™
2" Hose Adapter

H141 Cuff-Lynx™
2" Hose Reducer to 1.5"

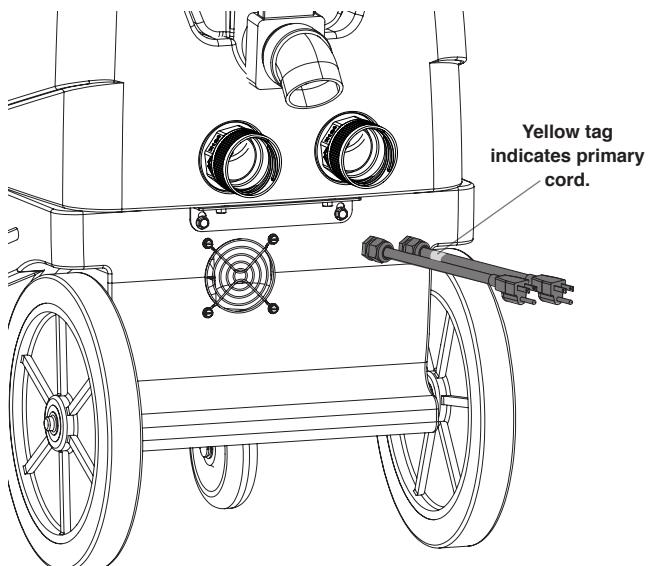

H375 - Hose Hanger
(4) screws

H226 Drain Elbow

1005DX SPEEDSTER® CORD

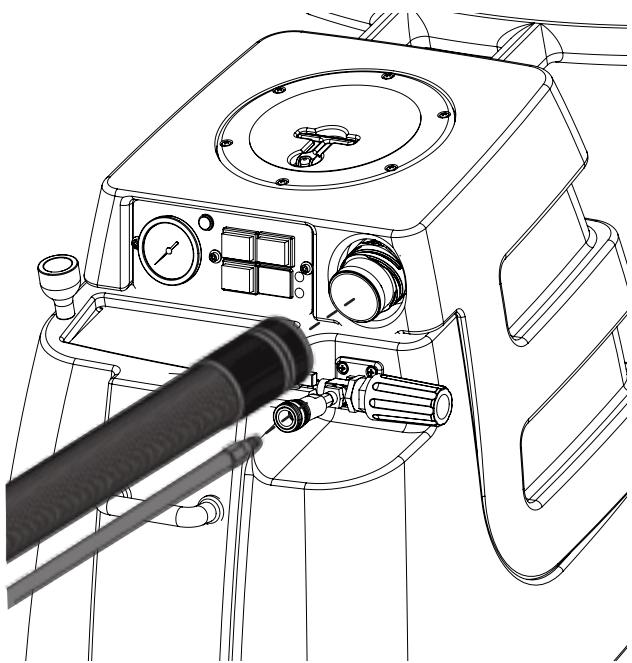

Left cord: Powers power Vac 2.
Right cord: Powers Vac 1 & Pump.

Plug each power cord into a separate, 20A grounded wall outlet. **Outlets must be on two separate breakers.** When the amber light on the switch plate illuminates, the machine is on separate circuits (not necessarily 20A circuits). You can identify the primary cord by the yellow tag.

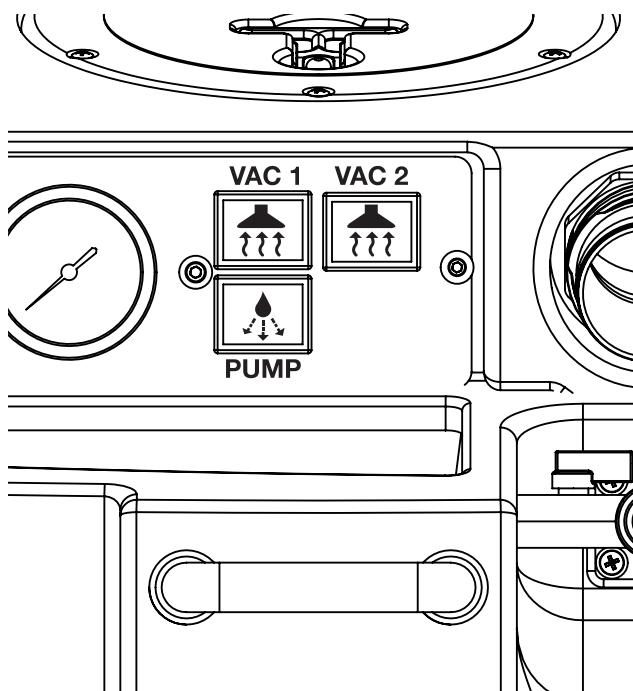

1005DX SPEEDSTER

1005DX SPEEDSTER® VAC/SOL HOSE CONNECTIONS

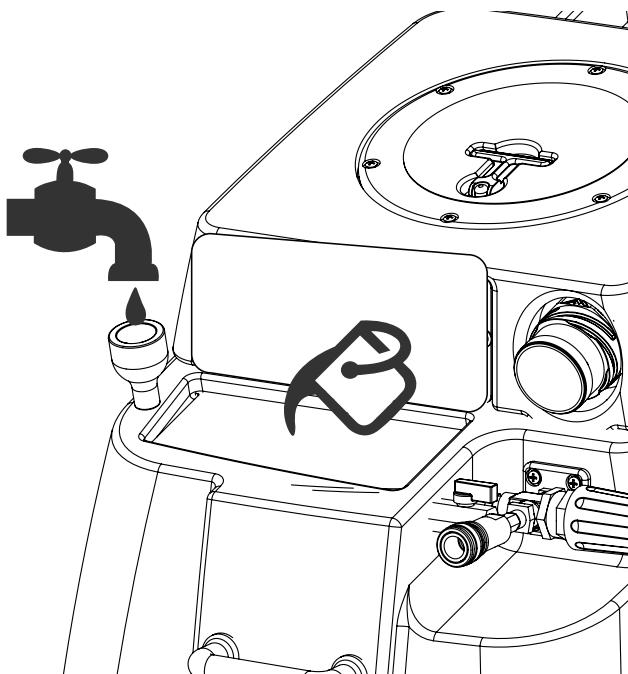

Attach one end of a solution hose to a wand or other tool, the other end to the Speedster's® front quick disconnect. Attach one end of a vacuum hose to the tool, the other end to the Speedster's® Cuff-Lynx™ vacuum hose port.

1005DX SPEEDSTER® SWITCHES

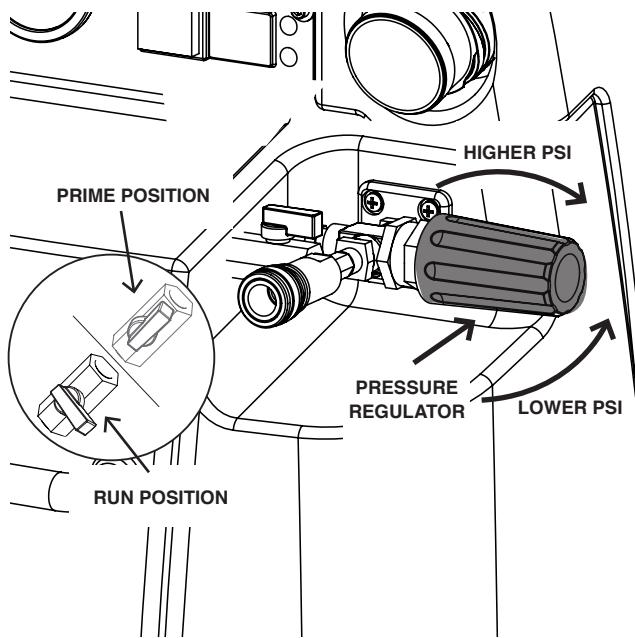

"On" switches are located on the plate in front of the machine. To use vacuums, turn on Vac 1 and Vac 2 switches. To use pump, turn on Pump switch. Bottom right switch has no use.

1005DX SPEEDSTER® FILL SOLUTION TANK

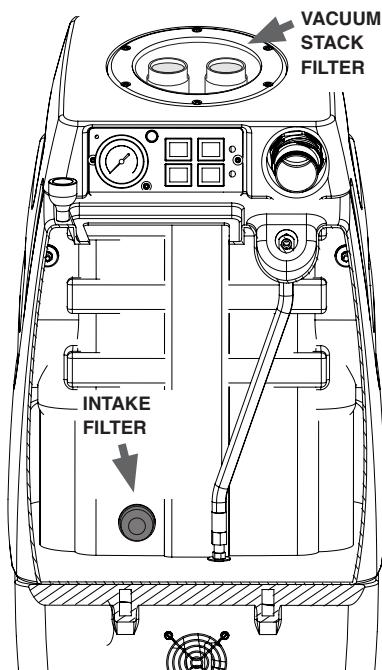

Lift lid and manually fill the solution tank or use the easy faucet fill.

1005DX SPEEDSTER® PRIME VALVE & PRESSURE REGULATOR

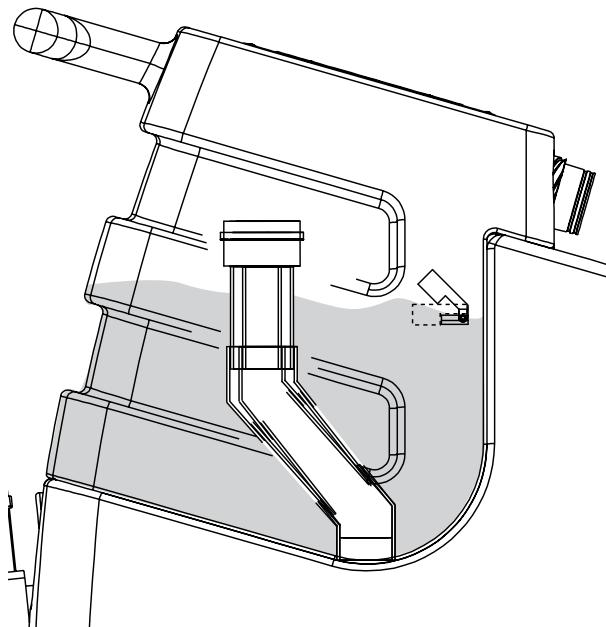

Prime the pump by turning the valve to the Prime position (as shown above) for 30 seconds, then turn right to the Run position. Turn the Pressure Regulator to the left to decrease water pressure. Turn the Pressure Regulator to the right to increase water pressure.

1005DX SPEEDSTER® FILTER MAINTENANCE

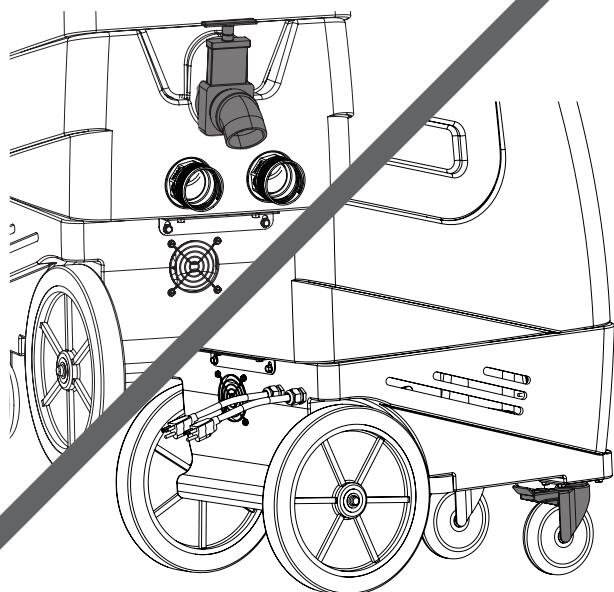

Check and clean the vacuum stack filters and solution tank filter daily by twisting off, rinsing with clean water and replacing.

1005DX SPEEDSTER® FLOAT SWITCH

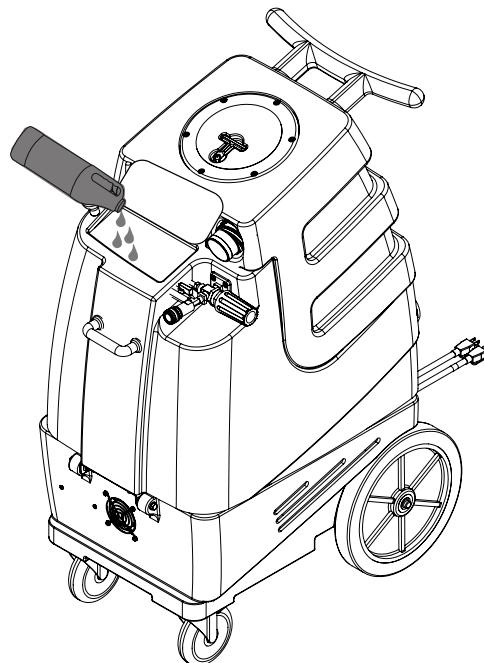

The Speedster® is equipped with an electronic float switch inside the recovery tank. The recovery float switch is activated by rising water to prevent suction into the vacuum stacks damaging the motors.

1005DX SPEEDSTER® DUMP VALVE & LOCKING CASTERS

Above, empty the recovery tank by attaching the 45° drain elbow to the drain spout in back. Lift up the dump valve and empty the tank. Below, locking casters help keep the machine remain stationary during use.

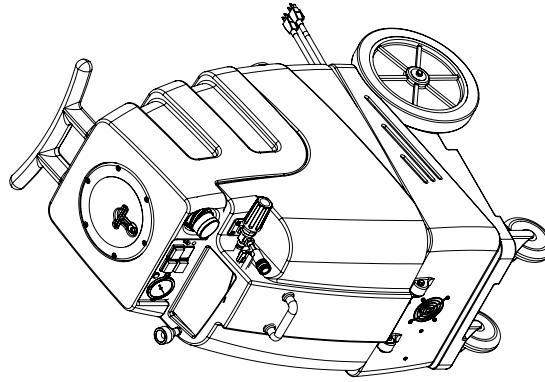

MYTEE® SYSTEM MAINTAINER

Weekly flushing of the solution system with Mytee® System Maintainer helps keep lines clean and prevents chemical build-up, improving pump life, performance and pressure.
