

ISOQUERCETIN

SunActive® IsoQ

TOMORROW'S NUTRITION PRO

Tomorrow's NutritionPRO IsoQuercetin provides a soluble form of IsoQuercetin (a precursor to quercetin) that increases bioavailability 25 times, the equivalent to 2,000 mg of quercetin! Quercetin is a potent antioxidant flavonoid found in many foods and used as a dietary supplement for support against oxidative stress and to support overall health and wellness.*

- ▶ IsoQuercetin promotes healthy immune and metabolic function and supports cellular health.*
- ▶ The SunActive® IsoQ ingredient is 25x more bioavailable than quercetin because of the patented SunActive® Nutrient Delivery System, consisting of micro-encapsulated nutrients which increase the absorption and the bioavailability of fat-soluble nutrients.
- ▶ Supports exercise performance and recovery.*
- ▶ Contains generous amounts of immune supporting Vitamin C.*
- ▶ Flavonoids (derived from the Latin word "flavus," meaning yellow) are phenolic substances which exhibit biological activities.*
- ▶ Quercetin belongs to the class called flavonols that cannot be produced in the human body.

SUGGESTED USE: As a dietary supplement, take 2 capsules daily. Can be take with or without food, any time of day.
