1 New functions

1.1 Selecting the presser foot in the User Interface

After changing the presser foot, a check can be performed to determine whether it is suitable for the selected stitch pattern. Additionally, alternative presser feet are displayed, which are available for the selected stitch pattern.

> Switch the machine on.
> Select a stitch pattern.

> Tap «Presser foot indicator / presser foot selection».

> To display all suitable presser feet for the selected stitch pattern, tap «Optional Presser Feet».
> Select the attached presser foot.
  – When the selected presser foot is suitable, sewing can start.
  – If the selected presser foot is not suitable for the selected stitch pattern, it can still be selected but the machine is automatically prevented from starting. An error message is displayed. If an incorrect presser foot is selected, the sewing stitch is displayed in red in the sewing stitch preview.

1.2 Sewing

Sewing stitch patterns using the triple stitch

The stitch pattern can be sewn three times for a more attractive result. Not all stitch patterns can be sewn using the triple stitch.

> Select a stitch pattern.

> Tap «i-Dialog».

> Tap «Triple Stitch».

Programming pattern repeat

Stitch patterns can be repeated up to 99 times.

> Select a stitch pattern or alphabet.

> Tap «i-Dialog».

> Tap «Pattern Repeat».
> Enter the required number of stitch patterns.

> Tap «Confirm».

Adapting the stitch pattern length and stitch pattern width

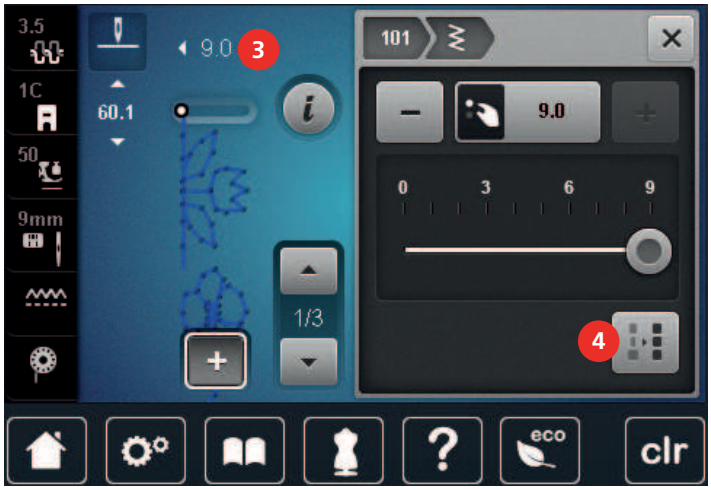
The length and width of the individual stitch patterns in a stitch pattern combination can be adapted to the longest and widest stitch patterns in the combination.

> Create a stitch pattern combination.

> Tap «i-Dialog».

> Tap «Edit Entire Combination».
> Tap «Total Pattern Length» (1).

> Tap «Adjust Length within Combination» (2).
  – The lengths of the stitch patterns are adapted to the length of the longest stitch pattern in the combination
> Tap «Stitch Width» (3).



> Tap «Adjust Width within Combination» (4).
  – The widths of all of the stitch patterns are adapted to the width of the widest stitch pattern in the combination

Furthermore, the length and width of the stitch pattern combination are increased or decreased proportionally.

> To decrease the width of the stitch pattern combination proportionally, turn the «Upper Multi-function knob» anti-clockwise.
> To increase the width of the stitch pattern combination proportionally, turn the «Upper Multi-function knob» clockwise.
> To decrease the length of the stitch pattern combination proportionally, turn the «Lower Multi-function knob» anti-clockwise.
> To increase the length of the stitch pattern combination proportionally, turn the «Lower Multi-function knob» clockwise.

BSR mode 3

BSR mode 3 is stitching mode. In basting mode, you can choose between two stitch lengths:

- SPI 2: Two stitches per inch
- SPI 4: Four stitches per inch

Using the KickSstart function

The KickStart function enables quilting without keeping the foot control pressed.

Prerequisite:

- The BSR Presser Foot is fitted and connected to the machine.
- The BSR display opens and a BSR Mode is active.

> Tap «KickStart».
  – The KickStart display appears. The selected BSR Mode is displayed.
> To start the machine, press the foot control **briefly** with your heel.
  – The machine starts sewing with the selected settings as soon as the fabric is moved.
> To stop the machine, press the foot control briefly with your heel again.
  – The machine will stop, but the KickStart function will remain active.
> To end the KickStart function, tap the screen or press the foot control at the front.
  – The BSR display appears.
  – The KickStart function will be deactivated.
  – The function programmed for the Back-kick will be active.

Please note

- While the KickStart function is active, the function programmed for Back-kick is deactivated. The Back-kick then only serves to start and stop the machine.
- The KickStart function will be ended immediately if the active monitoring function reports an error (e.g. thread breakage or bobbin empty).
- The KickStart function will be ended immediately if the foot control cable is unplugged.
- f there is no sewing in BSR Modes, the machine goes into Stand-by Mode after 7 seconds. Exit the Stand-by Mode by pressing the heel again.
- If no sewing is done for up to 60 seconds, the KickStart function is automatically terminated. The KickStart display disappears.

1.3 Embroidery

Bending the text

Texts can be arranged and designed arc-shaped.

> Create an alphabet embroidery motif.
> Tap «i-Dialog».

> Tap «Bend Text».
> To change the distance between the characters in increments of one millimeter, turn the «Upper multifunction knob».
> Turn the «Lower multifunction knob» to the left or right to curve the writing upwards or downwards.

Changing the sequence within an embroidery motif combination

The sequence of the embroidery motifs in the embroidery motif combination can be changed.

Prerequisite:

- The embroidery motif combination has been created or the motif has been ungrouped.

> Tap «i-Dialog».

> Tap «Change Embroidery Motif Sequence».
> Select the required embroidery motif and move it to the corresponding position.

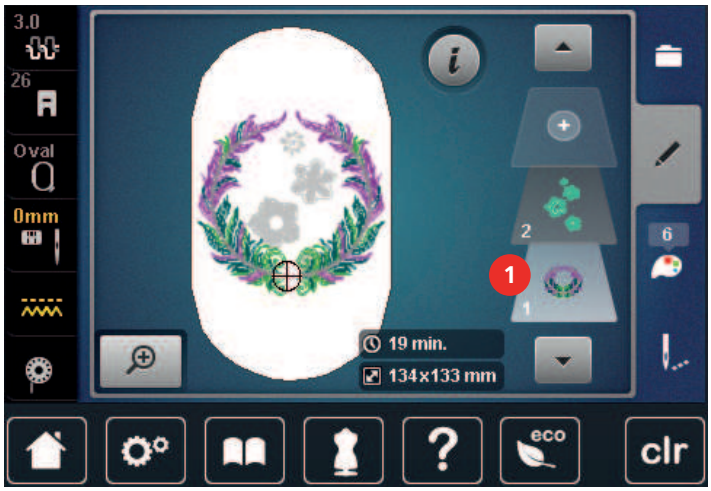
Grouping embroidery motifs

Embroidery motifs can be added to or removed from a group. The grouped embroidery motifs can be processed in the same way as for one embroidery motif.

The sequence of the embroidery motifs in the group can be changed. (see page 6)

If the grouping of a embroidery motif has been canceled, i.e. the embroidery motif has been broken down into different elements/colors, the colors are no longer combined for new groupings. With alphabets, the length of the connecting stitches must first be set to 1 in the setup. The cancellation of the group then works for all letters.

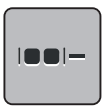
> Create an embroidery motif combination.
> Select the embroidery motif (1) in the embroidery motif combination.



> Tap «i-Dialog».

> Tap «Group Embroidery Motifs».

> Tap «Group».
  – Embroidery motifs above the selected embroidery motif are added to the embroidery motif group.
> Select the embroidery motif group.

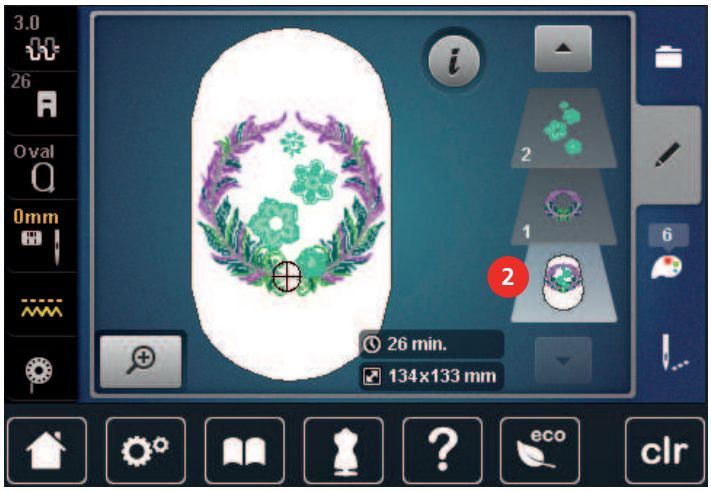


> Tap «Ungroup».
  – The grouping is canceled.

or

> Create an embroidery motif combination.

> Select all embroidery motifs (2).



> Tap «i-Dialog».

> Tap «Group».
  – All embroidery motifs are added to the embroidery motif group.
> Select the embroidery motif group.

> Tap «Ungroup».
  – The grouping is canceled.

Pinpoint placement

Positioning of grid points

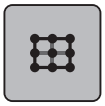
This function allows the exact positioning of the embroidery motif on the fabric in an easy way. The positioning points can be placed in the grid.

Prerequisite:

- Any two points of the embroidery motif are marked with chalk or a water-soluble pen on the fabric. The place or the location where the embroidery motif is to be positioned is clearly visible.

> Select an embroidery motif.
> Tap «i-Dialog».

> Tap «Pinpoint Placement».



> Tap «Grid Point Positioning».
  – The embroidery motif is given a grid with nine different location/positioning points.

> To prevent the size of the embroidery motif from being changed when positioning the points, tap «Scale the Size of Embroidery Motif».
> Select the desired positioning point to which the embroidery motif is to be adjusted.
  – The point changes color.

> Turn the «Upper Multifunctional knob» or the «Lower Multifunctional knob» to the left or to the right to position the needle above the respective mark on the fabric.

> To confirm the changed position, tap «Save Position».
  – The point changes color and is set.
> Select the second positioning point of the embroidery motif.
> Turn the «Upper Multifunctional knob» or the «Lower Multifunctional knob» to the left or to the right to position the needle above the respective mark on the fabric.
> To confirm the changed position, tap «Save Position».
  – The point changes color and is set. The embroidery motif is adjusted accordingly.

> To reset the changes and revert to the default settings, tap «Reset Pinpoint Placement».

Free point positioning

This function allows the exact positioning of the embroidery motif on the fabric in an easy way. The points can be defined as you like within the embroidery motif.

Prerequisite:

- Any two points of the embroidery motif are marked with chalk or a water-soluble pen on the fabric. The place or the location where the embroidery motif is to be positioned is clearly visible.

> Select an embroidery motif.

> Tap «i-Dialog».

> Tap «Pinpoint Placement».

> Tap «Free Point Positioning».

> To prevent the size of the embroidery motif from being changed when positioning the points, tap «Scale the Size of Embroidery Motif».
> Define a desired point within the embroidery motif.
  – The positioning point is displayed.
> Turn the «Upper Multifunctional knob» or the «Lower Multifunctional knob» to the left or to the right to position the needle above the respective mark on the fabric.

> To confirm the changed position, tap «Save Position».
  – The point changes color and is set.
> Select the second positioning point of the embroidery motif.
> Turn the «Upper Multifunctional knob» or the «Lower Multifunctional knob» to the left or to the right to position the needle above the respective mark on the fabric.
> To confirm the changed position, tap «Save Position».
  – The point changes color and is set. The embroidery motif is adjusted accordingly.

> To reset the changes and revert to the default settings, tap «Reset Pinpoint Placement».
