

Program Hazard Analysis

Narrative

Date: 7/7/17

Originator / Champion: Abby Hoeschler
Representing Program Group: Key Log Rolling
Representing Legal Counsel: BSA Office
Representing Risk Management: BSA Office
Representing Health and Safety: BSA Office

Detailed description of program to be evaluated: Log rolling is a sport/activity in which the participants step and balance on top of a floating log in the water. Participants can roll solo or with a partner, either recreationally or competitively, to see who can stay on the longest. Rollers may not touch one another or step on the center line. Log rolling can take place in any depth, though 2-3 feet is recommended.

This is a new modified ___ recognized ___ activity.

Describe or list advantages of the program.

- Can be a non swimmer activity • All Ages • Strong safety record
- Indoors or outdoors • No prior skills needed • Fun exercise, strong core element
- Authentic, North American sport w/educational component

Describe or list disadvantages or problems associated with the program.

- New to most staff
- Access to shallow water for ease of implementation

List the hazards associated with the program activities (complete PHA/OHA).

- Scraped or bruised shins
- ¶ If safe fall zone is not practiced, participants could fall close to a dock or pool edge.

List the impact to resources (additional or change).

- Use of existing program pool or waterfront facility

Identify publications or policies impacted.

- BSA quatics NCAP standard PS-201D
- No Change Necessary

Cost impact of proposed change (include council/district/unit costs):

No change, just cost of equipment

Scheduled impact of proposed change: None

Describe the proposed effective date of change (e.g., When would the change go into effect?): N/A

Urgency of change:

Program risks: Approved: _____ Rejected: _____ Accepted with controls as follows: _____

Signatures/concurrence: _____ Date: _____
