

Screwless Plate Decorative Wiring Accessories

SE home
Bring your house to life

The Screwless Range

The smooth, clean lines of Complete products provide the ultimate finishing touch to a feature packed range of decorative domestic electrical accessories.

Complete has evolved from our well established flat plate accessory range and features all of the same attributes including modular switching but without the visible fixing screws.

Complete provides the installer with a complete all in one solution.

Offering push-fit cover plates in 7 assorted finishes and comprehensive range of electrical inserts, with both compatible cover plate and insert supplied within a single package.

The flexibility of Complete is further enhanced with the range of cover plates and electrical inserts also being available independently of each other.

Switches

Please see page K18 for a selection of Minigrid® modules.

The range of modular switches comprises of both moulded black or white switches as well as metallic finished 'Ingot' switches, which features a simple single screw fixing to the insert.

The modular Minigrid® format is fitted as standard and is enhanced by the availability of multi-functional and fully interchangeable modules which also includes 'Ingot' finishes through the range.

The unfurnished single and double plates offer the installer unprecedented flexibility in creating customised wiring solutions.

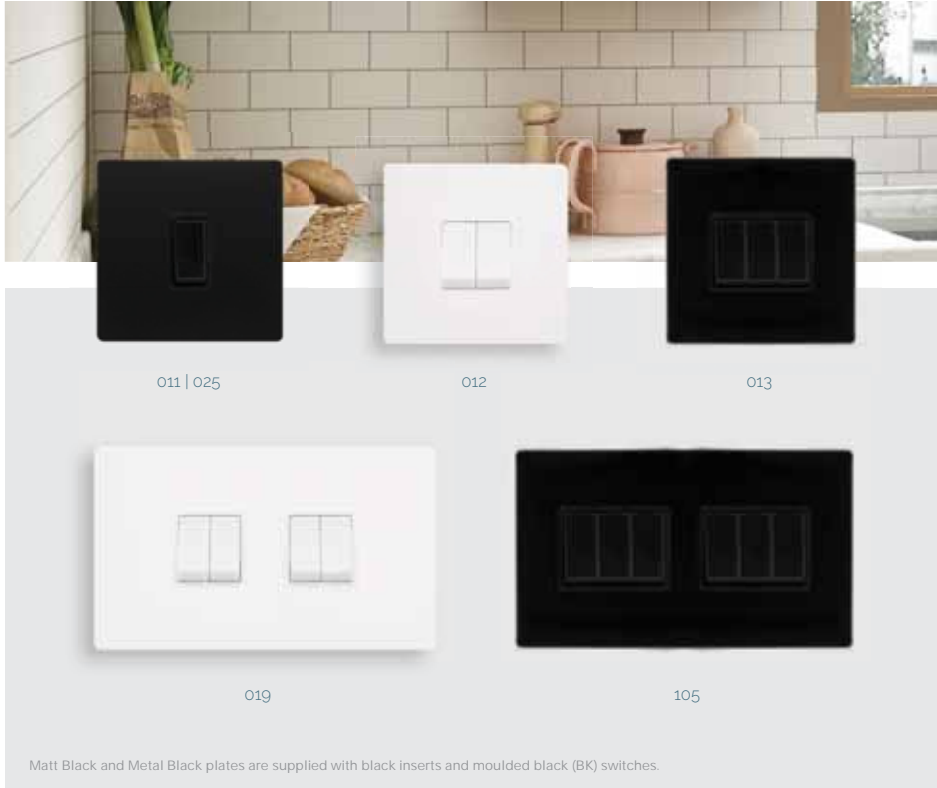

The rotary dimmer switches are interchangeable with the use of our M10 nut runner tool. There are a host of alternative dimmer modules and plates available, see page K37.

Traditional toggle switches are also listed with an intermediate single switch plate option. The 2 way toggle switch is interchangeable with the intermediate toggle module.

Simple, single screw or snap fit installation of the modules on the mounting plates has encouraged contractors to devise and install customised switching solutions on-site.

Matt Black and Metal Black plates are supplied with black inserts and moulded black (BK) switches.
