

TO/GO

Events

Environmentally Friendly

About Us

TO/GO Infrastructures Inc. specializes in the conception and development of modular structures designed and built for all kinds of events. We pride ourselves on developing tangible products based on thorough research & development, all within our head office facilities. With an eye for the environment, all of our products, systems and processes look to use sustainable alternatives and provide our clients with solutions built to last.

Clip'n'Go

Better

Clip'n'Go platforms measure up favorably to the better known standard of the industry. Its unique extrusion profile ensures extreme rigidity and precise dimensions. Use of the right materials guarantees the decks will survive the rigors of frequent transportation in touring and maintain a finish that's safe and looks good for every performance. Platforms are also the easiest decks to assemble.

Lighter

Clip'n'Go platforms are the lightest professional decks on the market.

Faster

Clip'n'Go platforms are faster to deploy because only the first row needs a full set of legs and because they simply drop in place and do not need to be otherwise locked. Half the legs and no time spent to lock the units together means setup time is easily cut in half.

Union Clips (pack of 50)
SKU: 842315020287

Variable Height Rolling Riser

From 10" to 60" in height, this solution brings you the efficacy and the flexibility with a lower investment as the wheel is detachable. Choose your standard aluminum leg and connect it to the wheel to reach any height. Remember, with our Clip'n'Go Patent Technology you save time and money. The amount of legs or wheels needed is reduced by at least 30% and up to 60% in most of the cases.

Wheel bracket:
fits any length of 2" pipe
SKU: 842315020256

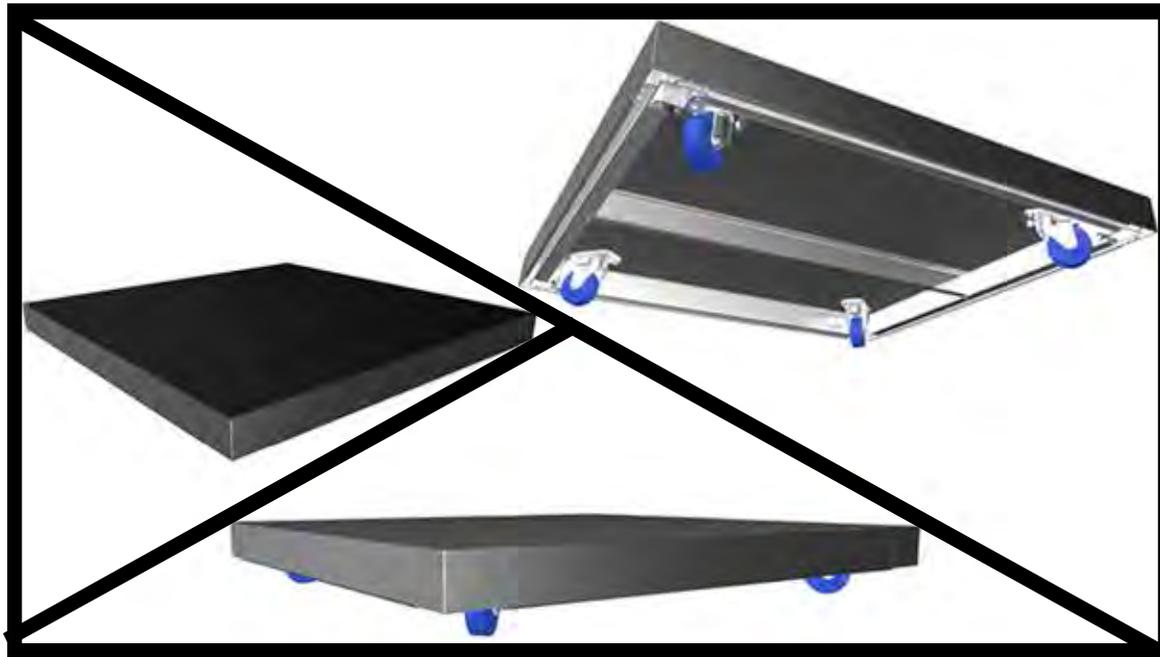

Locking wheel bracket
SKU: 842315020294

Low Rider Wheel Modules

Our low riser mount brings your rolling decks of any size from 2'X2' up to 100'X100' to the lowest level ride at 6" from the ground. Ideal to carry your amp racks and drum sets. Low rider allows you to stay more stable. Remember, with our Clip'n'Go Patent Technology you save time and money. The amount of legs or wheels needed is reduced by at least 30% and up to 60% in most of the cases.

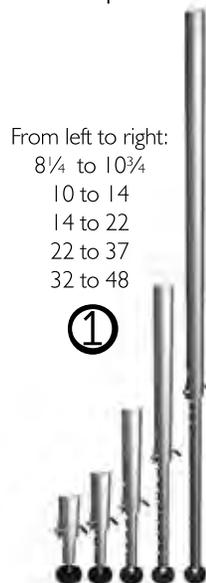

Adjustable Legs

① Telescopic Legs:

The adjustable leg system is designed to save you space and time. Ideal for indoor and outdoor applications. We also provide compatible bracing to suit every setup, even custom ones. And remember; with our Clip'n'Go Patent Technology you save time and money. The amount of legs or wheels needed is reduced by at least 30% and up to 60% in most of the cases. This is the ultimate leg!

② Leveling Low Mount:

Cheap and efficient, this is the ultimate tool for many flooring applications. The leveling mount prevents you from having to shim with damage. Finally a reliable pre-engineered solution that works! The amount of legs or wheels needed is reduced by at least 30% and up to 60% in most of the cases.

Legs and Levelling

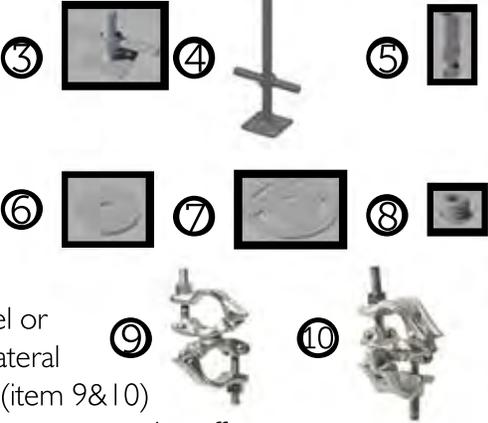

The right part for the good application. This series of fixed legs combines flexibility and efficiency and is cost effective. Having a broad range of fixed legs allows rental houses or operating venues to use the exact piece they need. The fixed legs can be used for various application such as:

- Rolling riser with our wheels (see page 35)
- Fixed height decks along with the plastic cap (item 8)
- leveling jack Item (item 3 or 4)(for extreme outdoor conditions)

Our standard fixed legs are made with premium 6061-T6 aluminum SH-40 1.900" size tubes. They fit with most entertainment clamps around the globe. You will find additional applications for our sets of fixed legs. We offer this useful extrusion (item 2) for your custom needs, higher legs and bracing purposes.

We also offer heavy duty cheeseboroughs in steel or aluminum, in order to accomplish proper lateral bracing for your higher constructions (item 9&10)

For those who will do low rider setups we also offer steel leveling legs with load spreading plates, (item 5 to 7)

Show Business Series

The TO/GO SB (Show Business) Deck series combines 4 key elements:

1. Versatility:

- The SB series allows for any configuration: rolling risers, low mount, high decks, mezzanines, loading ramps, custom sets... Name it! We provide you with all the accessories you need: ramps, stairs, range of railings, range of adjustable legs... There is nothing that can't be done!
 - We offer a broad range of square, triangle, pie shape and round modules!
- WE ALSO DO CUSTOM SHAPES, SQUARE, ROUND ASK FOR IT ... YOU WILL GET IT!

2. Durability:

- Our premium aluminum will not rust.
- It is also lightweight, which reduces the chance of dropping a deck because it's too heavy. We care about workers and this is why our system is lightweight.
- Our deck system uses a minimal amount of welds, which increases the durability of the product.

3. Strength & Safety:

- The grip floor prevents technicians from slipping while working, especially under the rain.
- The low weight on our system allows your teams to protect their back and work safer!
- Our system uses a minimal amount of welds, which can become weaker over time.
- Our system respects the building code of most countries and cities. Our capacity ranges from 100lbs per square feet to 300lbs per square feet.

4. Cost Effective:

- Grip floor avoids the need to paint it if it's too dirty, just wash it.
- The low weight on our system allows you to reduce the amount of technicians to carry and install the decking.
- Our deck thickness is minimal compared to many others which increases the amount of decks you can transport.
- Our system uses a minimal amount of welds which does not require expensive weld inspections as other systems may need as per code.

Outdoor Living Series

The TO/GO OL (Outdoor Living Style) Deck series combines 6 key elements:

1. Style & Comfort:

- The OL series will allow you to MEET THE DISTINCTION YOU AND YOUR CUSTOMERS DESERVE!
- Can be used as one of the main ambience or decor elements of your setup.
- It dries fast after rain - No odor after rain - Gorgeous, rich and warm look!

2. Environmentally Friendly Product:

- Ecological FSC wood or recycled wood are used in the prefabricated OL series.
- Maintenance is done with an ecological deck oil with low VOC.

3. Versatility

- We provide you with all the accessories you need: ramps, stairs, range of clear or wood railings, range of adjustable legs. There's nothing that can't be done! You can also create walls for booths or privacy.
- With the SB series you can do any configuration: rolling risers, low mount, high decks, mezzanines, loading ramps, custom sets... Name it!
- We offer a broad range of square, triangle, pie shape and round modules! WE ALSO DO CUSTOM SHAPES: SQUARE, ROUND ASK FOR IT ... YOU WILL GET IT!

4. Durability:

- Our premium aluminum will not rust.
- It is also lightweight, which reduces the chance of dropping a deck because it's too heavy. We care about workers and this is why our system is lightweight.
- Our deck system uses a minimal amount of welds, which increases the durability of the product.

5. Strength & Safety:

- The low weight on our system allows your teams to protect their back and work safer!
- Our system uses a minimal amount of welds, which can become weaker over time.
- Our system respects the building code of most countries and cities.
- Our capacity ranges from 100lbs per square feet to 300lbs per square feet.
- We offer fire retardant wood species if required (CUMARU) .

6. Cost Effective:

- Our deck thickness is minimal compared to many others which increases the amount of decks you can transport.
- The low weight of our system allows you to reduce the amount technicians to carry and install the decking
- ONE AND DONE! Do your structure and YOUR TOP FINISH IN ONE OPERATION! No need to do a structure and then have another crew to do the finishing. SAVE TIME AND MONEY!
- No need for a large maintenance crew to dry out the deck during events.
- Our system utilizes a minimal amount of welds which does not require expensive weld inspections as other systems may need as per code.

Decking Tiles

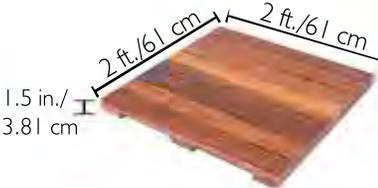

Our wood tile series is the perfect floor surface for many applications:

Choose an environmentally friendly product:

- Ecological: FSC wood or recycled wood is used in the prefabricated products
- Maintenance is done with ecological deck oil with a low VOC
- The carpet will go to the garbage while our decking will go to the next event

MOREOVER our wood deck is:

- Non slippery even when wet
- Dries fast after the rain
- No odor after the rain
- Gorgeous, rich and warm look!
- Can be used to create skirting and walls

Easy to customize!

Our Recycled Wood Source

Lake Bayano was created (1976) to supply water power to a hydroelectric plant; during the process, a 353 km² jungle of hardwoods was flooded. TO/GO now has an exclusivity agreement with CET who is now working with the Kuna from the 14 Comarcas around the lake in a historical eco joint venture. Using submersible hydraulic chainsaws lubricated with biodegradable vegetable oil, the Comarcas and CET are harvesting these beautiful species together. The company is built on a commitment to sustainable forestry and we aspire to be one of the world's leading suppliers of high quality reclaimed and ethically harvested exotic hardwoods.

BAYANO LAKE IS 80 TO 100 FEET DEEP AND THESE GIANTS ARE SLEEPING, PROTECTED FROM BUGS AND SUN. IS OUR WOOD WATERPROOF? WELL, IT'S PRESERVED IN FRESH WATER!

Our Recycled Wood Source

- Wood from underwater trees dries faster
- It has better acoustic properties
- It's the most ecological type of harvesting on the planet
- The trees have been preserved by the fresh water
- It's the same quality as jungle wood, but the colour is even richer
- It's tougher, because it has been immersed in water for 40+ years
- It's the most environmentally-sound logging on the planet
- Trees harvested are old growth
- Harvesting does not disrupt the jungle, monkeys etc.
- This activity removes methane from water
- FSC certified
- No soil disruption
- Most ecological logging in the world
