

## **Forearm Crutch Order Form**

(Print this page to fax or mail your order)

Getting the correct measurements to order custom made crutches is easier than you might think. Your most important assignment is to carefully read and understand the measuring instructions and fill in all the information requested. Let's start with the simple stuff.

**Mobility: Walking Gait** \_\_\_ **Swing Through Gait** \_\_\_

Activity level: Check one of the following that fits you best.

\_\_\_ **Gorilla:** You are big, strong and athletic. You regularly go hunting, fishing, hiking, climbing, go up two stairs at a time, etc. and it seems like you break your crutches all the time.

\_\_\_ **Draft Horse:** You regularly go out everyday to work or for walks, go food shopping, do house chores, go to movies and travel.

\_\_\_ **Pussy Cat:** While you may have once been an adept and agile hunter in the wild, you now spend most of your time lounging around your home sitting in the sun reading a good book.

## FOREARM CRUTCH MEASURING

Crutch Style: **Regular** \_\_\_\_ **Lo-Bend** \_\_\_\_

Basically you should stay with the style crutch you are used to. The regular style is by far the most common. It has a 17° bend **above** the handgrip. The Lo-Bend style has a 21° bend **below** the handgrip and is useful to those people who lean far forward when walking.

Lo-Bends will bring the crutch tips closer to their feet making them walk taller without compromising their balance. If in doubt, try our **Demo Program**.
