

RING SIZING TOOLS

FIXATE
DESIGNS

IMPORTANT - For accuracy, please make sure that you are printing this page at 100% size. The chart will not be accurate if it's "shrunk to fit" the paper. For accuracy, place a nickel over the picture to the right. The coin should not cover the green border. If any of the nickel graphic is showing, or the green border is covered, you will need to manually resize the page using the printer settings until you achieve the proper size.

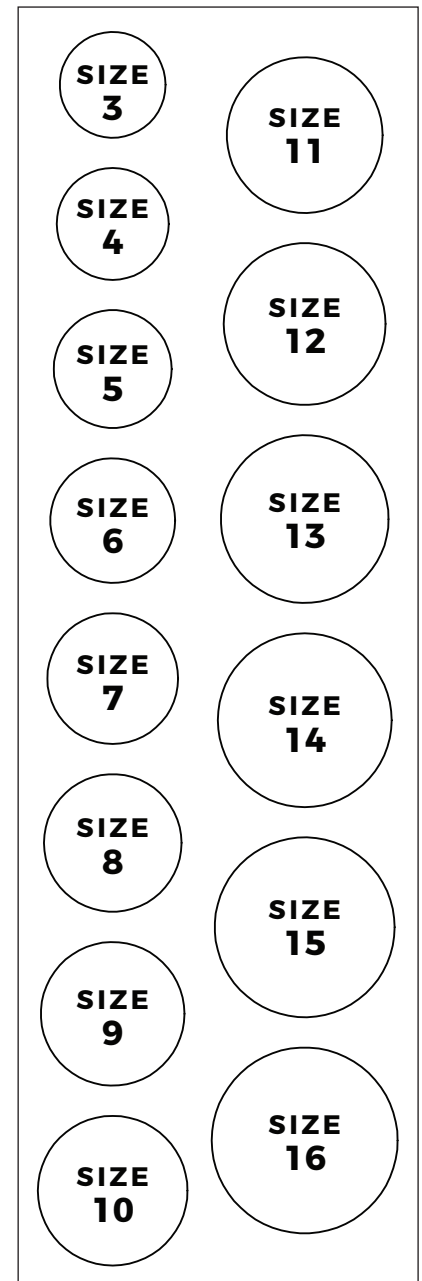

SIZING TIPS

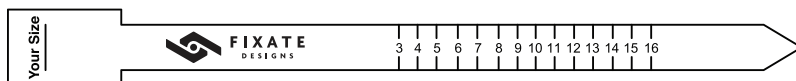

We have several methods to find your ring size. If you find that you are in between two sizes, we recommend going up in size for more comfort.

1. CIRCLE MATCHING METHOD - If you already have a ring that fits comfortably, use the circle chart to the right to find the size of your current ring. Place your ring on top of the size circle that allows the outer black outline to be barely visible from the inside of your ring. **DO NOT** use the outside circumference of your ring. The size circle that corresponds best to your current ring size is your size.

SIZE	CIRCUMFERENCE		INSIDE DIAMETER	
	Inches	Millimeters	Inches	Millimeters
Size 3	1.73	44.0	0.55	14.0
Size 4	1.82	46.5	0.58	14.8
Size 5	1.92	49.0	0.61	15.6
Size 6	2.04	51.8	0.65	16.5
Size 7	2.14	54.4	0.68	17.3
Size 8	2.26	57.2	0.72	18.2
Size 9	2.36	59.7	0.75	19.0
Size 10	2.44	62.1	0.78	19.8
Size 11	2.54	64.6	0.81	20.6
Size 12	2.64	67.2	0.84	21.4
Size 13	2.74	69.7	0.87	22.2
Size 14	2.85	72.3	0.91	23.0
Size 15	2.95	74.8	0.94	23.8
Size 16	3.05	77.4	0.97	24.6

2. PAPER TOOL - Use the paper tool below to wrap around your finger. You will need to carefully cut out the tool and create a slit by making a small cut on the line identified as "Your Size". Once the tool is cut out, place the pointed end through the slit and then slip over your finger. You will want to pull it snug, but not overly tight. Identify the number next to the "Your Size" slit, and write it down on a piece of paper. We also recommend that you double check the measurement for accuracy.

3. STRING METHOD - Using a small piece of string, wrap it snugly around the finger for accurate measurement of circumference. Then use a tape measure or ruler to determine that circumference length. Be careful that the string is not too tight, otherwise the ring won't fit properly. The goal is for it to be snug without digging into the skin. For better accuracy, ask a friend to help and then double check the measurement.
