DATE: NOVEMBER 6, 2017

SUBJECT: BODYGUARD MONITORING VOLTAGE CONVERSION FOR AC DOOR CONTROLS

Description

BEA's Bodyguard-T is a monitored sensor without the capability to turn off monitoring. To turn off monitoring, a DC voltage must be applied to the monitoring input.

If the door control outputs AC voltage, the Rectifier Module (20.5411) must be used to install the Bodyguard-T sensor.

Solution

To use the Rectifier Module, follow the wiring diagram below.
