IRB-4X2

THRU BEAM PHOTOEYE

Building on the success of the original IRB-4X, the **IRB-4X2** takes a step further by offering advanced features in a smaller and more convenient package.

The IRB-4X2 photoeye is used as a safety, reversing, or opening device in conjunction with automatic operators. The IRB-4X2 will work with any control board that accepts dry contact on the input. The easy to install IRB-4X2 is used with garage doors, rolling doors, parking barriers and other equipment. *Not for use in applications requiring UL325 compliance.

Integrated Sensor Hood

The integrated sensor hood shields the device from the elements, ensuring reliable performance in all conditions.

Removable Terminal Block

The **IRB-4X2** boasts a removable terminal block for easy wiring.

1/2 in. NPT Conduit Hole

115 ft. operating range

Potentiometer range adjustment for precise tuning to site

Thru beam design is not affected by shiny surfaces

Wide 24° transmission angle allows easier alignment and increases reliability
