

3D Avocado

Instructions

1. Use the big square pegboard for your project. For the original project, we use the mini beads C series. If you love midi, you can select midi S series. Now, place all the beads for the design.
2. Cover the completed design with the ironing paper or ironing film. Keeping the iron level, gently iron the beads in a circular motion for about seconds to fuse the beads evenly.
3. Peel off the ironing paper and lift your design from the pegboard. Flip the design over and repeat step #2. Your pegboard and ironing paper / ironing film are reusable.
4. Put the project under the book or something heavy after you iron it. Once the design is cool, then stick them together.

3D Avocado

Beads Colors:

-  Dark Avocado: C150 / S151
-  Dark Olive: C117 / S118
-  Light Brown: C31 / S17
-  Light Olive: C85 / S80
