

Christmas Cupmat ○○○-ARTKAL-○○○

Page 1

Instructions

1. Use the big circel pegboard for your project. For the original project, we use the midi beads S series. If you love mini, you can select mini C series. Now, place all the beads for the design.
2. Cover the completed design with the ironing paper or ironing film. Keeping the iron level, gently iron the beads in a circular motion for about seconds to fuse the beads evenly.
3. Peel off the ironing paper and lift your design from the pegboard. Flip the design over and repeat step #2. Your pegboard and ironing paper / ironing film are reusable.
4. Once the design is cool, your design is finished.

WARNING: The ironing must be done by an adult only. Some irons may emit steam. Please keep children at a safe distance.
