

Red Mushrooms

Instructions

1. Use the big square pegboard for your project. For the original project, we use the midi beads S series. If you want to use mini beads, you can select the C series or A series. Now, place all the beads for the design.
2. Cover the completed design with the ironing paper or ironing film. Keeping the iron level, gently iron the beads in a circular motion for about seconds to fuse the beads evenly.
3. Peel off the ironing paper and lift your design from the pegboard. Flip the design over and repeat step #2. Your pegboard and ironing paper / ironing film are reusable.
4. Once the design is cool, then use the glue to stick them together.
