Instructions

1. Use the big square pegboard for your project. For the original project, we use the mini beads C series. If you love midi, you can select mini S series. Now, place all the beads for the design.

2. Cover the completed design with the ironing paper or ironing film. Keeping the iron level, gently iron the beads in a circular motion for about seconds to fuse the beads evenly.

3. Peel off the ironing paper and lift your design from the pegboard. Your pegboard and ironing paper / ironing film are reusable.

4. When the design is hot, roll it up and knead it into the shapes that we need. And use the glue to stick them together.

Hairpin

Beads Colors:

White: C01

Sienna: C24

WARNING: The ironing must be done by an adult only. Some irons may emit steam. Please keep children at a safe distance.
