

ARTKAL®

Artkal Pattern

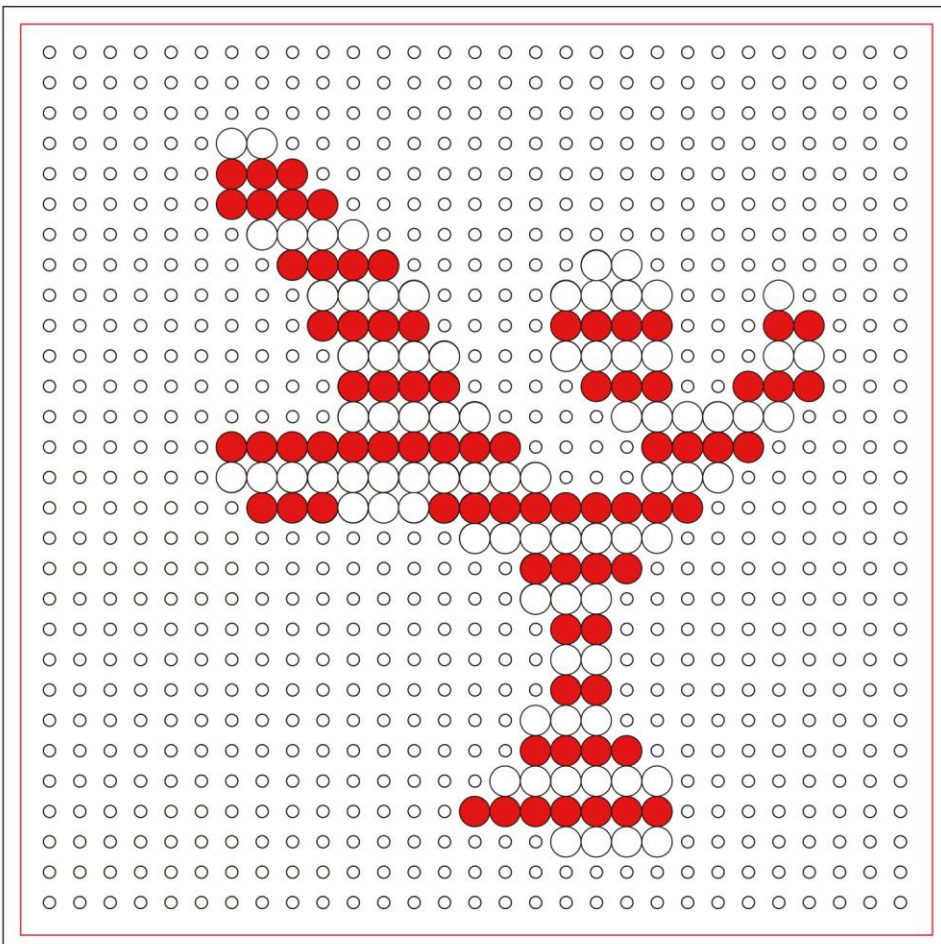

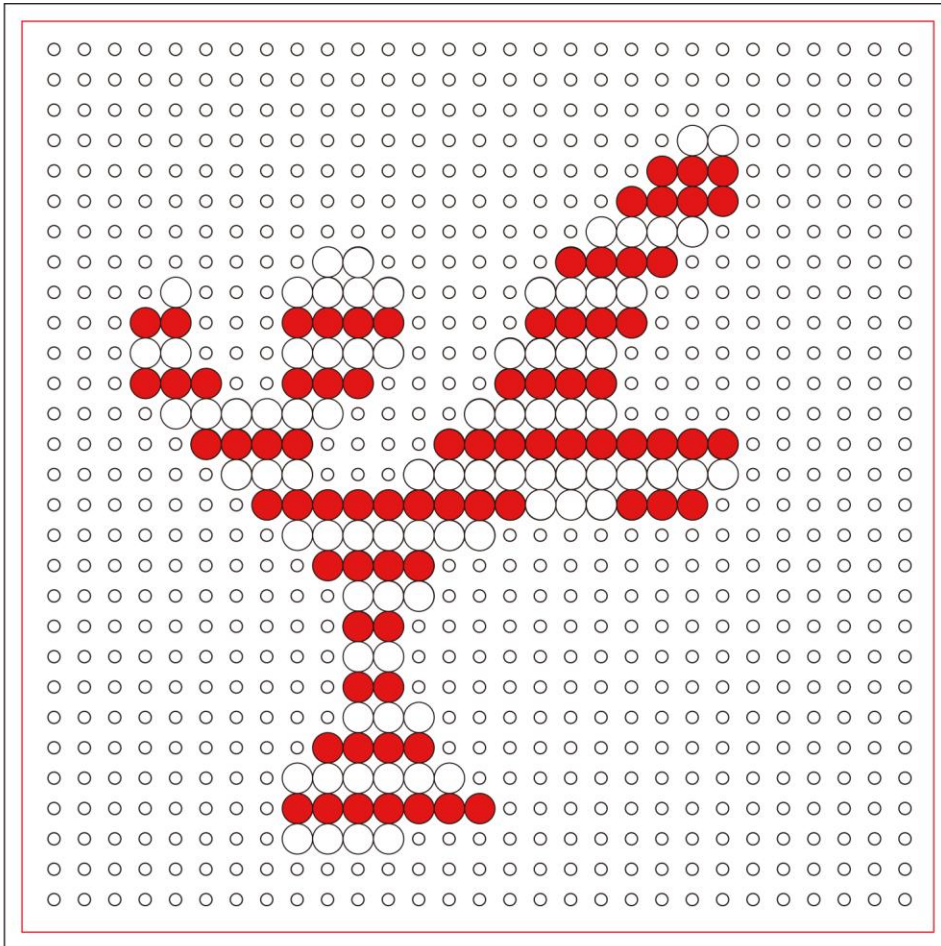

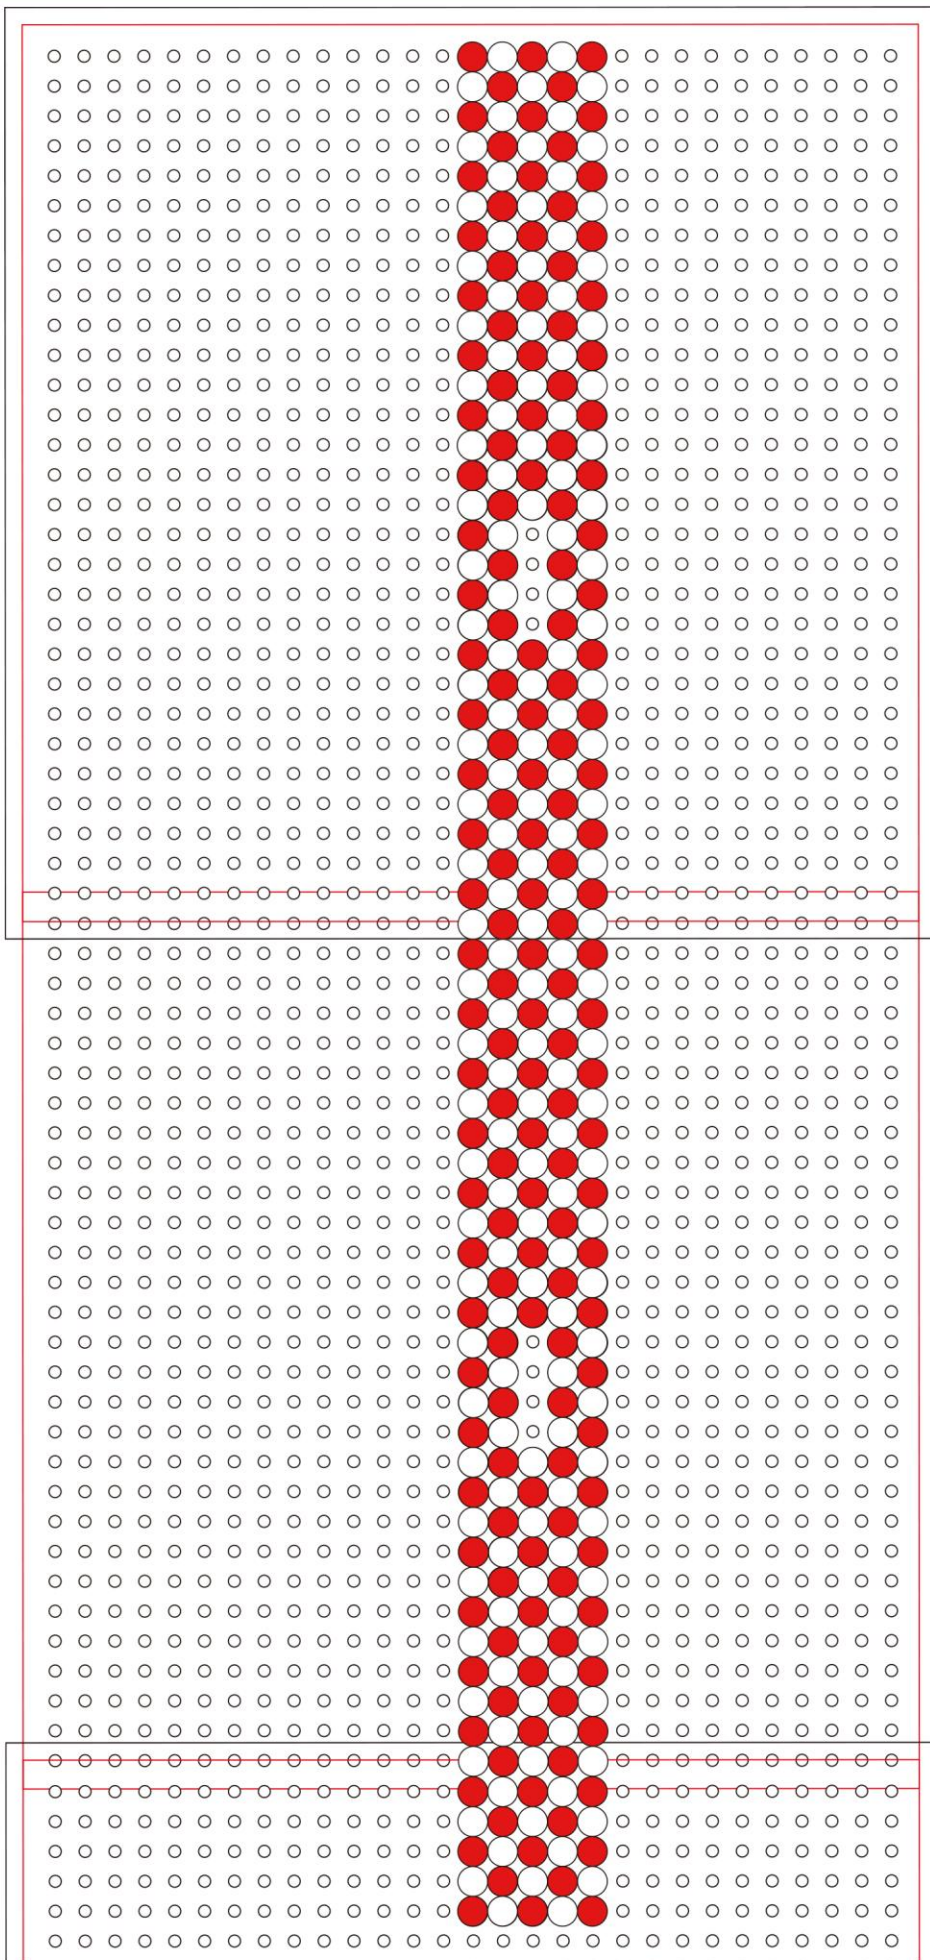

The pattern is drawn by @artkalbeads

Instruction

1. Use the big square pegboard for your project. For the original project, we use the midi beads S series. If you love midi, you can select mini C series. Now, place all the beads for the design.
2. Cover the completed design with the ironing paper or ironing film. Keeping the iron level, gently iron the beads in a circular motion for about seconds to fuse the beads evenly.
3. Peel off the ironing paper and lift your design from the pegboard. Flip the design over and repeat step #2. Your pegboard and ironing paper / ironing film are reusable.
4. Bend the rectangular work while they are still hot. Put the Horns under the book or something heavy after you iron it. Once the design is cool, then hold them together with accessories.

○ S01

● S34

Warning: you may need three pegboards
