

ARTKAL®

Artkal Pattern

The pattern is drawn by [@creative.with.perlerbeads](#)

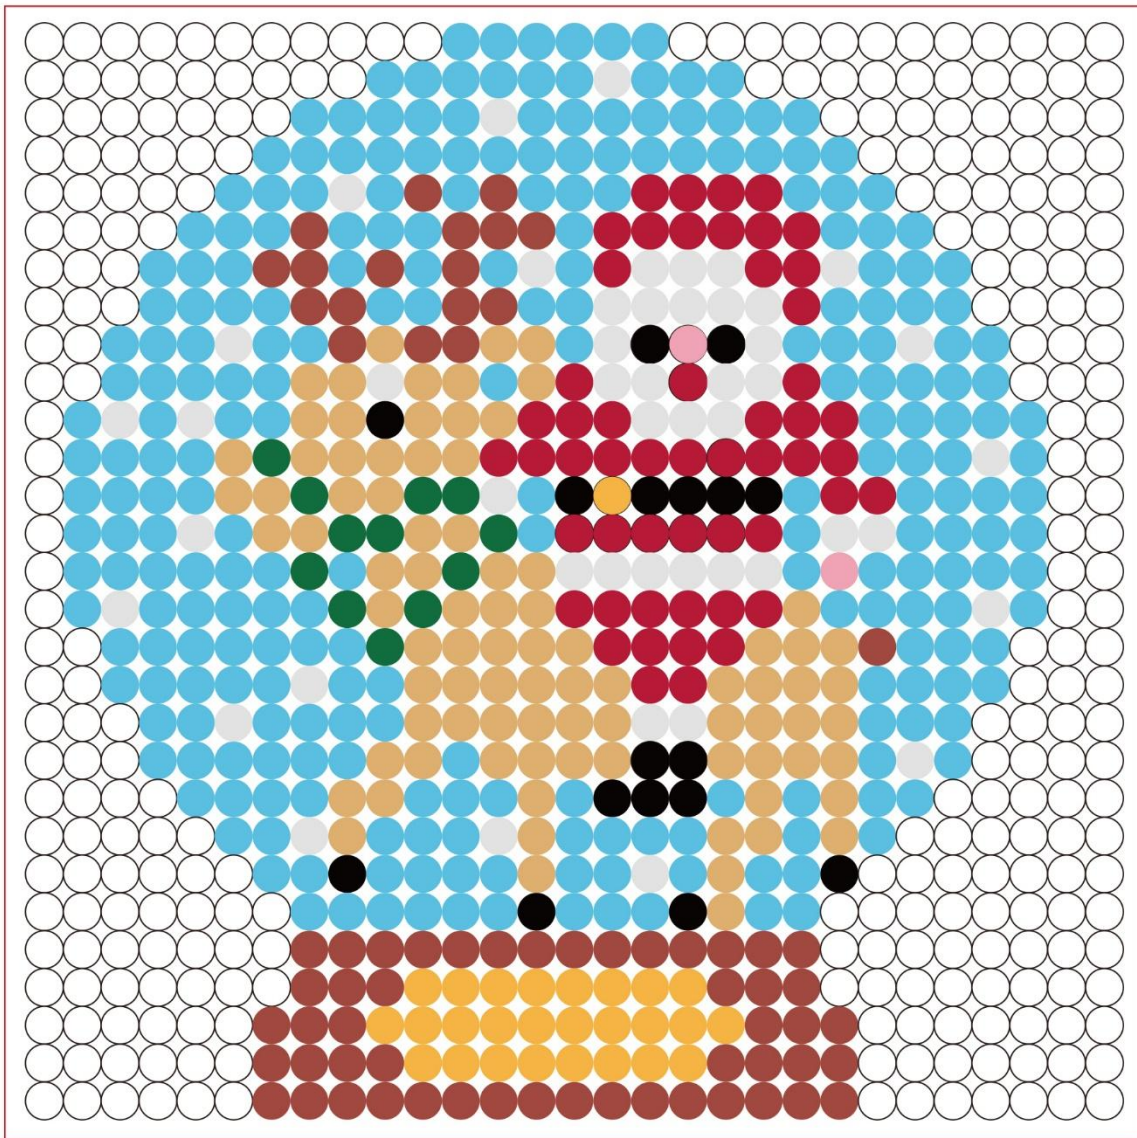

Instruction

1. Use the 4 big square pegboards for your project. For the original project, we use the midi beads S series. If you love mini, you can select midi C series. Now, place all the beads for the design.

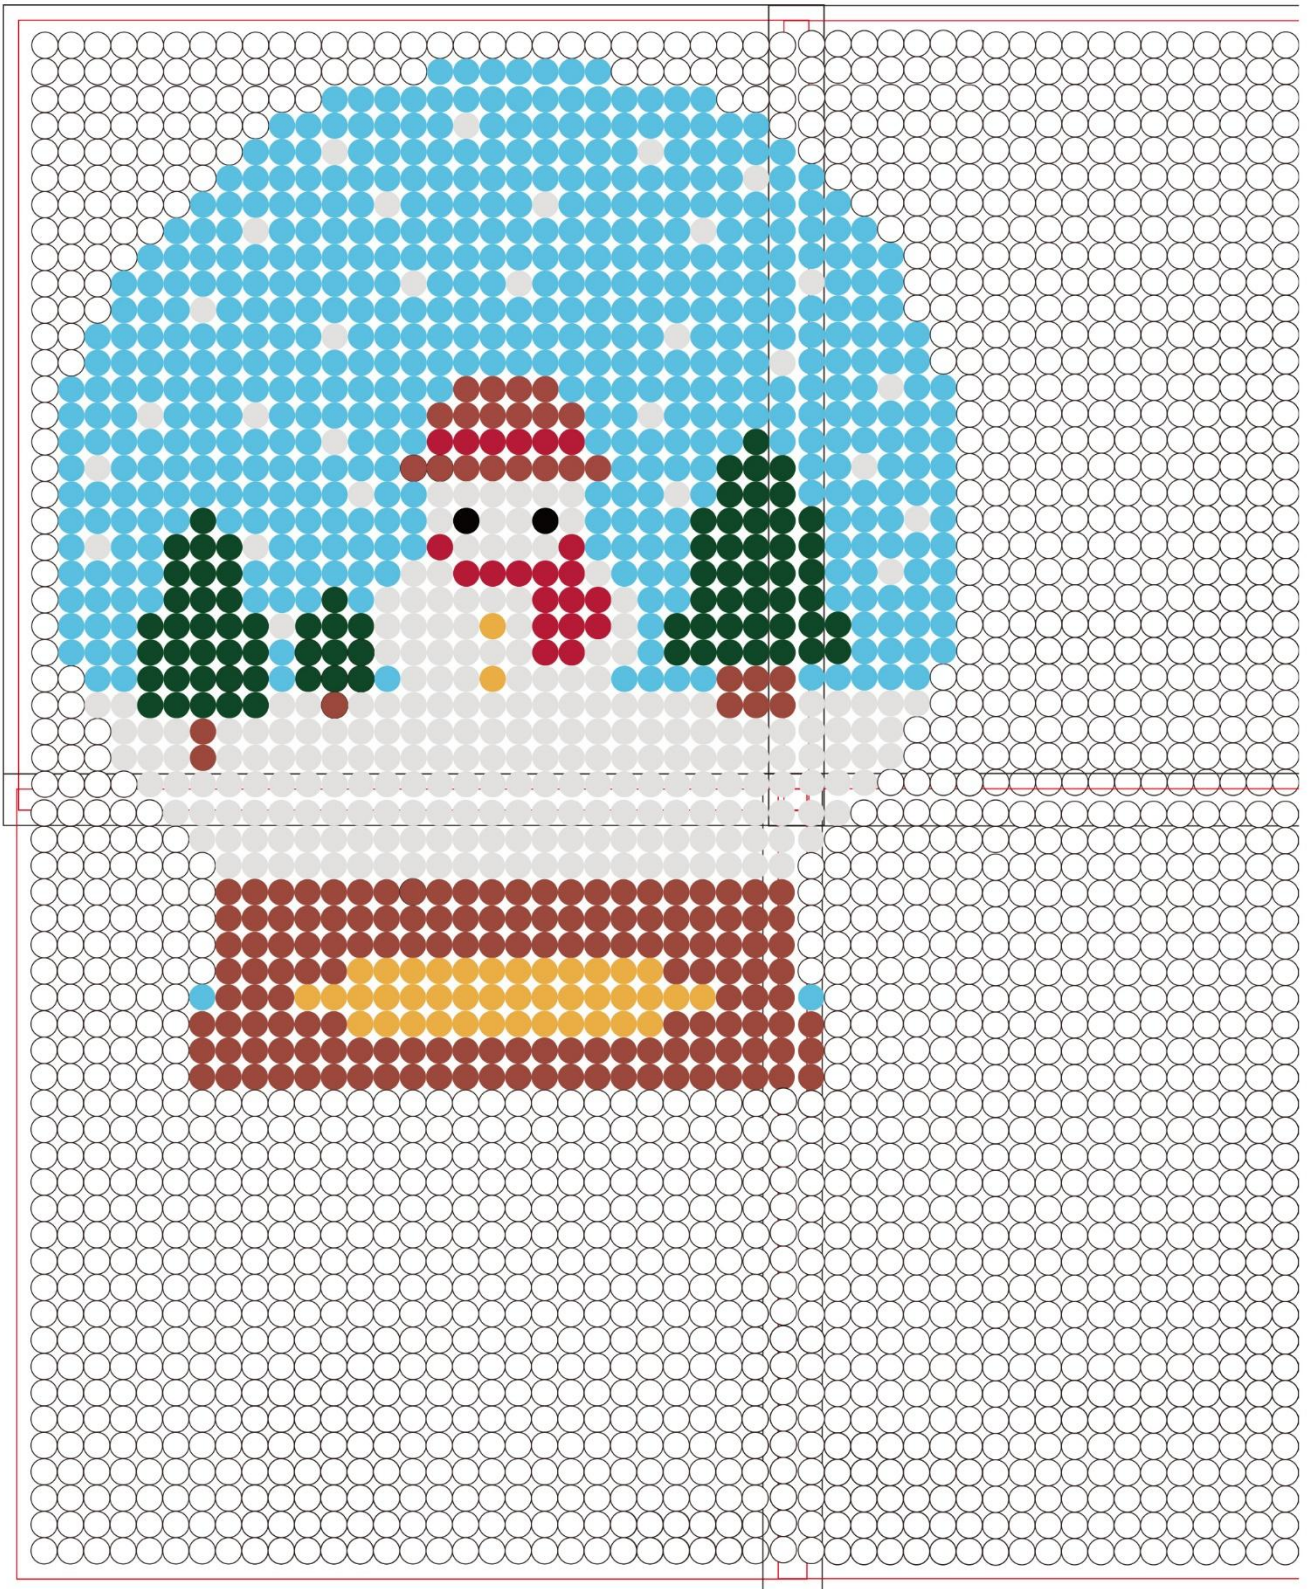

2. Cover the completed design with the ironing paper or ironing film. Keeping the iron level, gently iron the beads in a circular motion for about seconds to fuse the beads evenly.

3. Peel off the ironing paper and lift your design from the pegboard. Flip the design over and repeat step #2. Your pegboard and ironing paper / ironing film are reusable.

4. Put the project under the book or something heavy after you iron it. Once the design is cool, it finishes.
