

Anthurium

Instructions

1. Use the big square pegboard for your project. For the original project, we use the mini beads C series. If you love midi, you can select mini S series. Now, place all the beads for the design.
2. Cover the completed design with the ironing paper or ironing film. Keeping the iron level, gently iron the beads in a circular motion for about seconds to fuse the beads evenly.
3. Peel off the ironing paper and lift your design from the pegboard. Your pegboard and ironing paper / ironing film are reusable.
4. When the design is hot, roll it up and knead it into the shapes that we need. And we should use the glue to stick two same stalks together.

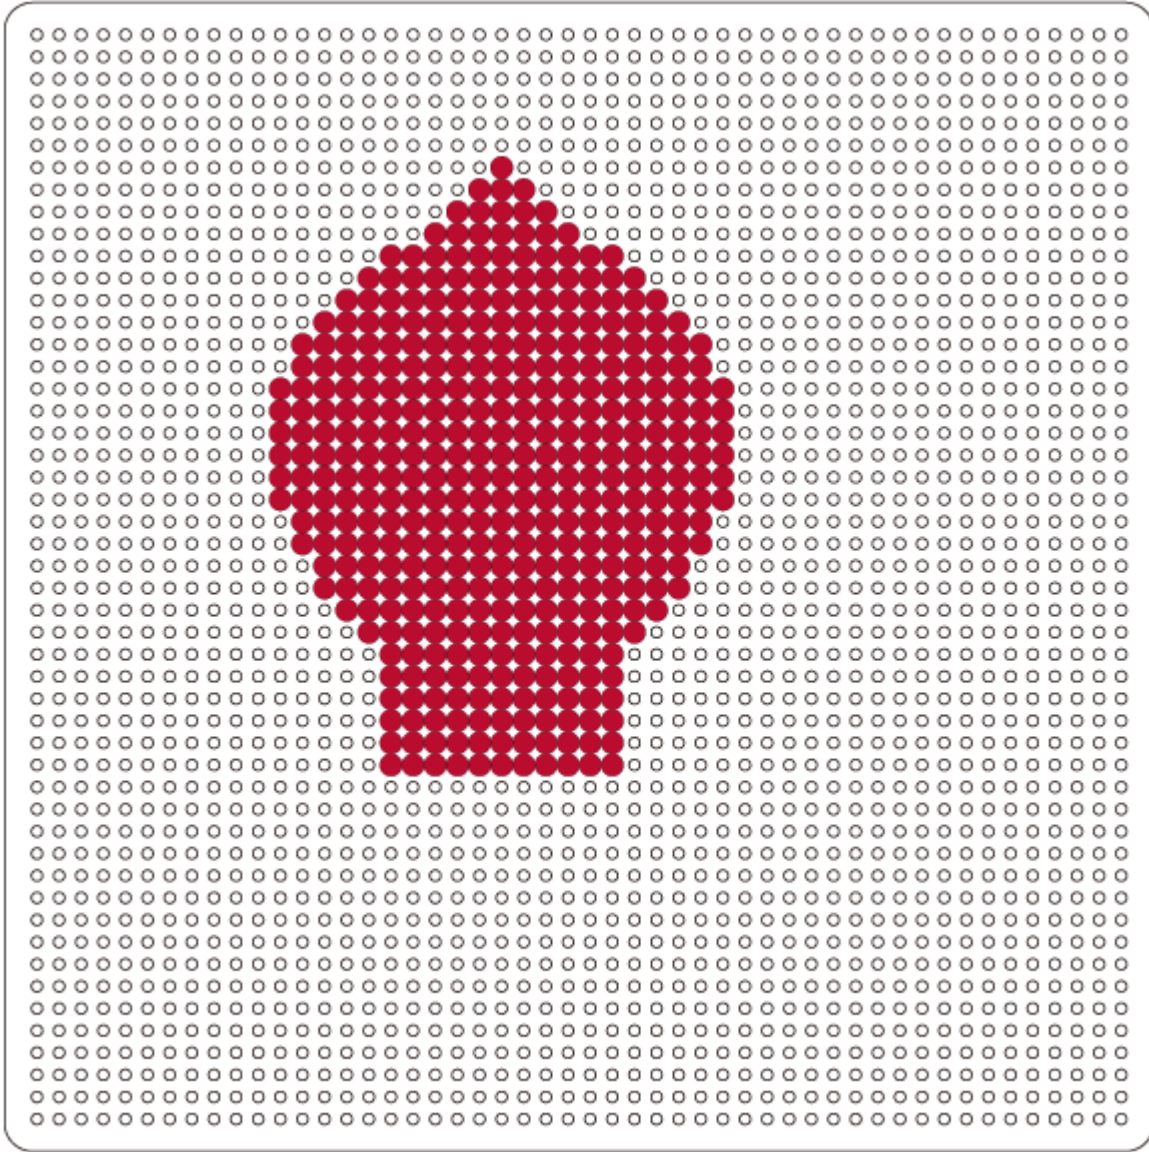

Anthurium

Beads Colors:

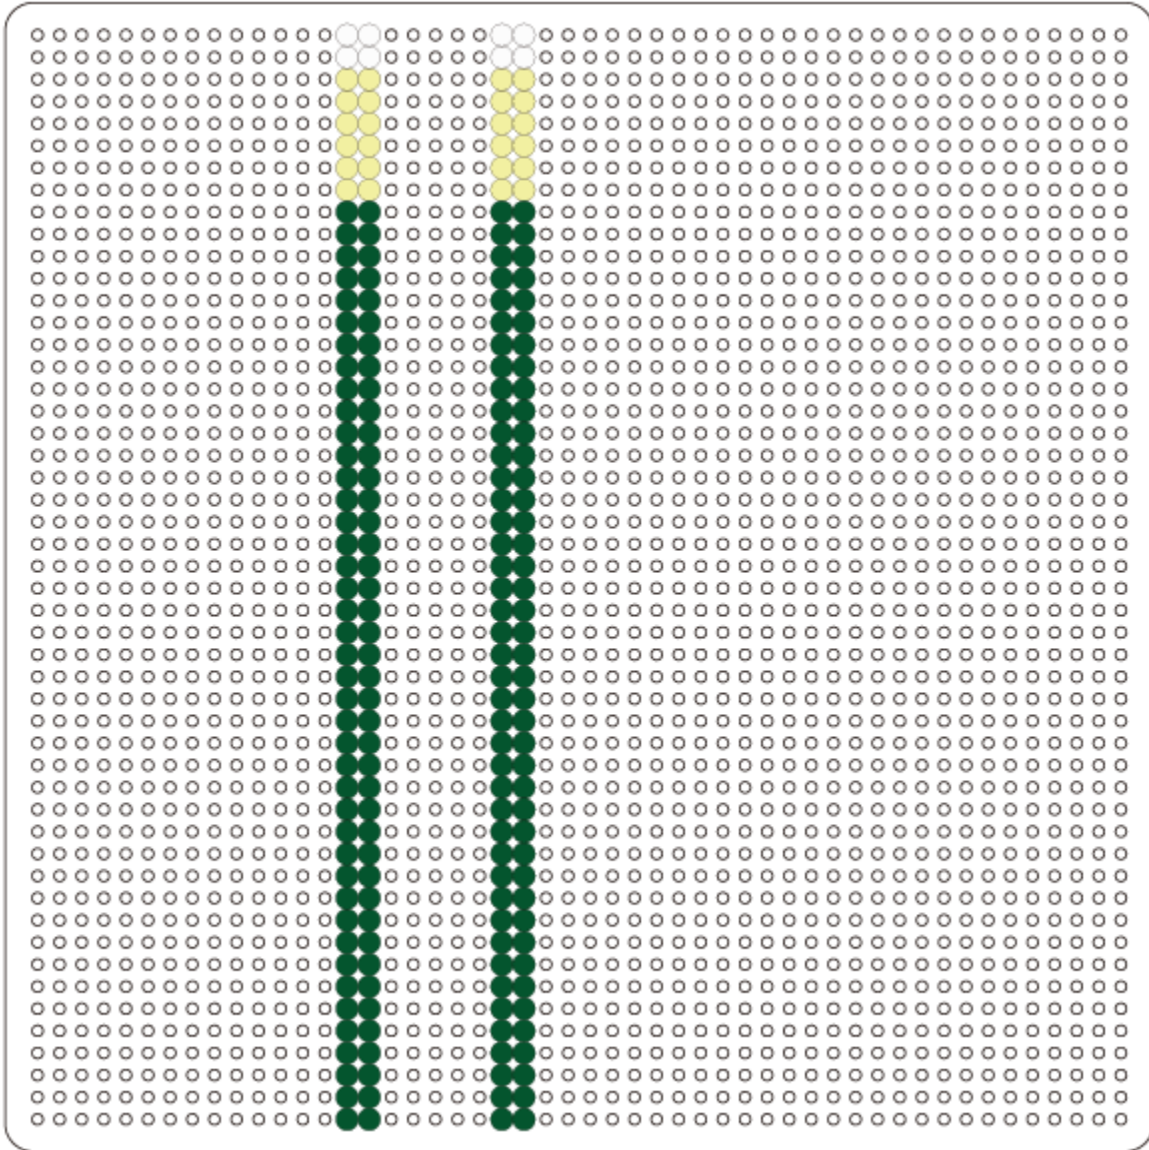

-  Red Wine: S85 / C78
-  Sienna: S83 / C73
-  Jade Green: S71 / C86
-  Corn: S48 / C48

Anthurium

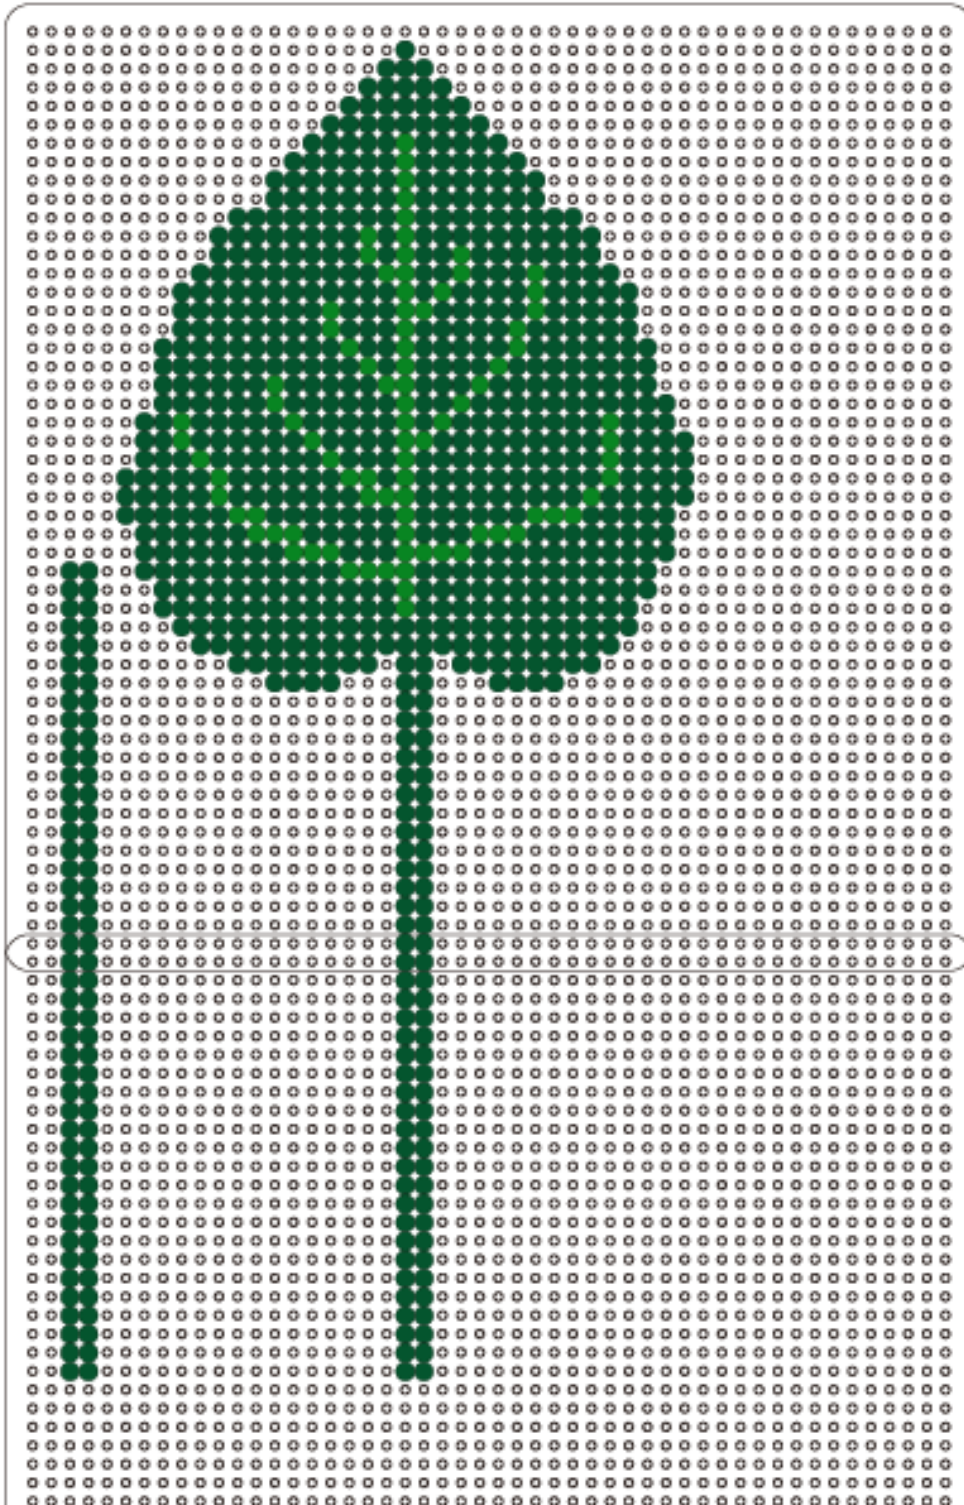

Make 5 flowers or more. You can change the quantity by yourself.

Anthurium

The length of the Picasso and Green area can be adjusted by yourself.

Anthurium

The size of the leaves and the length of the stalk can be adjusted by yourself.

WARNING: The ironing must be done by an adult only. Some irons may emit steam. Please keep children at a safe distance.
