

FAQ (ADHESIVE REMOVERS/SOLVENTS)

Q. How Do Adhesive Removers Work?

A. Removers are also called solvents since they dissolve adhesives down to Liquids. This weakens the hair system's bond to the scalp for an easy removal. Plus it also softens the residue buildup, making it much easier to clean off

Q. Which remover is the fastest at breaking down adhesive?

A. Oil-based removers are the fastest at breaking down adhesives. There are many different oil based removers to work with all hair systems and all adhesive and tape types

Q. I have very sensitive skin, which remover would you recommend?

A. Walker Signature Remover is our fastest sensitive- skin solvent

Q. I have a full lace hair system, which remover or solvent should I use?

A. You can use Lace Release or C-22 Remover

Q, What other Adhesive Removers do you recommend ?

A. For lace systems you can use Lace Release, any other hair system, Action, Walker Signature Remover, C-22, however Rapid Release **Should not be used direct on the skin**, only to soak the hair system.
