Design • Evolution

Endless Functionality

Design Revolution

Trax Drapery Hardware™ was founded on the principle that innovation, design, and quality do not need to be sacrificed to provide exceptional value. Offering a wide range of in-stock and ready-to-ship hardware, Trax Drapery Hardware™ has evolved and developed an extensive range of exclusive products, designs, and colors. The Soho Collection's commitment to continual advancement can be seen in our new patent pending installation assembly. The new mounting system simplifies the installation process and offers strength in the areas where it's needed the most while respecting customers' expectations of design and value.

The Soho Collection is the latest addition to the Trax Drapery Hardware™ range of products. The collection offers a wide range of finial designs in five designer colors. From modern to elegant, every curve has been carefully designed to enhance any room's

decor. Colors have been carefully selected, from Polished Nickel to Matte Black and Brushed Brass combinations, the design possibilities are endless.

Offering the widest range of components and accessories, the Soho Collection has been engineered for installation precision. Every component of this collection has been carefully engineered to meet almost every installation situation imaginable. Flush-mounted ceiling brackets allow channel rods to be mounted without a ceiling gap, while extra-strong channel rod joints allow for a more seamless joint over long spans and placement of a bracket at the center of the joint.

As we continue our never-ending goal of achieving design evolution, we trust that The Soho Collection will meet our discerning customer's technical and design needs.

NOTE: Sizes are approximate. Pictures of products may not be exact color.
