

Before you begin, read all warnings and installation instructions thoroughly.

Safety & Warnings

- Install in a well-ventilated area free from explosive gases and vapors.
- This product is rated dry/indoor installations.
- Only install compatible constant voltage LED fixtures. Contact technical support or visit the online product page for compatible products.
- Do not modify or disassemble this product beyond instructions or the warranty will be void.

- Ensure applicable wire is installed between driver, fixture, and any controls in between. When choosing wire, factor in voltage drop, amperage rating, and type (in-wall rated, wet location rated, etc.). Inadequate wire installation could overheat wires and cause fire.
- Packaging will indicate output voltage & max load. Never load the battery more than its max output rating. This may damage your battery or significantly decrease the battery discharge rate.

Quick Specs

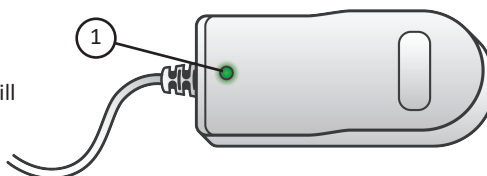

| | |
|-----------------------|---|
| Output Voltage | 10.8 ~ 12.6VDC |
| Max Load | 3800mAh battery: 2A / 24W |
| Included Items | <ul style="list-style-type: none"> • Rechargeable battery pack • Battery adapter (charger) • Male-to-male DC extension cable |

Installation

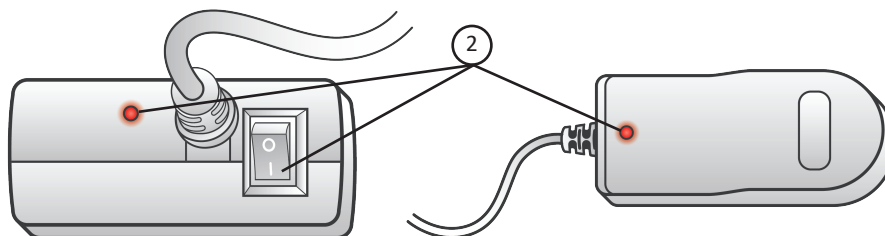

1. Charge the battery pack (see Charging Instructions).
2. Once charging is complete, flip the battery pack switch to OFF (O) and plug in the male-to-male DC extension cable.
3. Attach a compatible LED load. Do not overload the battery pack. A female DC connection is required to attach to the male-to-male DC extension cable.
4. Turn the battery pack switch to ON (I) and a red LED will light up on the battery pack.

Charging Instructions

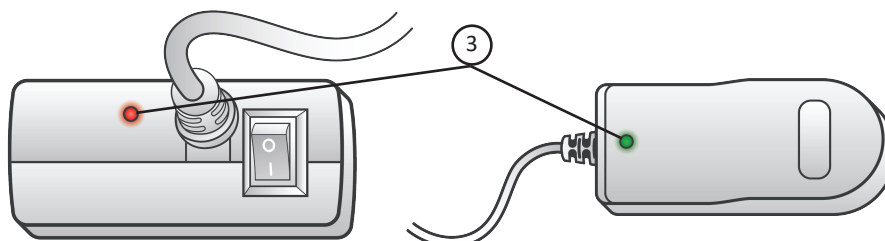

1. Plug the adapter into a 120VAC receptacle, and a green LED will light up on the adapter.

2. Insert the male DC plug of the adapter into the battery pack. Turn the pack ON (I) and both the green and the red LED indicators light up on the adapter, although the red LED appears brightest.

3. Charging is about 98% complete when the red light turns off and only the green led is illuminated on the adapter. A full charge may take between 1-3 hours.

4. Once fully charged, disconnect the battery pack from the adapter and flip the battery pack switch to OFF (O) to prevent battery drainage.
