

SUCSEED IN SOCIAL STUDIES

Example Activities:

- Challenge students to visit a local store and find out where in the world the produce was grown
- Research the effects of climate on growing outdoors
- Explore how hydroponics can reduce land needed for farming and help with the global need for food
- Compare the types of produce eaten in various regions
- Learn how agriculture methods have changed over time
- Research the difference between subsistence and commercial agriculture
- Research which regions can grow certain kinds of produce
- Create a map of Canada with photos showing produce that grows best in each region
- Watch the SucSeed water and waste reduction videos to learn about helping the environment
