

SUPPLEMENTARY TREATMENTS PROZYME® ENZYME TREATMENT

ProZyme® Enzyme benefits all skin types, especially clients with mature, hyperpigmented and photo-damaged skin. It leaves the skin brighter, firmer, and looking refreshed. It is recommended to perform a **ProZyme® Enzyme** treatment 4-6 days after a **ProPeel®**.

PRODUCTS

- Green Tea Antioxidant Cleanser or Mandelic Acid 3-in-1 Wash*
- Daily Repair Pads with 1% Mandelic Acid, Normalizing Tonic or Normalizing Tonic Forté
- Prozyme® Enzyme
- Allantoin Sedating & Hydrating Lotion
- Schamberg Comedone Extractor
- Totaloe™ Calming and Hydrating Gel
- Day Treatment Lotion SPF 15

PROCEDURES

1. **CLEANSE:** Use **Green Tea Antioxidant Cleanser** or **Mandelic Acid 3-in-1 Wash** to cleanse the entire face. Rinse thoroughly.
2. **APPLY**:** Gently wipe the face with the **Daily Repair Pads with 1% Mandelic Acid** starting on forehead, chin, cheeks and t-zone. Avoid eye area. Leave on for 2-5 minutes. Or tone the face with **Normalizing Tonic** or **Normalizing Tonic Forté**.
3. **NEUTRALIZE**:** Rinse thoroughly with water (make sure to clean under the jaw bone and into the hairline).
4. **ACTIVATE:** Mix equal parts **ProZyme® Enzyme** to the consistency of a paste with either **Allantoin™ Sedating & Hydrating Lotion** (for dry/winter skin) or **Totaloe™ Calming and Hydrating Gel** (for oily/humid weather). Heat enzyme in steamer blast until warm.
5. **EXFOLIATE:** To prepare the skin for extractions, brush warmed enzyme over the forehead, t-zone, chin and cheeks. Avoid the eye area, eyebrows, eyelids, and lips. Cover the eyes with moist cotton pads.
6. **STEAM:** Steam the face for 15 minutes. Remove enzyme mixture with a warm damp towel or gauze and pat the face dry. This procedure facilitates the penetration of products and/or extractions.
7. **EXTRACT:** (if needed) Wear gloves - use a **Schamberg Comedone Extractor** or your finger tips wrapped in cotton gauze. Do the **Two-Step Acne Extraction Method™**.
8. **MASSAGE:** Administer a massage with **Totaloe™ Calming and Hydrating Gel** for 5 to 10 minutes.
9. **MOISTURIZE (Optional):** With **Day Treatment Lotion SPF 15**.

This treatment is recommended every two weeks. For optimum results, offer treatments in a series of six and maintenance treatments monthly thereafter.

*Use for darker skin types (Fitzpatrick 4-6)

** Eliminate steps 2 & 3 if face is peeling after a ProPeel® procedure.
