

## FACIAL TREATMENT PROZYME® LITE

**Prozyme® Lite** benefits all skin types, especially clients with mature, hyper-pigmented and photo-damaged skin. It leaves the skin brighter, firmer, and looking refreshed. It is recommended to perform a **Prozyme® Lite** treatment 4-6 days after a **ProPeel®**. This treatment is recommended every two weeks. For optimum results, offer treatments in a series of six and monthly maintenance treatments thereafter.

### PRODUCTS

- Prozyme® Lite
- Totaloe Calming and Hydrating Gel™
- Allantoin Sedating & Hydrating Gel™
- Green Tea Antioxidant Cleanser
- Mandelic Acid 3-in-1 Wash

### PROCEDURES FOR OILY / ACNE SKIN

1. **CLEANSE THE SKIN** : Use **Mandelic Acid 3-in-1 Wash** to cleanse the entire face. Rinse thoroughly.
2. **ACTIVATE** : Mix approximately 1 ½ teaspoons of **Prozyme® Lite** powder to the consistency of a paste with **Totaloe Calming and Hydrating Gel™**.
3. **APPLY**: Up to the hairline, around the eye area (not on the lids) and below the jaw area with a fan brush. Place damp eye pads on the eyes, and a towel covering the clothing. Apply steam for approximately 10-15 minutes.
4. **REMOVE**: The enzyme and cellular debris with a warm damp towel using upward strokes, and pat the face dry.

### PROCEDURES FOR NORMAL / DRY SKIN

1. **CLEANSE THE SKIN** : Use **Green Tea Antioxidant Cleanser** to cleanse the entire face. Rinse thoroughly.
2. **ACTIVATE** : Mix approximately 1 ½ teaspoons of **Prozyme® Lite** powder to the consistency of a paste with **Allantoin Sedating & Hydrating Gel**.
3. **APPLY**: Up to the hairline, around the eye area (not on the lids) and below the jaw area with a fan brush. Place damp eye pads on the eyes, and a towel covering the clothing. Apply steam to the face for 10-15 minutes.
4. **REMOVE**: The enzyme and cellular debris with a warm damp towel using upward strokes, and pat the face dry.

**Warning:** For external use only. Keep dry until ready to use. Store at room temperature (59° to 86° F).
