## Safety and Care Advice

### Important – Please read these instructions fully before starting assembly

Check you have all the components and tools listed on pages 2, 3 and 4.

Remove all fittings from the plastic bags and separate them into their groups.

Keep children and animals away from the work area, small parts could choke if swallowed.

Make sure you have enough space to layout the parts before starting.

Assemble the item as close to its final position (in the same room) as possible.

Assemble on a soft level surface to avoid damaging the unit or your floor.

Assembly requires 2 people.

Do not fully tighten bolts until the whole bed is assembled. Do not overtighten the nuts to avoid causing damage to the threads.

We do not recommend the use of power drill/drivers **for inserting screws,**

as this could damage the unit. Only use hand screwdrivers and Allen keys.

Dispose of all packaging carefully and responsibly.

### Cleaning Guidance

Minor stains and spillages should be removed immediately from cushion fabric, by wiping over lightly with a damp cloth and mild soapy water.

Light marking can also be removed using this method.

To remove more stubborn stains or marking, a good quality proprietary domestic fabric cleaner can be used, although it should first be tested on an inconspicuous area of the fabric.

### Care and maintenance

From time to time check that there are no loose screws on this unit.

This product should not be discarded with household waste. Take to your local authority waste disposal centre.
