

CREATING CLASSIC FEATURES

FIREPLACES. FOUNTAINS. ARCHITECTURAL FEATURES

After the Antique is a Norfolk based family business designing, creating and fitting beautiful fireplaces, fountains and architectural features for homes and gardens all over the UK.

Our speciality is creating designs for today, inspired by antique originals. Our key source is Britain's Tudor, Georgian, Regency and Victorian periods and mainland Europe's 17th and 18th Century. By hand carving and using only the finest natural marbles, limestones, sandstones and travertine we produce timeless features that can be enjoyed for years to come.

This brochure highlights the large range of fireplaces and fountains we carry in stock and have on display. It also shows examples of the range of bespoke work we have created over the last 20 years.

If you are unable to find exactly what you are looking for from our stock and would like to have one of our existing pieces custom sized or if you would like to have a totally bespoke piece created for you, we would be delighted to discuss this with you.

Thank you for taking the time to look at this brochure. I hope that you will come and see us or be in touch.

Stephen Parker Founder
