## REGISTER YOUR DEVICE

1. Your Booster has an authentication code located on the back of the device near the base.
2. Go to [ooze.life/register](https://ooze.life/register) and use this code to fill out the registration form.
3. Submit the form. Your Booster is officially registered in our system, and your warranty is activated!

## HOW TO USE YOUR BOOSTER

### GET STARTED

1. Twist the mouthpiece like a car key in the ignition to unlock & remove.
2. Load extract into the center of the C-Core dish.
3. Replace the cap.

### SETTING UP YOUR BOOSTER

**PRESS THE BUTTON 5X TO TURN ON & OFF.**

Press the button 3x to switch between the 3 voltage levels. Each level has a different LED color and heats to a different temperature range:

**GREEN**  
2.7V

**BLUE**  
3.2V

**RED**  
3.7V

The Booster will remember the voltage level you selected during your previous session. It will remain at this level unless you click the button 3x.

## HOW TO USE

There are 2 ways to operate the Booster:

### MANUAL MODE:

Use the Booster as a regular extract vape! Activate a heat cycle and inhale through the mouthpiece.

### DAB RIG MODE:

Remove the bottom cap and insert your Booster into any 14mm water pipe. Activate a heat cycle and enjoy the dab rig experience without a torch!

There are 2 ways to activate a heat cycle:

### SAFE SESH MODE:

Press the button to heat the device while you inhale, and release when you exhale.

### SESH MODE:

Click the button twice to activate sesh mode. The device will heat & LED will flash without you holding the button, and shut off after 15 seconds.

## SAFE SESH DURATION

The 3 voltage levels have a 15 second safe sesh and will stop heating afterwards.
