SETTING UP YOUR ELECTRO BARREL

Press the button 3x to switch between the 3 voltage levels. Each level has a different LED color and heats to a different temperature range

GREEN 400-500° F 204-260° C

BLUE 500-600° F

RED 600-700° F 315-371° C

The Electro Barrel will remember the voltage level you selected during your previous session. It will remain at this level unless you click the button 3x.

SAFE SESH CYCLES

The 3 voltage levels have different Safe Sesh Cycle durations. The hotter the temperature, the longer the cycle length.

30 Seconds Total
15 Second Preheat
15 Second Sesh Time

3.4v

35 Seconds Total 20 Second Preheat 15 Second Sesh Time **3.8v**

40 Seconds Total 20 Second Preheat 20 Second Sesh Time

HOW TO USE

MANUAL MODE

Press the button to heat the device while you inhale, and release when you exhale.

SAFE SESH CYCLE

Click the button twice to activate a Safe Sesh Cycle. The device will heat & LED will flash without you holding the button, and shut off once the cycle is complete.

Use a finger as a carb cap to cover the carb hole in the lid to control the airflow.

CHARGING

Needs to Charge: 5 red LED flashes. While Charging: Flashing white LED. Charge Complete: Solid white LED.
