Click the button 3x fast to change voltage

2.7V

3.3V

4.0V

SAFE SESH CYCLE

Stops heating after 15 seconds to preserve terpenes.

HOW TO USE

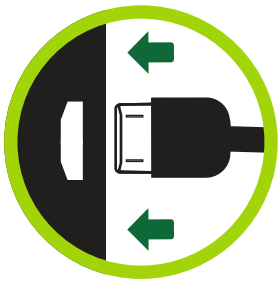

- 1.** Press the button 5x to turn on and off. The Signal light will flash green 3x, then flash the voltage level color once.
- 2.** Pull the mouthpiece off the device & load your extract onto the dual quartz coils.
- 3.** Slide the mouthpiece back on over the 2 rubber rings to create the airflow seal.
- 4.** Press the button 3x to select your voltage level.
- 5.** Press and hold the button to heat the device. One Safe Sesh Cycle will heat for 15 seconds & then shut off automatically to prevent burning the coils.

PRO TIP:

Make sure to push the wax all the way down so it's touching the coils, or else it won't vaporize completely!

SIGNAL

HOW TO CHARGE

CHARGING

● Red light is on

FULLY CHARGED

● Green light is on

Micro USB Charger:

Plug the Micro USB charging cord into the port located near the button.

Plug the USB end into a wall adapter and then charge with a wall outlet.
