DRY HERB VAPORIZER

1. Remove the mouthpiece and load in up to 0.5g of ground dry herbs. Replace the mouthpiece.

3. Adjust the temperature (302-446° F/150-230° C) using the Up and Down buttons.

302° F 150° C 446° F 230° C

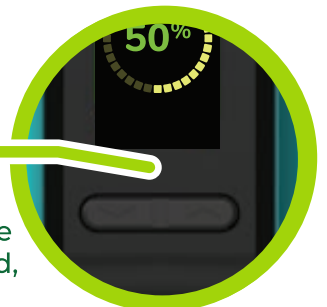

5. Press and hold the main button for 2 seconds to begin heating. The device will buzz again once the desired temperature is reached.

2. Click the main button 5x to turn on, the pulse wave technology will buzz and it will remember your last-used temperature.

4. Click the main button 3x and then use "up" and "down" to adjust the session time (180 seconds-360 seconds).

6. To adjust the temperature after the heat cycle has started, press "up" or "down" and then press the main button.
