

WHAT'S NEW

3D Animation

The N3 Software delivers fast-paced and challenging animated training with a dynamic 3D Trainer in Mitts mode and a 3D Fighter in Sparring mode. The 3D Avatars train the user using multi-colored reticles and directional strike prompts. Users are rewarded for successful strikes with engaging animated rewards.

Improved Body Pad

The N3 Single Body Pad (SBP) is designed to represent an anatomically accurate torso. The SBP design incorporates compression and coil springs to enable movement on 3 axes (X, Y, Z). This new shape and movement, combine to teach and train realistic body, hook and uppercut strikes.

COMING SOON

"Nexersys Live"

Nexersys 3 will offer "Nexersys Live" video training sessions, bringing high energy workouts to every N3 unit. "Nexersys Live" sessions will teach and train unique techniques by professional athletes, celebrities and best in class trainers.

Features

Training Rounds

Includes Mitts and Sparring Training Rounds. Mitts prompts, teaches and trains strike types. Sparring is competition based on striking.

Cloud/WiFi

Cloud-based training content with unlimited user accounts, accessible from free software updates via WiFi.

On-Screen Feedback

Includes an exercise performance summary on strike accuracy, power, reaction time, strike count and points. Feedback is reported in real-time and at the end of each training round.

Unlimited Unique Profiles

Each N3 Commercial Model is cloud-connected where user data is stored, allowing any user to access their profile on any machine.

High Intensity Interval Training

Designed to burn more calories in less time. H.I.I.T provides short exercise periods of near max intensity, followed by shortened rest periods that challenge the body to its limit.

Attract & Engage

An introductory video to get users on the machine fast. The Attract & Engage mode gives users a way to quickly preview Nexersys rounds.
