

NUCLEUS

Built around our Matrix Chassis, Nucleus is the ultimate corflute vehicle available. We've taken the successful Matrix Chassis that has enjoyed great success and wrapped it in a CAD and Virtual Wind Tunnel tested and Fairing. Utilising flat sheets of corflute and PETG fairing to create a minimalistic and aerodynamic results while reducing the need for expensive blowmolds. Featuring a semi clamshell that opens at the doubled front roll bar and lift up and gives plenty of access to all 3 wheels as well as allowing great access to the front end of the vehicles driveline. The fully adjustable race tested seat that slides horizontally places the rider in the optimum position and removes the need for excessive, power draining padding. Nucleus is steered by our own GTrikes centre steering that is ergonomically placed and allows fully enclosed front wheel boxes that split and open with the top canopy, (Nucleus is also available with Push Pull steering). And the entire vehicle is built around our race winning trussed dual railed chassis that places the rider within 60mm of the ground that gives incredible cornering capabilities.

FRAME: Aircraft Grade 4130 Chromium Molybdenum Alloy powdercoated in GTrikes Red

BRAKES: Drum Brakes

GEARING: 9speed

CRANKS: Alloy narrow profile

TYRES: 16inch Schwalbe Kojaks or Greenspeed Scorcher

STEERING: GTrikes Centre steering or GTrikes Push-Pull

HATCH SYSTEM: Half clam shell canopy with locking mechanism

FAIRING: Flat Pack Corflute and PETG Fairing ready for assembly

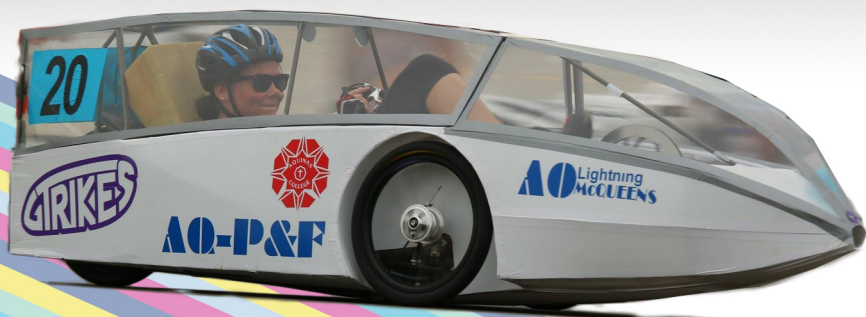

SEAT: Fully Adjustable sliding carbon seat

SAFETY: 4point Safety Harness

GUARDS: Carbon Chain guard, Alloy chain disks and fully enclosed corflute wheel boxes

PRICES FROM \$5500

Upgrades available: 10speed Driveline \$160, Trublu Front wheels \$220, Trublu Rear wheel \$100, Shimano Ultegra/Durace Di2 11speed upgrade \$1650
