

The New Native® Baby Carrier is safe and easy to use. Please understand that we have extensive safety warnings in order to provide you with the knowledge you need to safely use our carrier. Our carrier has an exemplary history of safety and we do all that we can to keep it that way.

## **⚠️ WARNING ⚠️**

**Failure to follow the manufacturer's instructions can result in death or serious injury.**

Only use this carrier with children weighing between 8-35lbs.

### **SUFFOCATION HAZARD**

Babies younger than 4 months can suffocate in this product if face is pressed tightly against your body. Babies at greatest risk of suffocation include those born prematurely and those with respiratory problems.

- Check often to make sure baby's face is uncovered, clearly visible, and away from caregiver's body at all times.
- Make sure baby does not curl into a position with the chin resting on or near the baby's chest. This position can interfere with breathing, even when nothing is covering the nose or mouth.
- If you nurse your baby in carrier, always reposition after feeding so baby's face is not pressed against your body.
- Never use this carrier with babies smaller than 8 pounds without seeking the advice of a healthcare professional.

### **FALL HAZARD**

Leaning, bending over, or tripping can cause baby to fall. Keep one hand on baby while moving.

**CORRECT**

Upright: Chin up, face visible, nose and mouth free

**CORRECT**

Reclined: Chin up, face visible, nose and mouth free

**INCORRECT**

Baby's face is covered and

**INCORRECT**

Baby is hunched with chin pressed tight against wearer and face covered

### **WARNING ADDITIONAL HAZARDS**

- Do not use a carrier which is not correctly sized to you.
- Improperly positioned babies can fall out of the carrier.
- Follow all directions for inserting and removing a baby from the carrier.
- When inserting and removing the baby from the carrier, keep one hand on the baby at all times.
- Young babies can be at risk of positional asphyxia. Positional asphyxia is a type of suffocation that happens when a person's body is put in a position restricting airflow. One form of positional asphyxia can occur when a baby's chin is pressed against their chest. Warning signs of positional asphyxia may include, but are not limited to: frequent or continuous grunting, sighing, labored, or rapid breathing.
- Check to make sure baby's head is positioned back far enough to ensure free air flow.
- Keep infant's face free from obstructions at all times. Do not allow your baby's nose or mouth to become pressed against any soft bedding, wearer, pillow, plastic bag, or any material that could restrict airflow. This is especially important when your baby is sleeping.
- We recommend extra support for small babies.
- The carrier is intended for use by ADULTS while walking, sitting, or standing only.
- Never bend at waist; bend at knees while using a carrier.
- Take special care when leaning or walking. Your balance may be adversely affected by your movement and that of your baby.
- NEVER use a soft carrier when balance or mobility is impaired. Conditions may include, but are not limited to: exercise, sporting activities, drowsiness, or medical conditions.
- NEVER use a soft carrier while engaging in activities such as cooking and cleaning, which involve a heat source or exposure to chemicals.
- NEVER wear a soft carrier while driving or as a passenger in a motor vehicle. DO NOT use this carrier as a child restraint in a motor vehicle. This type of carrier will not properly restrain your baby in the event of a collision.
- NEVER leave a baby unattended in any carrier.
- Make sure the baby is properly placed in the carrier, including leg placement, before each use.
- NEVER lean against baby.
- DO NOT use in showers, pools, or any water environments.
- Small children have poor temperature regulation, so check baby's abdomen, forehead, and neck frequently.
- Do not overdress your baby. Your body heat along with the carrier fabric will help keep your baby warm.
- Check your baby's arms and legs frequently to make sure they can move freely. Should arms or legs appear to be discolored, remove the baby from the carrier immediately.
- This product is subject to wear and tear over time. Check for ripped seams or damaged fabric before each use. DO NOT use this product if deterioration, damage, or flaws are detected.
