

## Vinyl Decal Application Instructions

**Step 1:** Run a small plastic squeegee or a credit card over the surface of the decal to activate the clear decal application tape.

**Step 2:** Clean the dry, flat, smooth surface where the decal will be applied.

**Step 3:** Slowly separate and remove the application tape with the attached decal from the paper backing. If the decal stays on the paper, run over it once more with the squeegee before trying again.

**Step 4:** Place the decal onto the surface and run over it with the squeegee to smooth out any bubbles. When placing the decal, it may help to arc the decal and set it starting from the middle working your way toward the outside.

**Step 5:** Slowly remove the application tape so that the decal remains on the surface. If the decal begins to peel up, run the squeegee over it and try again.

**Step 6:** Discard the application tape and enjoy!
