

Strong Heat-Resistant Polymer

Z-PEI 1010 is a blend of PEI slightly stronger than Z-PEI 9085 and with higher heat deflection temperature. The material can withstand temperatures reaching 208° C. It is also harder than Z-PEI 9085 which makes it perfect for scenarios where high rigidity is of paramount importance. Moreover, it offers broad chemical resistance to automotive fluids, fully halogenated hydrocarbons, alcohols, and aqueous solutions among others.

Applications

- components with high rigidity,
- temperature resistant parts,
- chemically resistant parts.
