1 Identification

- · Product identifier
- · Trade name: intense
- Application of the substance / the mixture Dry-cleaning Solvents

 Details of the supplier of the safety data sheet
 Manufacturer/Supplier: SEITZ GmbH Gutenbergstrasse 3
 65830 Kriftel / Germany Tel. + 49(0) 6192-9948-0
 Fax + 49(0) 6192-9948-99 msds@seitz24.com

- www.seitz24.com
- Information department: CHEM-TEL Inc. 1305 North Florida Ave Tampa Florida 33602
- Emergency telephone number: 1-800-255-3924

2 Hazard(s) identification

· Classification of the substance or mixture

GHS08 Health hazard

Asp. Tox. 1 H304 May be fatal if swallowed and enters airways.

Flam. Liq. 4 H227 Combustible liquid.

- · Label elements
- GHS label elements
- The product is classified and labeled according to the Globally Harmonized System (GHS).
- · Hazard pictograms

- · Signal word Danger
- · Hazard-determining components of labeling:
- alkanes, C10-13-iso-
- · Hazard statements
- H227 Combustible liquid.

H304 May be fatal if swallowed and enters airways.

- Precautionary statements
- P210 Keep away from heat/sparks/open flames/hot surfaces. No smoking.
- P280 Wear protective gloves / eye protection.
- P301+P310 If swallowed: Immediately call a poison center/doctor.
- P331 Do NOT induce vomiting.

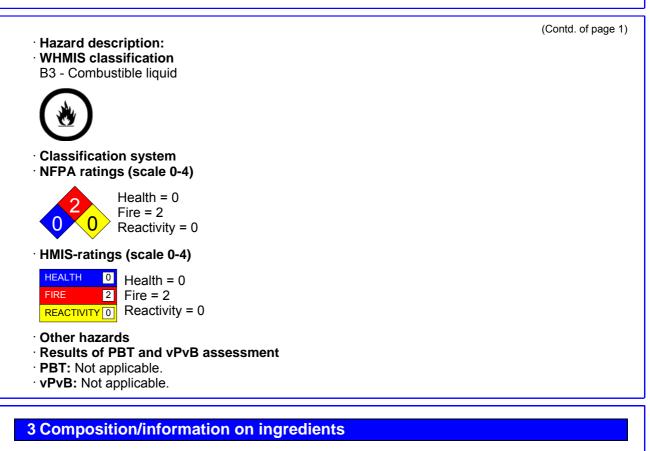

(Contd. on page 2)

Reviewed on 07/09/2015

Printing date 07/09/2015

· Chemical characterization: Mixtures

· CAS-No.	Components:	
68551-17-7	alkanes, C10-13-iso-	50 - 75%
	Trade secret: propylene glycol ether	25 - 50%

· Additional information For the wording of the listed risk phrases refer to section 16.

4 First-aid measures

- · Description of first aid measures
- · General information Immediately remove any clothing soiled by the product.
- After inhalation
- Supply fresh air. If required, provide artificial respiration. Keep patient warm. Consult doctor if symptoms persist.
- · After skin contact

Immediately wash with water and soap and rinse thoroughly.

If skin irritation continues, consult a doctor.

- · After eye contact
- Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor. After swallowing
- Rinse out mouth and then drink plenty of water.

Do not induce vomiting; immediately call for medical help.

- Information for doctor In case of ingestion and subsequent vomiting aspiration by the lungs might result and lead to chemical pneumonia or suffocation.
- **Most important symptoms and effects, both acute and delayed** No further relevant information available.

Indication of any immediate medical attention and special treatment needed No further relevant information available.

5 Fire-fighting measures

- · Extinguishing media
- · Suitable extinguishing agents
- CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
- · For safety reasons unsuitable extinguishing agents Water with full jet.
- Special hazards arising from the substance or mixture
- Formation of toxic gases is possible during heating or in case of fire.
- · Advice for firefighters
- · Protective equipment: Do not inhale explosion gases or combustion gases. Wear self-contained respiratory protective device.
- Additional information Cool endangered receptacles with water spray. Dispose of fire debris and contaminated fire fighting water in accordance with official regulations.

6 Accidental release measures

Personal precautions, protective equipment and emergency procedures

Wear protective equipment. Keep unprotected persons away. Avoid contact with eyes and skin.

Ensure adequate ventilation

Do not breathe gases/ vapours.

- Keep away from ignition sources
- Environmental precautions: Do not allow product to reach sewage system or any water course. Methods and material for containment and cleaning up:
- Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Dispose of the collected material according to regulations.
- **Reference to other sections** See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

7 Handling and storage

·Handling

· Precautions for safe handling

Keep away from heat and direct sunlight. Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols.

- Avoid contact with eyes and skin.

Ensure good interior ventilation, especially at floor level. (Fumes are heavier than air).

- Information about protection against explosions and fires:
- Keep ignition sources away Do not smoke.
- Protect against electrostatic charges.

Formation of explosive vapour- / air mixture possible.

- · Conditions for safe storage, including any incompatibilities
- · Storage
- · Requirements to be met by storerooms and receptacles: Store only in the original receptacle. Provide solvent resistant, sealed floor.

(Contd. of page 3) • Information about storage in one common storage facility: Store away from foodstuffs. • Further information about storage conditions: Protect from heat and direct sunlight. Store in cool, dry conditions in well sealed receptacles. Store receptacle in a well ventilated area. Protect from frost. Time of storage: max. 24 month • Specific end use(s) Dry-cleaning
8 Exposure controls/personal protection
· Additional information about design of technical systems: No further data; see item 7.
 Control parameters Components with limit values that require monitoring at the workplace: Additional information: The lists that were valid during the creation were used as basis.

- Exposure controls
- Personal protective equipment General protective and hygienic measures
- The usual precautionary measures for handling chemicals should be followed.
- Keep away from foodstuffs, beverages and feed.
- Immediately remove all soiled and contaminated clothing
- Do not eat, drink, smoke or sniff while working.
- Wash hands before breaks and at the end of work.
- Do not inhale gases / fumes / aerosols.
- Avoid contact with the eyes and skin.
- Breathing equipment: Use suitable respiratory protective device in case of insufficient ventilation (exceeding the workplace limit values, formation of aerosols).
- Protection of hands:
- Solvent resistant gloves
- The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.
- Material of gloves
- Nitrile rubber, NBR

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

- Eye protection: Safety glasses
- · Body protection: Protective work clothing.

12 Ecological information

- · Toxicity
- · Aquatic toxicity: No further relevant information available.
- Persistence and degradability No further relevant information available.
- · Behavior in environmental systems:
- · Bioaccumulative potential No further relevant information available.
- Mobility in soil No further relevant information available.
- Additional ecological information:
- · General notes:

Do not allow product to reach ground water, water course or sewage system.

The surfactant(s) contained in this preparation complies(comply) with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents. Data to support this assertion are held at the disposal of the competent authorities of the Member States and will be made available to them, at their direct request or at the request of a detergent manufacturer.

- Results of PBT and vPvB assessment
- · **PBT:** Not applicable.
- **vPvB:** Not applicable.
- · Other adverse effects No further relevant information available.

13 Disposal considerations

· Waste treatment methods

· Recommendation:

Contaminated adsorbent, soil, water must be disposed of in a permitted hazardous waste management facility. Recovered products may be reused, reprocessed or incinerated or must be treated in a permitted hazardous waste management facility. It is your duty to dispose of the
