

# GermBuster Sabre

Powered By Sterilray™

The GermBuster™ Sabre produces Far-UV 222nm light that is safe for human exposure.

The photons are unable to penetrate the protective layers of our skin and eyes. It is maintenance-free, environmentally friendly, pathogen destruction.

DC adapter

AC Power Supply

Use the Sterilray GermBuster Sabre to disinfect high-touch surfaces. The sabre will produce a high disinfection level on any surface it is passed over. The GermBuster sabre can be used in a dual role for surface disinfection and mounted for air disinfection. The GermBuster Sabre is ideal for disinfecting areas that are seldom treated, like nurse stations, computer workstations, chairs, curtains, papers, notebooks and electronics.

## Purposely designed with your needs in mind:

- › Utilizes Human Safe Far-UV technology with a 3 year lamp warranty.
- › Instant on/off at full output power, and frequent on/off cycles don't affect lamp life
- › Easy-to-use – Wave the sabre 1-2" above surfaces for 2-5 seconds depending on amount of disinfection required.
- › Dry, Chemical Free – environmentally friendly, lamps produce no ozone.
- › Powerful air disinfection for social events. Stops airborne virus and bacteria before transmission.
- › Sabers are available in black or off-white.
- › Flexible financing options are available
- › Ergonomically designed 3.5 lb that is evenly balanced.
