LIGHT-WEIGHT SCULPTURING EPOXY

- 25% LIGHTER FORMULA
- NO SOLVENTS
- NON-TOXIC
- SANDABLE
- PAINTABLE
- PIGMENTABLE

- * ENVIRONMENTALLY SAFE
- * CLEANS UP WITH WATER
- * IDEAL FOR UNDERWATER APPLICATIONS

307 LITE is a 100% solids light-weight epoxy system specially formulated to a trowelable paste consistency for sculpturing and fabricating projects. 307 LITE will cure into an extremely strong and light-weight plastic that is easily sanded or shaped. 307 LITE can be tinted or painted and will even accept stains. 307 LITE bonds well to most surfaces including fiberglass, foams, metal, wood and concrete. 307 LITE is solvent free so it won't melt or dissolve foam surfaces.

307 LITE can be used as a sculpturing or texturing veneer over other surfaces and is thick enough for immediate embossing upon placement. 307 LITE is ideal for indoor or outdoor exhibit projects where strength and durability are desired. 307 LITE can also be used as a patching compound to repair broken or damaged exhibits. 307 LITE is the recommended formula for underwater applications.

PROPERTIES OF 307-FR LITE

Compressive Strength ASTM D-695	11,500 psi (min)
Tensile Strength ASTM D-638	2,100 psi (min)
Viscosity	Thick paste
Mix Ratio	1:1
Pot Life	60 minutes @70°F
Cure Time	10-14 hours
Weight per Gallon	8.25 lbs.
Packaging	2, 10, and 100 Gallon Kits

MIXING INSTRUCTIONS

Thoroughly mix equal amounts of Part A and Part B by volume until streak free. Wearing protective gloves, trowel or spread the 307 LITE and immediately texture, emboss or finish as desired. Small amounts of water may be used to help prevent the 307 LITE from sticking to the gloves.
