E-Z SCULPT

EPOXY SCULPTURING CLAY

- NO SOLVENTS
- NON-TOXIC
- SANDABLE
- PAINTABLE
- PIGMENTABLE

- * ENVIRONMENTALLY SAFE
- * CLEANS UP WITH WATER

E-Z SCULPT is a 100% solids epoxy system specially formulated to a workable 'clay like' consistency for sculpturing and modeling projects. E-Z SCULPT will cure into an extremely strong and durable plastic that is easily sanded or shaped. E-Z SCULPT can be tinted or painted and will even accept stains.

E-Z SCULPT is used as a free form sculpturing medium or applied as a textured veneer over other surfaces. E-Z SCULPT is ideal for small or intricate detail work where strength and durability are desired.

PROPERTIES OF E-Z SCULPT

Compressive Strength ASTM D-695	14,500 psi (min)
Tensile Strength ASTM D-638	5,500 psi (min)
Viscosity	Clay Putty
Mix Ratio	1:1
Pot Life	60-90 minutes @70°F
Cure Time	8-12 hours
Packaging	2 or 10 Gallon Kits

MIXING INSTRUCTIONS

Gather equal amounts of Part A and Part B by volume. Wearing protective gloves begin to knead the two parts together until streak free and uniform in color. Small amounts of water may be used to help prevent the E-Z SCULPT from sticking to the gloves. Form or shape as desired.
