

TECHNICAL DATA SHEET TRADITIONAL RAINBOW

PRODUCT DESCRIPTION: **SCULPT NOUVEAU'S TRADITIONAL RAINBOW PATINA** is different than Torch Patina in that the metal must be heated first to achieve a reaction. Rainbow Patina also works best on shiny metal. It may be applied to bronze, brass, copper, iron and steel and will create interesting rainbow colors on the surface.

SAFETY: **SAFETY:** Always wear goggles or face shield, rubber gloves, protective clothing and respirator when handling product.

DIRECTIONS FOR USE: **DIRECTIONS:**

BRASS, BRONZE & COPPER:

- 1) Clean the metal with Sculpt Nouveau's Metal Cleaner and Degreaser. Do not sandblast.
- 2) Heat the bronze, brass or copper to 200°F - 220°F
- 3) Apply two coats. Additional coats will bring out variations of colors.
- 4) Rinse with water, while hot, for the brightest colors.
- 5) When dry, protect the finish with 2 coats of Clear Guard.

Cold Rolled Steel:

- 1) Clean the metal with Sculpt Nouveau's Metal Cleaner and Degreaser. Do not sandblast.
- 2) Heat the steel to 200°F - 220°F. If applying on a large surface, work in sections.
- 2) Apply Rainbow Patina to hot metal. Applying more coats may bring out more black tones.
- 4) Rinse while hot
- 5) When dry, protect the finish with 2 coats of Clear Guard.

TECHNICAL DATA

PHYSICAL STATE: Translucent gray liquid

BOILING POINT: > 100°C (> 212°F)

COVERAGE: 200 sq. ft. per gallon

SOLUBILITY IN WATER: Complete

V.O.C. Not applicable

Ph: N/A

FLAMMABILITY LIMITS: Not flammable

INCOMPATIBLE SUBSTANCES: Strong acids, oxidizing agents, iodine, mercury, sulfates, tartrates, phosphates, chlorides

PACKAGING

8 oz 32 oz 1 Gallon 5 Gallon
