

Recessed Systems

We offer hardware solutions that completely hide roller shades from view when retracted. These are recessed ceiling systems that integrate into site built soffits and ceiling grids.

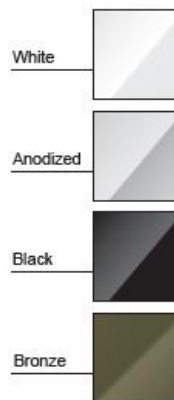

3 Sided Pockets with Closure

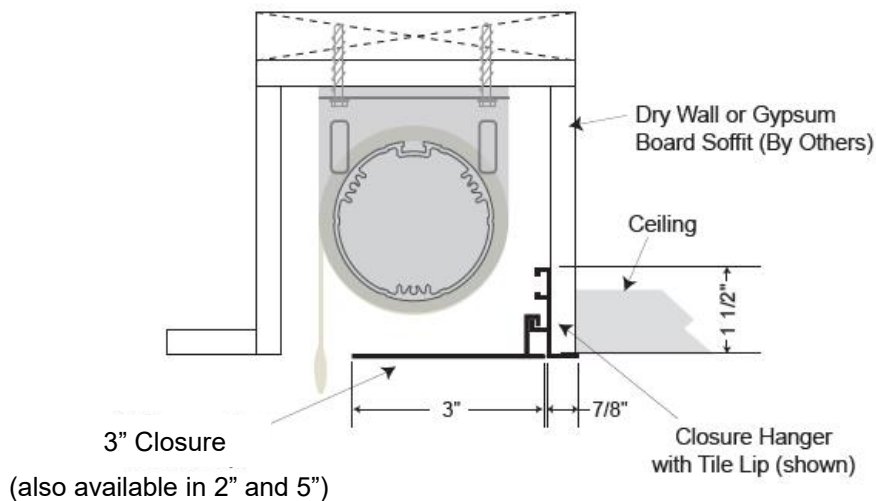

Note: A riveted 7/8" white ceiling tile lip can be mounted on one or both sides on any box

All extrusions available in:

Site Built Ceiling Soffit Closure & Hanger

Available in up to 15 foot lengths.

Pricing is per linear foot (rounded up), and we can cut to your exact measurements. Many customers purchase pieces rounded up to the nearest foot, and then custom cut the coves/covers for a precise fit during installation since the aluminum pieces cut easily with a chop saw (aluminum cutting blade) or hacksaw. Shipping is extra, and depends on location.
