## *How to wear a Sari Wrap Skirt:* **Festival Edition**

*More Inside!*

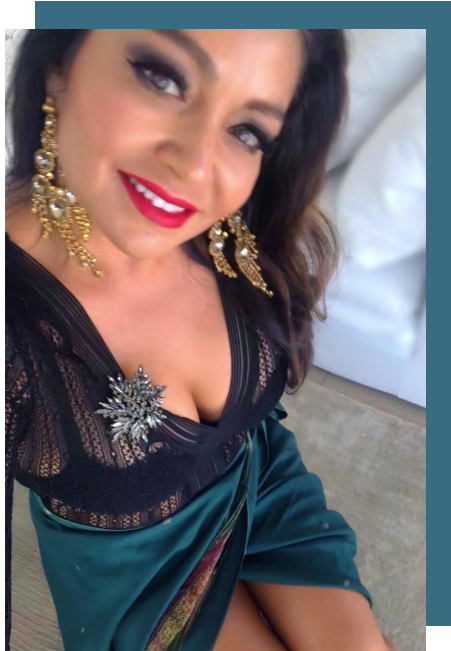

## Twisted T-shirts

Festivals are all about expressing yourself and showing your individuality. There's no better way to show how unique you are than wearing a one-of-a-kind sari wrap skirt. Since they are recycled, every single skirt is different. Pairing them back to a simple t-shirt lets the skirt speak for itself and lets you stay comfy for the whole day in the sun!

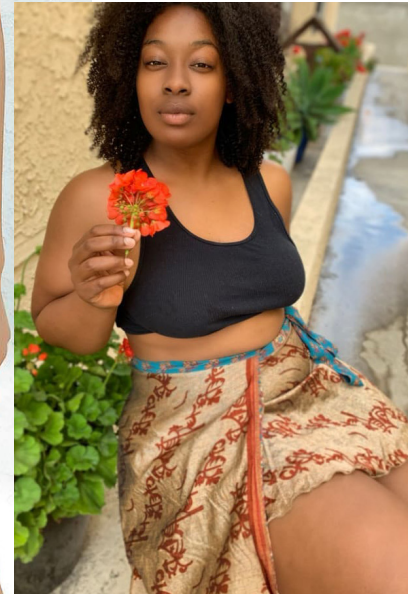

# Sheer Stunner

For people who want to make more of a statement, we suggest adding a fun sheer layer on top of your favorite tank top! It could be a sheer mesh or lace, and either way adding this layer will help enhance your outfit giving it more texture and a perfect look to take you from day to night.

# Dank Tanks

Festivals can be so hot since they are usually during the summer, in an open field, and you are surrounded by people. Sometimes you just want to throw on a tank top-we get it! The best part of these skirts is no matter how plain your top is you will look so cool because of these unique patterns.

## Creative Craves

If you really want to make a statement at your next festival then try your hand at tying one of the sari wrap skirts in one of the many unique ways they can be tied! We love seeing them used as a strapless dress, tube tops, or re imagined into new shapes! Finding new ways to tie your skirts can show all the different layers of patterns and really make a statement.
