

Our Virtual Stickerboards™ take the lettered grid system we use for our physical mosaic sticker puzzles and shrinks it to “fit” to your computer screen or even your mobile phone! You can now engage anywhere from a handful to hundreds of participants working synchronously or asynchronously. Everyone works independently to create a ‘paint by pixel’ image together.

Sign in to virtual.letsticktogether.com. If this is your first time signing into StickTogether please sign in with a password and confirm your account in the email in your inbox. This email will take you to the Virtual Stickerboard Gallery. As a return visitor, you’ll be taken right to the gallery.

To create a new Stickerboard, choose an image from our gallery. We regularly add new images so keep checking back! Give your Stickerboard a title but don’t give the image away. Also, add your name - both of these can be changed later. Then click **Let’s Go!** to confirm the image to your Virtual Stickerboard Dashboard.

Configure your dashboard to limit how many stickers each participant can add daily. You can also open the message board, add a final message that everyone will see when the Stickerboard is completed, schedule a Stickerboard launch time, add Bonus Pixels, and more. See the reverse side for more detail about dashboard features.

IMPORTANT - Every time you change anything in the dashboard, click **SAVE**.

Retrieve and share the unique invitation link for your Virtual Stickerboard. Your Invitation link will look something like this:
<https://virtual.letsticktogether.com/session/17c32034>

Anyone with this link can add ‘stickers’ to your Virtual Stickerboard. No registration or sign-in is required for participants.

FAQs

How does one add pixels to the Virtual Stickerboard? Just click on a (letter) color. Then click again on any pixel with the same letter to fill it.

Can participants be on mobile devices or tablets? Yes! Just use the zoom option - pinch out to zoom in.

How many participants can work on a Stickerboard at any one time? We have had over 200 participants. However, the limit is higher. But with 4,000 pixels to place, 200 should be the limit so everyone can add ~20 pixels.

What happens if 2 people click on the same pixel simultaneously? Nothing. It gets filled in.

How many Virtual Stickerboards can I have in my gallery? That depends on your plan. One for the FREE Plan. 10 for the Basic / Premium Plan. If you need more than 10 active Stickerboards at a time, email us at virtual@letsticktogether.com

The Stickerboard won’t load - the little squares keep dancing? Try clearing your cache and restarting your browser. In addition, institutional firewalls can limit access to our site. Try using your personal email or home computer to set up the Virtual Stickerboard. Please note that once the Virtual Stickerboard has been set up and you retrieve the invitation link, the firewall does not limit participants from accessing the Stickerboard.

Below you can navigate to the Stickerboard, copy/share the unique Stickerboard URL or QR Code. Choose to add QR Code to the Stickerboard, pause the action, share the Stickerboard on social media, and set up bonus pixels.

Give your Stickerboard a title, but remember to keep the image a secret.

Your name will only appear if you leave messages on the message board.

Only open the message board if you plan to monitor it. Anyone with the invitation link has access to your Stickerboard.

Schedule a Stickerboard (aka Virtual Pixel Party). Share the link in advance. See the participant count go up as everyone joins the Stickerboard. Watch the countdown clock until launch time.

To make sure everyone can join in the fun, limit the number of pixels each participant can add per day, or leave it at 3,996 so there is no limit.

All participants will see the final message once all 3,996 pixels are filled in.

The screenshot shows the 'Linda's Stickerboards™' dashboard. At the top, there's a '+ Create New Stickerboard™' button. Below it, a preview of the Stickerboard titled 'Let's StickTogether' is shown. The main section is 'Stickerboard™ Settings'. It includes fields for 'Project Title' (Let's StickTogether), 'Your Name' (Let's StickTogether), and 'Messageboard' (checked). There's a 'Special Event' section with a checkbox for 'Check to schedule Social Event with this Stickerboard™'. The 'Stickers per Session' is set to 25. The 'Final Message' field contains 'Let's ALL StickTogether!'. A 'Save' button is at the bottom right of the settings. On the right side, there's a 'Go to Stickerboard™' button, a 'Copy Link' button, a QR code, and a 'Download QR Code' button. At the bottom right, there's a 'Pause Stickerboard™' button and social media sharing icons. A 'Bonus pixels' section is at the bottom right.

IMPORTANT
Every time you change the dashboard, click **SAVE**, or your changes will be lost.

The 'Bonus Pixels' dialog box shows a field for 'Number of random bonus pixels in the image (max: 20)' with the value 0. There's a checkbox for 'In addition, make the last pixel a bonus.' and 'Cancel' and 'Save' buttons at the bottom.

Click Enable Bonus Pixels to open this window. Add the number of Bonus Pixels you would like randomly embedded in the Stickerboard. Make the last pixel left an additional Bonus Pixel. Participants who click on a Bonus Pixel get a pop-up requesting their name (COPPA/FERPA compliant).

Once the Stickerboard is completed, you can see and download the winners from your dashboard. And as always, don't forget to click **SAVE**.
