

### PREVENT Hearing Loss

*Musicians' Hearing Protection*

Keep your fans and concert goes safe and able to fully enjoy your music for years to come.

Conventional hearing protection actually contributes to hearing loss. It is often not worn properly, occlusion effect distorts sound and the audio fatigue adds to the discomfort. Sound that seeps through is amplified by pneumatic pressure effect and masked by ear's stapedius reflex.

**Level 1** – Share your social media to boost our crowd funding.

**Level 2** – Contribute to our crowd funding.

**Level 3** – Lend funds to promote and manufacture.

**Level 4** – Name a product line, sell at concert in partnership with the venue manager.

**Level 5** – Create a product line subsidiary of Asius Technologies.

### PRESERVE Remaining Hearing

*ADEL™ Drum Earbud*

Preserve your fan's enjoyment with earbuds that deliver Lower volumes that Sound Louder and Better. Earbud induced hearing loss and generation deaf is now a World Health Organization concern. We anticipate having the first hearing conserving earbuds approved for use by the profound hearing loss community.

ADEL™ Drums deliver the best sound we ever heard – exceeding even top of the line planar headphones.

**Level 1** – Share your social media to boost our crowd funding.

**Level 2** – Contribute to our crowd funding.

**Level 3** – Lend funds to promote and manufacture.

**Level 4** – Name an earbud product line.

**Level 5** – Create a product line subsidiary of Asius Technologies.

### RESTORE Long Lost Hearing

*Bubble Hearing Aid/IEM*

Help us restore hearing loss that is noise induced or results from injury or illness. Current solutions are ineffective – they degrade the “good” ear, are expensive, irreversible and destroy sense of pitch.

Support and participate in our Vanderbilt University Medical Center research to restore hearing function in an affordable, non-invasive manner.

**Level 1** - Tax deductible contribution to the upcoming “**Rock Gives Back . . . Hearing**” Foundation establishes your legacy in hearing restoration.

**Level 2** – Create a product line subsidiary to develop a superior alternative to irreversible and destructive cochlear implants.
