

Upholstery Care Guide

Upholstery Care Guide

To clean and maintain:

- 01 Vacuum fabric regularly to avoid dust build up
- 02 Rotate cushions where possible to distribute wear
- 03 Attend to spills immediately

We recommend using a specialist reputable and professional fabric or leather cleaning company at least once every two years to keep your furniture looking good and to increase the life of your furniture by up to 30%.

For more information about cleaning your upholstery, contact Acorn Furniture: hello@acornfurniture.co.nz or 0800 601 701

Stain & mark removal:

Moist soiling can be removed using a mild detergent solution, a soft brush and a clean white towel. Do not use solvent cleaners as they may damage upholstery.

- 01 Remove any residue
- 02 Spray with mild detergent (or warm soapy water)
- 03 Brush from the edge of the stain working towards the centre
- 04 Pad off excess liquid
- 05 If stain persists, repeat action
- 06 Rinse with clean, clear water and clean dry white towel
- 07 Remember removing stains quickly will markedly improve the outcome
