COLD DRIP HAS NEVER BEEN EASIER

This slow drip method, once only found in select specialty coffee shops, is known for producing a less acidic, less bitter cup with exceptional complexity. Drip by drip, the Bruer Cold Drip System's slow hypnotic process unmasks the natural sweetness, and full-bodied origin flavors of any coffee you brew.

Features:

- The Bruer Cold Drip System makes up to 20 fl oz of cold brew in as little as four hours
- Set it up and let it go without the risk of over extraction. Start brewing before bed or work.
- With an adjustable valve you can experiment to make the perfect coffee for you.
- Cold brew will last up to two weeks in the fridge!

WHY SLOW DRIP?

Slow drip coffee is a delicious way to brew, with less acidity and bitterness than hot-brewed coffee.

SIMPLE SET UP

Simply add your ground coffee and paper filter to the brew chamber, add your ice and water to the water chamber, set your drip rate, and in no time at all, your brew will be ready to drink.

MULTI-PURPOSE

Drink cold drip straight out of the fridge, diluted with water, or mix with milk and ice for a refreshing summer beverage.

QUALITY

All Bruer products have been engineered with quality materials and designed to make cold drip brewing simple, affordable, and stylish.

200Z/600ML IN 4 HOURS

Set it up and leave the Bruer Cold Drip System to do its thing. Return a few hours later for a delicious, refreshing coffee.

DRIP ADJUSTMENT

The drip rate can be adjusted after you've added your ingredients by rotating the knob on the end of the valve.
