ORBIT™ HD PROPELLER BLADES:
These Universal propeller blades can be used on either the front or the back of the ORBIT™ HD.

**NOTE:** Make sure to replace a damaged 'A' blade with an 'A' blade only and a damaged 'B' blade with a similarly labelled 'B' ORBIT™ HD Blade. Blade Colors do not matter, but the A and B markings and where they attach on the drone is very important. Propeller Blade mismatches could lead to your drone being damaged or not taking off at all and could also cause severe bodily harm.
