# CUSHIONING AT THE HIGHEST LEVEL

## NEW WAY OF WALKING WITH INFINERGY® BY BASF

**WELLMAN**

You deserve to have the next generation of ELTEN Safety shoes in your job. Characteristics: Comfortable cushioning for working on hard floors, energy recovery while walking, protection of the ligaments and joints. Working is much easier with the Infinergy® midsoles from BASF.

### EFFICIENCY

With every step Infinergy® absorbs enormous amounts of energy.

### TEMPERATURE RESISTANCE

Infinergy® keeps its full functionality in a wide temperature range from -20 to +120° C.

### PROTECTION OF THE JOINTS

The outstanding cushioning characteristics of Infinergy® steadily prevent the joints from damage.

### BOUNCE

Infinergy® returns a lot more energy and drive to the wearer than conventional materials.

### DURABILITY

Infinergy® stays durably elastic and always bounces back into its original shape.

### WELLNESS

The wearer's feet remain fitter with Infinergy®. Furthermore, they tire less quickly.

# PERFECT FIT IN NO TIME AT ALL

## BOA® FIT SYSTEM

BOA® Fit System – is an innovative fit system without laces, buckles or Velcro fasteners, which holds all day long without loosening. Because once the system has been latched in place, laces and dial stay in position without re-tightening!

### PARTICULAR ADVANTAGE:

The fit system can be easily operated with one hand. It remains securely closed, eliminating the risk of tripping! And the BOA® Fit System works like lightning, too.

**PUSH IN TO ENGAGE**

**TURN TO TIGHTEN**

**PULL UP FOR QUICK RELEASE**

Exclusively available at [www.stitchkraft.com.au](http://www.stitchkraft.com.au)

# WHEN IT'S COLD AND WINDY

## GORE-TEX

Only shoes that are comfortable for climatic conditions are really practical. As soon as our feet become too warm, too cold or even wet, we begin to feel uncomfortable. This can affect our health and ability to concentrate.

GORE-TEX shoes are durably waterproof and highly breathable. They keep your feet dry and offer optimum climatic comfort – in all weathers, throughout the entire product life cycle.

## MULTIPLE WIDTHS

### EVERY FOOT IS UNIQUE

With a number of safety shoes we offer you a comfortable multi-width system, which creates the individually required space for every foot: Through greater volume in the forefoot area. We have also adjusted the toe protection cap accordingly. It has „grown together“ with the width and offers effective protection because it also covers the toe area well at the sides, whilst the requisite remaining height is still intact.

FOR THE FOOT OF AVERAGE WIDTH

- Protective toe cap of normal width
- Ball area of normal width
- Normal instep volume

FOR THE WIDER FOOT

- Wide protective toe cap
- Wide ball area
- Increased instep volume

FOR THE XX-WIDE FOOT

- Wide protective toe cap
- Extrawide ball area
- Extremely increased instep volume

Exclusively available at [www.stitchkraft.com.au](http://www.stitchkraft.com.au)

# BODYGUARD FOR THE FEET

## BIOMEX PROTECTION®

The sleeve is firmly "anchored" in the area of the midsole. When tensile and compressive forces act at the same time – as frequently occurs in the case of twist accidents – it provides the foot with optimum stability. It also follows the natural axes of the joints in the foot and in the knee in their movement towards the middle of the body. This decisively reduces the risk of twisting.

The biomechanical BIOMEX PROTECTION® technology takes the natural, asymmetrical movement axes of the foot and lower leg into account. The sleeve is accordingly constructed asymmetrically and lies in front of the ligaments during the movement. It also reduces the lever action of the forefoot on the lower ankle joint and the lateral ligaments.

**BIOMEX**  
PROTECTION

- Biomechanical construction
- Optimum protection for the ankle joints
- Stirrup technique for high stability
- Light plastic material
- High flexibility while walking or kneeling
- Great wearing comfort

# SEMI-ORTHOPEDIC INLAY SOLES

## FOR LADIES AND GENTLEMEN

People's feet are as varied as the people themselves. However, there are three types which occur more frequently than others. In order to support the particular foottypes efficiently, we have developed three different types of inlay soles. Each has a different level of arch support. This leads to individual cushioning and even weight distribution, which in turn serves to relieve pain and pressure points. Your feet will be softly bedded and tire less easily. And your back will also feel much more at ease immediately by the cushioning of your steps.

### LOW

Support for flat feet and for comfortable shock absorption.

### FLAT FOOT

### MEDIUM

For significantly more comfort for medium arches.

### REGULAR FOOT

### HIGH

For effective shock absorption if the foot arch is too high.

### HIGH ARCH FOOT

## AWARD-WINNING DESIGN AND QUALITY

### PLUS X AWARD

Our BUSINESS, L10, TRAINERS, MAXXIMO and TRAINERS LADY soles offer the highest wearing comfort. The independent jury of the Plus X Awards has not overlooked this: The five WELLMAXX series have been awarded in the categories High Quality, Functionality and Ergonomics. The MAXXIMO and the TRAINERS LADY sole also received the award in the Design category. The ELTEN brand also continues to convince, winning in the Plus X Awards in the categories Best Brand of the Year and Highest Customer Satisfaction. The Plus X Award is an innovation prize for brand quality in the areas of technology, sport and lifestyle. The evaluation is carried out by an international jury from 25 industries.
