New Key Programming Software Toyota 2020 ADS2296

FREE UPDATE!!
NEW VEHICLES ADDED!!

June 2020

Advanced Diagnostics is pleased to announce the release of the ADS2296 key programming software for Toyota.

What does the software do?

ADS2296 software now supports adding bladed keys for select Toyota models with the presence of an existing master key, and also resetting immobilizer function for lost keys situations.

The ADS2296 software programs proximity keys for Toyota and Lexus models. ADS2296 supports adding keys and erasing keys with the presence of an existing master key and resetting immobilizer function for lost key situations. Keys that are erased will no longer be allowed to be programmed back to vehicle. Proximity keys must be brand new when added to the vehicle. The remote and the transponder are programmed at the same time. Bladed keys may be re-used.

OutCodes generated by this software will need to be converted into an InCode through NASTF, using a valid LSID and active TIS subscription, or by a friendly Toyota/Lexus dealer.

What else will I need?

*AD cannot/does not guarantee access to the incodes needed to use this software or to how these codes are used, displayed or processed by the OEM

* Based on active testing in the field, some variation may occur, we cannot guarantee bypass success on ALL listed vehicles. 2020 models may still be in production by the OEM and it's always possible they update or change their security which is beyond our control. Success has been at or near 100% on the vehicles shown here.
